Schlage Key Systems Sales Policy

The following specific product terms and conditions are applicable only to the extent provided herein. All other terms and conditions contained in the General Terms and Conditions of Sale and Service provided in this Price Book will govern the sale of products identified in this Price Book.

Definition-

Standard keyways are C, CE, E, EF, F, FG, G, H, J, K, L. All other keyways are considered restricted.
Everest, Everest Primus, Classic Primus and all other restricted keyway products (Quad, Reversed, Numbered) manufactured by the Schlage Lock Company are offered for sale by policies set forth per product type and security levels through specific channels of distribution. Possession of this price book or any other Schlage price book does not constitute "the right to purchase" these products. Please refer to the sales policy below for terms and condition. The term keyway(s) refer(s) to keyway, key sections or side bit milling.

Standard Classic (Obverse) Key Sections- no restriction
Standard keyways are Classic (Obverse) C, CE, E, EF, F, FG, G, H, J, K, L.

Everest and Everest 29 Open (C and S Key Sections)
Everest and Everest 29 Open (C & S keyways) include non-Primus products with Everest C and Everest 29 S keyways and key sections. Schlage only sells Everest and Everest 29 Open products to commercial security professionals. Commercial security professionals purchasing Everest and Everest 29 Open products from Schlage are permitted to stock and to originate or duplicate keys without signature verification.

Purchasers of Everest and Everest 29 open (C & S) are permitted to resell the products in accordance with their distribution agreement to end users and to other commercial security dealers who have a professional locksmith on staff but are expressly prohibited from selling to:

i) Any residential retail outlet.
ii) Any individual or entity purchasing or selling products through any method of auction.

End User Keyways - Primus / Primus XP levels 3, 4 & 9, Everest D, Everest B, Everest 29 T, Everest 29 R, Quad, Reversed, Numbered.
End user restricted keyways are manufactured and sold by Schlage for use within the end user facilities only and are not for dealer or locksmith's use or distribution. The facilities are described as the "ship-to" address pre-authorized by the end user via a letter of authorization (LOA) or face sheet (depending upon the key system type).

End user keyway products may be stocked at the end user location only, unless authorized otherwise in writing by the end user. Every new end user system, using these restricted keyways, requires prior approval from the local RSO sales office management.

Restricted end user keyways may not be sold to any contract hardware dealer or wholesale distributor not open as a direct Schlage account as the time of the sale, unless authorization has been granted in writing by the local RSO sales office management where the end user reside.

Locksmiths/ dealers' keyways - Primus/ Primus XP levels 1, 1+, 2, 7, 8, Everest B234 & B235, Everest 29 R234 & R235.
Locksmith/ dealer key section can be sold to commercial locksmiths/ dealers only.

Right to stock and sell locksmiths/ dealers restricted keyways requires the appropriate written agreement with Schlage and approval by the local RSO sale office management. Please contact your local RSO sale office for a copy of these contracts and additional information.

Schlage hereby reserves the right to terminate or take any other legal action against any party that violates this policy.

Restricted Keyway Policy

Everest B, Everest 29 R
All Everest and Everest 29 SFIC (B and R Families) keyways are restricted.

When ordering a new keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Letter of Authorization (LOA) – Authorized ship-to address for key blanks, cores and cut keys on end-user's official stationery. See **Forms & Examples** for sample letter of authorization.
- Numerically defined specifications for expansion of all branches of the key system.

The factory will assign a "facility code" which will appear on all keys and blanks for this job. When ordering additions to an existing keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Facility code previously assigned by Schlage and stamped on all existing keys and blanks.
- Registry number of the keying system as established by Schlage.
- Letter of authorization on end-user's official stationery is required when:
  - End-user places order with new dealer.
  - Order is to be drop shipped to a different ship-to address than originally authorized by the end-user.
  See **Forms & Examples** for sample letter of authorization.

Bitting list (transcript) orders require a letter of authorization on the end-user's official stationery. Prevailing prices apply.

Everest D, Everest 29 T

All Everest D and Everest 29 T keyways are restricted.

When ordering a new keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Letter of Authorization (LOA) – Authorized ship-to address for all products on end-user's official stationery. See **Forms & Examples** for sample letter of authorization.
- Numerically defined specifications for expansion of all branches of the key system.

