

Schlage Primus XP

One key gives you complete control

The **Schlage Primus XP** is an exclusive patented key that ensures greater security for your buildings, while protecting against unauthorized key duplication. That's because Primus XP is designed with unique side bit milling that can only be duplicated by a Primus XP dealer, giving you a higher level of key control and building security.

The Primus XP is a scalable system that can be used to control access with varying levels of security throughout your facilities – including Schlage mechanical, electro-mechanical and networked security solutions. This simplifies key management by providing just one key that's backward compatible and supports multiple cylinders.

- Conventional and interchangeable cores
- Supports all sizes of key systems, from small to large, with multi-level key hierarchy where needed
- Fits most non-Schlage locks, eliminating costly and time-consuming hardware changes
- Available in a variety of system types, including open, restricted, restricted patented, and high security

The Schlage Primus XP is the patent-protected security solution that fits every door in your building.
