

Save Time and Money with the Adjustable R2 VARYX™ Continuous Hinge

The VARYX™ continuous hinge by R2 is the only hinge available that allows adjustment of all clearances—after the door is secured to the frame.

All VARYX™ hinges feature the FOCUS™ bearing system, with 37 twist-resistant bearings centered at the mid-height of the hinge where they are most effective in supporting the heaviest doors. A continuous double interlock delivers top security, high impact resistance and unmatched energy savings.

Applications include standard hollow metal, minimum reveal narrow-faced frames or narrow stile aluminum doors. The VARYX™ is designed for easy trimming in custom settings, and models in standard lengths and finishes are ready for immediate delivery.

Durability, vertical and lateral adjustability and one-man installation make the VARYX™ continuous hinge a fast, cost-effective way to restore new life to the heaviest doors.