The factory will assign a "facility code" which will appear on all keys and blanks for this job. When ordering additions to an existing keying system, include the following:

- Job (end-user) name, city, state and zip code.
- Facility code previously assigned by Schlage and stamped on all existing keys and blanks.
- Registry number of the keying system as established by Schlage.
- Letter of authorization on end-user's official stationery is required when:
  - End-user places order with new dealer.
  - Order is to be drop shipped to a different ship-to address than originally authorized by the end-user.
  See **Forms & Examples** for sample letter of authorization.

Quad, Numbered ("Paracentric") and Reverse Keyway Family Policy
A letter of authorization from the end-user is required for all orders for restricted keyway plugs, 0-bitted and 1-bitted products and all key blanks. Restricted keyway products are not available keyed random. The letter of authorization must include the address in which the materials will be shipped. Keyway or keyway family must be referenced in the letter. Letters must be dated and signed by the end user. Letters dated more than 6 months prior to the order submission date will not be accepted. Letters for projects that are ongoing may be older than six months if effective dates are referenced in the letter. With the exception of the signature, all other information must be typed.

Allowable End User Authorizations for Restricted Keyways:
The end user can authorize a dealer or distributor to order and inventory products if they so choose. This authorization requires the submission of a fully completed "Letter of Authorization" or "Signature Card", depending on the product type requirements, by the end user to Schlage.

Construction Core Program Policy

Full size and small format construction cores will be invoiced under standard payment terms. Credit for these cores, less the handling charge, will be issued upon their return to the factory. Please contact customer service for return authorization. Customers may not deduct payment for construction cores prior to completion of their authorized return.

Control Keys for Interchangeable Cores

A single control key will be added to orders containing interchangeable cores where a new masterkey system, master key system expansions requiring a different control key and all construction core orders are placed and does not include a control key on the purchase order. Construction core orders will include both a control and user key.

Primus® / Primus XP Sales Policy

Primus High Security cylinder products manufactured by the Schlage Lock Company are offered for sale through specific channels of distribution, based on stocking requirements and security levels. Possession of this price book or any other Schlage price book does not constitute "the right to purchase" Primus products.

Important: In stocking levels where purchase agreements are required, a fully executed purchase agreement, including initial minimum inventory order, must be in place before any Primus products may be quoted or purchased. Contact your RSO Consultant for specific details.

The prices contained herein apply to Primus Levels 1 through 9 with respect to the actual product. Availability of product is subject to additional conditions as follows:

Classic Keyways

PRIMUS/PRIMUS XP LEVEL 1: For retail locksmiths and Schlage dealers. Standard nationwide side bitting by keyway. Stocking level requires a separate Primus/Primus XP agreement. Initial inventory commitment required for distributors but not for participating locksmiths. Obverse keyways only. HP, JP and LP section keys are not available.

PRIMUS LEVEL 1 PLUS: For retail locksmiths. A side bitting is assigned on a nationwide exclusive basis to a specific Schlage wholesale distributor. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase by the wholesaler and the locksmith. Obverse keyways only. HP, JP and LP section keys are not available. Cylinders are always furnished less key blanks (LKB).

PRIMUS XP LEVEL 1 PLUS: For retail locksmiths. An exclusive side bitting is assigned to dealer within the first three digits of the dealer physical location zip-code. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. Obverse keyways only. Cylinders can be ordered LKB, KD, KA or MK.

PRIMUS/PRIMUS XP LEVEL 2: For Schlage dealers and large commercial locksmith businesses. Exclusive side bitting is assigned to dealer by time zone. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. Obverse keyways only.

PRIMUS/PRIMUS XP LEVEL 3: End user level not stocked by dealers. Key systems are assigned a side bitting exclusive within 2-digit zip code (Level 3G) for orders of 60 - 1,999 Primus cylinders. Orders of fewer than 60 Primus cylinders are randomly assigned a side bitting from a small nationwide pool of side bittings (Level 3U). Distribution through Schlage dealers and Schlage wholesale distributors. Obverse and Quad keyways only.

PRIMUS/PRIMUS XP LEVEL 4: End user level not stocked by dealers. Key systems are assigned a side bitting exclusive within a time zone (Level 4Z) for orders of 2,000 - 3,999 Primus cylinders. A nationwide exclusive side biting (Level 4N) is assigned to key systems of 4,000 or more Primus cylinders. This exclusivity can be purchased for a separate fee for smaller quantities of cylinders. This price book does not contain the fee schedule. Contact your RSO Consultant for specific information. Distribution through Schlage dealers and Schlage wholesale distributors. Obverse and Quad keyways only.

PRIMUS LEVEL 7: For retail locksmiths. Side bitting is assigned on a nationwide exclusive basis to a specific Schlage wholesale distributor. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase by the Schlage wholesaler and the locksmith. Same as Level 1 PLUS above, but with Everest S Family keyways only.

Everest® Keyways

PRIMUS XP LEVEL 7: For retail locksmiths. An exclusive side bitting is assigned to dealer within the first three digits of of the dealer physical location zip-code. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. All Everest 29 key sections. Cylinders can be ordered MK, KA, KD or LKB.

PRIMUS/PRIMUS XP LEVEL 8: For Schlage dealers and large commercial locksmith businesses. Exclusive side bitting is assigned to dealer by time zone. Distribution through direct Schlage dealers. Stocking level which requires a separate Primus purchase agreement and an initial minimum inventory purchase. Equivalent to Level 2 above, but with Everest S Family keyways only.

PRIMUS/PRIMUS XP LEVEL 9: End user level not stocked by dealers. Key systems are assigned varying degrees of geographically exclusive side bittings based on a sliding scale of purchase commitment or separate fees. This price book does not contain the fee schedule. Contact your RSO Consultant for specific information. Distribution through Schlage dealers and Schlage wholesale distributors. Level 9U, 9G, 9Z, and 9N are equivalent to Levels 3U, 3G, 4Z, and 4N above, but with Everest S and T Family keyways.

The following side bit milling exclusivity criteria apply to both levels 3, 4 & 9:

- 1- 60 cylinders-Random assignment
- 61-1999 cylinders-First two digits of zip-code
- 2000-3999 cylinders-Time-Zone Exclusivity (also available for $10,000 fee for an organization who would like this exclusivity and doesn't meet cylinders quantity requirement).
- 4000 + cylinders-Nation Wide Exclusivity.(also available for $40,000 fee for an organization who would like this exclusivity and doesn't meet cylinders quantity requirement).

Important Ordering Information

See Forms & Examples: Primus and Everest 29 Primus Ordering Checklist for a checklist of information required to process a Primus order. Note that, for security reasons, all end user Primus levels (Level 3, 4 and 9) require a Facesheet (MS-E120) bearing an original signature. Opening orders for end user Primus levels also require a Signature Card (MS-E130) bearing original signatures. Facesheets and signature cards are used to authenticate the end user request for product, therefore orders received without the correct supporting documents (or without original signatures) are subject to delays or cancellations. Blank Facesheets and Signature Cards are included in the Forms & Examples section of this price book for your reference. Additionally, electronic version of these forms are available at allegion.com/us.

The Schlage Lock Company reserves the right to make changes in designs and specifications, to make additions or improvements on its products, or to discontinue products without incurring any obligation. The Schlage Lock Company is not responsible for any modification, addition, or alteration to our products by others.

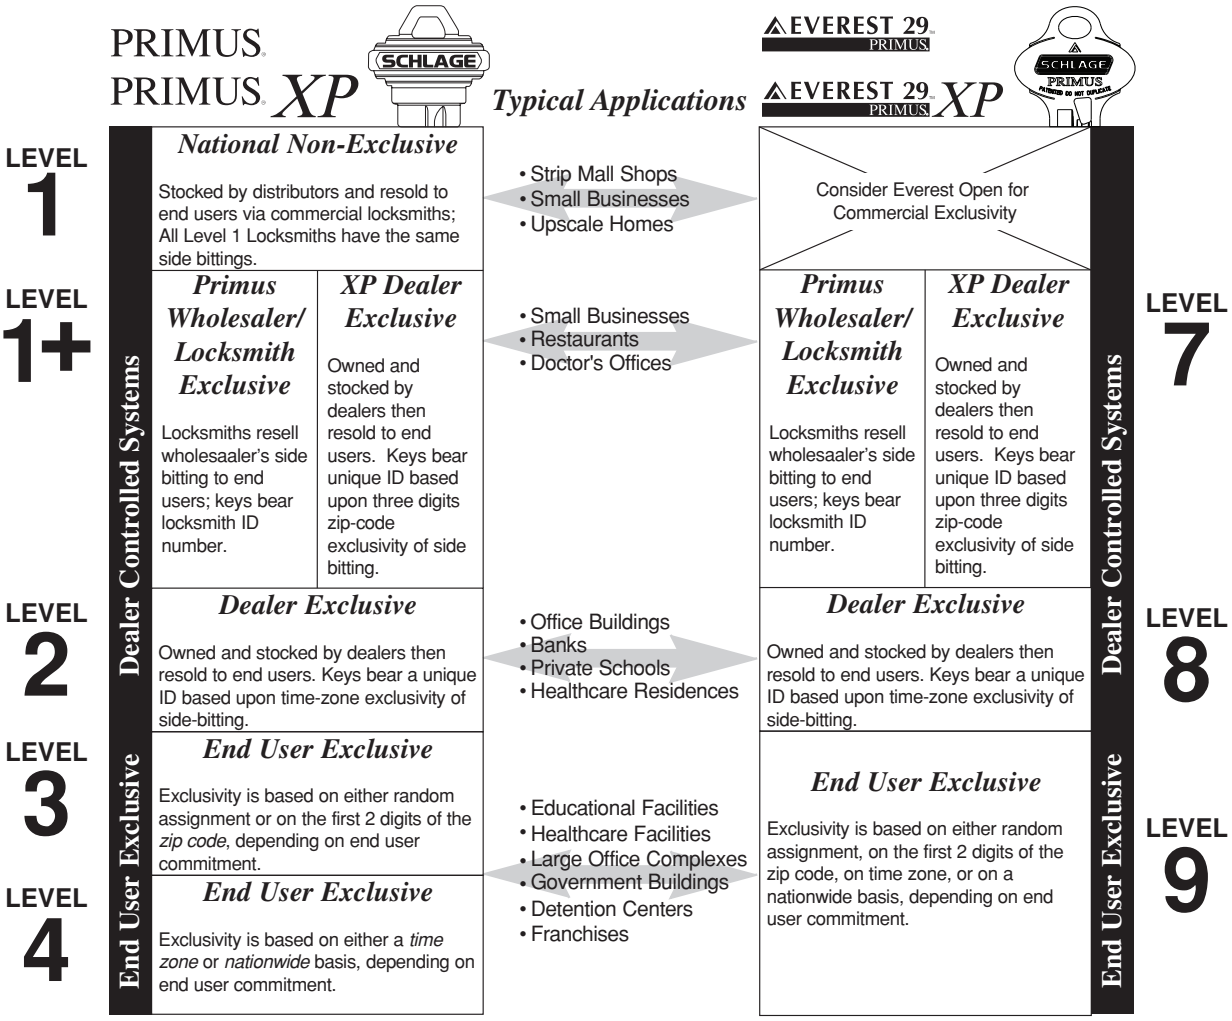
Level 1	None	N/A	N/A
Level 1+	$7,500	Level 7 XP	$7,500
Level 2	25,000	Level 8	$25,000



Electronic Validation from Schlage

Electronic Validation (e-validation) is an online system for the use of the end user to create electronic authorizations replacing the letter of authorization (LOA) and Primus Facesheet processes. This online validation system is designed to ease the burden of an end user providing authorizations for ordering restricted key and cylinder products on their behalf. Through this system, the end user can register for an online account with Schlage that will allow them to manage their shipping addresses, shipping contacts and additional authorized users for their restricted products. Through this system, they can then generate an electronic Facesheet that they can provide to the distributor of their choice to allow an order for restricted products to proceed. Enrolling in and using this feature will reduce the overall time for an order to be processed from the time that the end user has determined the need for product. The electronic Facesheet provided by the e-validation system can be faxed or emailed along with a distributors order reducing the time and energy required for original copies of Facesheets previously required. The system is for both new and existing restricted key system owners. For new restricted systems, a registration process will provide the ability to create the initiating Facesheet for the project.

Products/key systems eligible for e-validation:
Everest – B and D restricted family of keyways
Everest 29 – R and T restricted family of keyways
Primus – All keyway families that include the Primus feature
Primus XP – All keyway families that include the Primus XP feature

E-validation can be accessed at the following web address: HTTPS://mycredentials.allegion.com

Distribution Function and Location Policy

The Schlage customer relationship includes the nonexclusive area of primary sales responsibility and the channel of distribution assigned by Schlage. It is vital to our success and for the effective management of the distribution of our products that the Schlage customer relationship, once it is satisfactorily established between us, should not be changed without our approval. Therefore, after selection by Schlage as a distributor of one or more of Schlage products, a customer should continue to perform that distribution function from the location of its business at the place or places utilized at the time of selection. A customer should not change its Schlage distribution function or establish a different or additional location without the prior written consent of Schlage.

Schlage reserves the right to discontinue, after appropriate notice, sale of its products to any customer which refuses to adhere to this policy. Schlage also reserves the right to change, in its sole discretion, the number and locations of the distributors authorized to distribute its products in any area. This determination will be based upon, among other considerations, the success or failure in developing the market for Schlage products.

Hardware Finishes

Schlage Lock finishes are durable, top quality finishes obtained by the careful processing of solid brass, bronze, stainless steel or other materials. Where required, a protective clear coating is applied and cured under high temperature. It is important that climatic conditions and usage be taken under consideration when selecting finishes. This is especially true in areas subjected to strong corrosive vapors, humid climate or sea air which, in a short time, may have a damaging effect on metal finishes. The longevity and preservation of the finish appearance is determined by base metal and finishing process. Clear protective coating or other organic finishing applications may require different methods of cleaning and care. As an example, non-clear coated finishes should not be cleaned with soaps or any solvents; organically coated surfaces should periodically be cleaned with a mild, nonabrasive soap and buffed lightly with a clean cloth. The type of base metal and finishing techniques must be considered when applying any cleaning or preservative method. Contact the Schlage Technical Services Department for further information on the care of finished hardware.

In some instances, for customer convenience, the most appropriate BHMA finish symbols are used to indicate similarity of appearance, regardless of base metal of finishing process. A, AL, CS, D, ND, F, FA, H, S, S200-Series and Dexter by Schlage levers are zinc-based material and are plated to match finishes indicated. L-Series will utilize a brass material for 612 and 613 finishes. Finishes of latches, strikes, cylinders/cores, and visible mounting screws, though similar in appearance, may differ from the finish of the trim. Finish numbers in the 600-Series are the BHMA (Builders Hardware Manufacturers Association) industry standard.

Commercial Finish Codes and Descriptions:
The nearest old U.S. equivalent code designations are shown in parenthesis ( ).

Symbol	Description
605 (3)	BRIGHT BRASS, Clear Coated
606 (4)	SATIN BRASS, Clear Coated
609 (5)	ANTIQUE BRASS, Satin Brass, Blackened Satin Relieved, Clear Coated
612 (10)	SATIN BRONZE, Clear Coated
613* (10B)	OIL RUBBED BRONZE, Oxidized Satin Bronze, Oil Rubbed, No Coating
619 (15)	SATIN NICKEL, Satin Nickel Plated, Clear Coated
622(19)	MATTE BLACK, Coated
625 (26)	BRIGHT CHROMIUM PLATED, No Coating
626 (26D)	SATIN CHROMIUM PLATED, No Coating
629 (32)	BRIGHT STAINLESS STEEL, No Coating
630 (32D)	SATIN STAINLESS STEEL, No Coating
643e	AGED BRONZE, Clear Coated

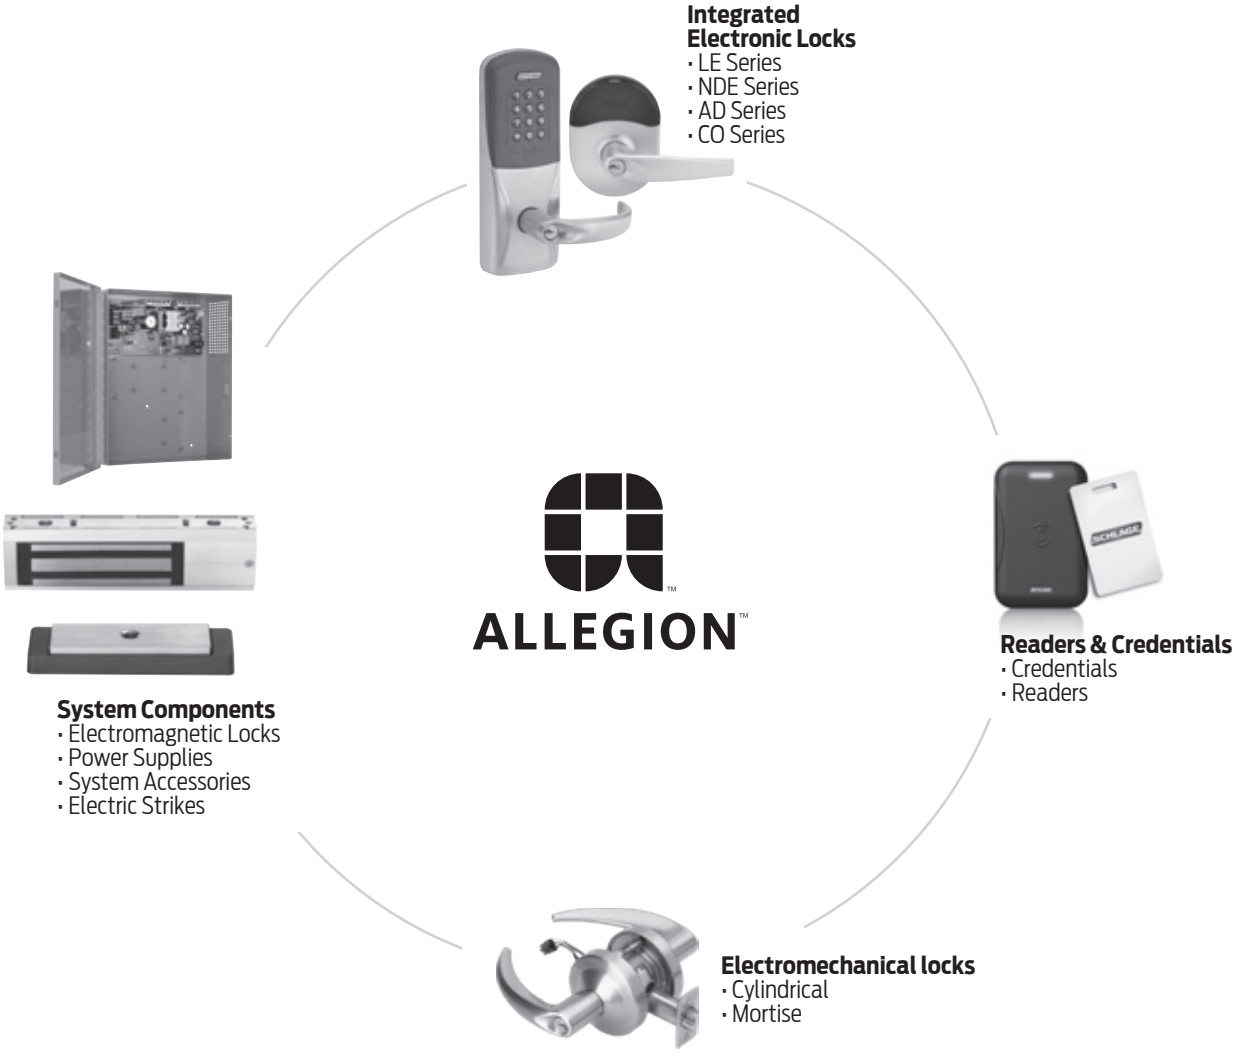
** Oil rubbed bronze (613) is considered a category "B" finish by ANSI/BHMA and will vary in color when applied to different alloys and forms of base material. 613 will also vary from production lot and additionally from one manufacturer to another. Oil rubbed bronze will wear off over time due to the "rubbed" finishing method that has no protective coating or plating.*

Notes

For more than 100 years Allegion brands have been providing innovative access control solutions. We are at the forefront of access control innovation, including contactless smart credentials, wireless security products.

Allegion electronic security offers the most extensive range of access control and security management solution on the market today. This comprehensive line of products allow you to build a complete access control system from the ground up. For facilities with existing access control systems, the open architecture design of Allegion electronic security products facilitates easy integration into your existing system. Because Allegion understands that your needs will evolve over time, Allegion also provides the opportunity for an easy migration path as technology advances.

At Allegion, we understand that each facility has unique security requirements. Our extensive line of products, flexible options and ability to adapt to your existing environment make it easy to find a solution that will fit your security needs...whatever they may be.



Allegion Solutions Overview

Allegion offers comprehensive security solutions for each facility. To help you identify which solution is right for your facility, here are some reader technologies with their compatible credential technologies. Allegion readers and credentials are designed on an open architecture platform. For more details on compatibility, please refer to the data sheets.

Credentials - How to Order

Schlage Credential Technology Types

Schlage offers a wide range of credential technologies and form factors.

Mobile Credentials

Schlage offers a variety of ways to deliver mobile credentials to your students' and employees' phones. Using near field communication (NFC) or Bluetooth technology, a smartphone app works just like an ID card, providing more for your students and employees while enhancing the security of their credential. Easily assign credentials today using the access control software of one of our developer network partners. Schlage mobile credentials offer a much higher level of security, based on encrypted smart card technology.

Smart Credentials

Ideal for facilities with moderate to high security needs, Schlage smart credentials put you in control by delivering smarter solutions. Using MIFARE Classic®, MIFARE Plus® or MIFARE® DESFire® EV1 and EV2 technology, these credentials protect your most sensitive data by utilizing extra layers of security protection. Smart credentials can be used for many applications beyond access control including transit, cashless vending, and cafeteria point of sale.

Multi-Technology Credentials

Schlage multi-technology credentials are extremely flexible. Particularly useful during a transition from proximity technology to smart technology, these cards can be read by both proximity readers and smart readers. This allows your customers to economically migrate to the latest smart technology at their own pace.

Proximity Credentials

Schlage proximity credentials are a solution for facilities with less demanding security needs. Utilizing 125 kHz proximity technology, these credentials are a cost-effective solution and can interface with many industry leading proximity readers.

Magstripe Credentials

Schlage magstripe credentials are a solution for facilities with less demanding security needs. Utilizing magstripe technology, these credentials are a cost-effective solution.

1) Model Number

Please reference pages 18 -23 to pick your credential model number to assure you recieve the correct technology, form factor and memory size. Below is how the credential model numbers are created but not every combination is available and there are some unique part numbers available.

Sample Part Number: **8 5 2 0 M1**

1. Technology
- 2 - DESFire EV2
- 8 - DESFire EV1
- 5 - MIFare Plus
- 9 - MIFare Classic
- 7 - Proximity

2. Form Factor
- 4 - Clamshell
- 5 - ISO Card
- 6 - Keyfob
- 7 - Adhesive Patch
- 9 - Combo ISO Card

3. Memory
- 20 - 2K byte memory
- 40 - 4K byte memory
- 80 - 8K byte memory

4. Other
- M1 - Magstripe
- T - Think Keyfob

Sample Credential Model Number:
8520M1 - Schlage MIFARE DESFire EV1 Smart Card 2K byte/16k bit with Magnetic Stripe ISO Glossy White

Available Form Factors:

	Clamshell	ISO – Glossy White	Keyfob	Thin Keyfob	Wristband	PVC Adhesive Disk PVC Adhesive Patch
Dimensions (HWT in inches)	3.37x2.125 x0.075	3.37x2.125 x0.033	2x1.24 x0.038	1.77x1.18 x0.06	0.63x7.68 x0.295	35mm 3.37x2.125 x0.033

2) CardTrax

CardTrax format is a program designed to keep track of card programming and Badge ID numbers to eliminate confusion in ordering sequential numbering and / or programming details, and ensures duplicate cards are not issued. Cards will automatically be provided as "next in line" unless otherwise specified. Restricted CardTrax is an exclusive CardTrax Program for qualified end-user customers that provides global programming protection. If a CardTrax number is provided programming information is not required. Please reference pages 24-26 for more information on CardTrax and a complete application form.

3) Programming Information[1,2]

Please reference the below chart for a full list of Bit Formats provided by Allegion and the technologies in which they are available. Once a bit format has been selected determine the correct facility code based on the facility code range available with your selected bit format. Finally, determine your starting Badge ID number based on the range available with your selected bit format. When specifying your Badge ID range please specify the interal starting number, or the starting number that will be in the chip and an external starting number that will be printed on the card. By default, the internal number matches the external number; please specify if that is not your desired option.

Available Bit Formats:

Bit formats	Facility Code Range	Number Range	Proximity	Smart
26A (125 kHz Standard)	0-255	0-65,535	Y	Y
32X	N/A	0-1,073,741,823	Y	Y
34N	0-255	0-65,535	Y	Y
34S	0-4,095	0-1,048,575	Y	Y
35C *	0-4,095	0-1,048,575	Y	Y
36X	0-4,095	0-2,097,151	Y	Y
37H	Not Applicable	0-34,359,738,367	Y	Y
37X	0-65,535	0-524,288	Y	Y
40X * (13.56 MHz Standard)	0-1,023	0-268,435,455	N	Y
48X	0 – 1,048,575	0-1,048,575	N	Y

* For CardTrax™ Restricted program members only

Important Programming Notes:
1) It is highly recommended that programming be specified on all credential orders. Orders without programming will be delayed to confirm what programming is required or if default programming will suffice for the order. The default programming is a 26A bit format and a randomly generated facility code and badge ID range.
2) When ordering combo credentials, programming for both the smart and proximity technology must be specified. The same programming will automatically be used for both technologies if two different lines of programming are not specified.

4) Slot Punch

Slot punch is avialable on ISO and clamshell cards ONLY. Punch mark guides are on all ISO cards. Please specify slot punch orientation if desired (vertical or horizontal). There is a per card cost for factory slot punching of ISO cards. Please reference page 27 for slot punch options and price per card. Clamshell cards are vertically slot punched at no charge.

5) Card Print Scheme

Various card print schemes providing information such as the technology, format number, order number and Badge ID number are available. This information can be printed on different locations on ISO and Clamshell cards. If nothing is provided the standard print scheme, 01 will be provided. Please reference page 31 for available print schemes.

6) Custom Artwork Number

Please reference page 36 for more information on Custom Artwork.

7) Special Instructions

Please include any additional special instructions for your credential order. Special instructions include but are not limited to a cross reference sheet (specify CRS) or a custom configuration (include a CE number).

CARDTRAX™ Application Overview

Thank you for your interest in CardTrax™, an account tracking program designed for individual end users or Integrator/OEMs to ensure card numbers are never duplicated.

There are two types of CardTrax™ accounts available, Standard CardTrax™ and Restricted CardTrax™. Standard CardTrax™ accounts are available for end users, PACS/OEM's and integrator customers. The account will track bit format, facility code, and Badge ID information. It will not allow duplicates to be sent to that specific customer. Restricted CardTrax™ accounts (bit formats 35C and 40X) are reserved for end users only. This type of account will track bit format facility code and Badge ID information. The bit format and facility code combination can only be registered by one end user, and once registered it is not available to any other end user.

To enroll, an organization must complete the application and authorization form and submit them to cardtrax@allegion.com inbox. This document will assist in the application process providing additional information. Allegion requires all previously established accounts to complete the application, so that records can be updated and properly maintained.

Custom Artwork

Custom Artwork

Custom cards offer a way to stand out from the crowd and provide a way to creatively express features of your business. Display your company logo, showcase unique artwork, or convey a simple sales message with a custom credential.

How Does it Work?

1) Contact Inside Sales at customartwork@allegion.com to get started. Art requirements will be provided to start the process.

2) Once your team has reviewed the requirements and designed its artwork, submit your order request and artwork to customartwork@allegion.com.

    a) Include reference to CMYK in the art template.

    b) The artwork file preference is .ai, .eps, or .tif extensions. If these are not available, PhotoShop or PDF images are accepted in high resolution (300 dpi minimum).

    c) Include the quantity, base card technology and any special requirements (external marking, magstripe programming, etc).

    d) The initial order must be for 1,000 cards or more after that a recurring minimum quantity of 500 cards per order.

3) A quote and proof will be created and emailed for your review and approval. Upon customer approval, a custom artwork number to be included on your PO will be assigned (CA-xxxx).

4) This CA number will be valid for one year. If no additional orders are placed within 12 months, then there will be a new order request required to update existing artwork.

5) Next, simply submit your PO with the assigned custom artwork number and our team will begin producing your cards.

6) There is an extended lead-time on all orders from when the PO (not the order request) gets submitted.
*** (during peak high demand periods the lead-time may increase therefore advise your client to order well ahead of their required deployment date.).

Notes: Available for all ISO and clamshell cards
Design must fit within space allotted
Contact Inside Sales at customartwork@allegion.com with any questions throughout the process.

Schlage RC Multi-Technology Reader Controller

RC11

RC15

RCK15

Standard Features

- Real time connectivity; local mode feature allows reader to function without a connection to the network.
- Communication is secured using industry standard TLS 1.2 encryption.
- Tamper detection via accelerometer senses any type of altering and prevents a security breach with the reader.
- Three configurable inputs; Door Position (DPS), Request to Exit (REX), and Auxiliary (AUX).
- Reader controllers support 124 kHZ proximity, 13.56MHz smart technology, 2.4 GHz Bluetooth and Near Field Communication (NPC).
- Commission via ENGAGE™ mobile app for reader updates and easy configuration.

How To Order:

1) Specify the desired Schlage RC Multi-Technology Reader Controller (RC11, RC15 or RCK15)

2) On a separate line item specify the desired pigtail cable and pigtail length. A pigtail is required for installation and is not included with the RC model.

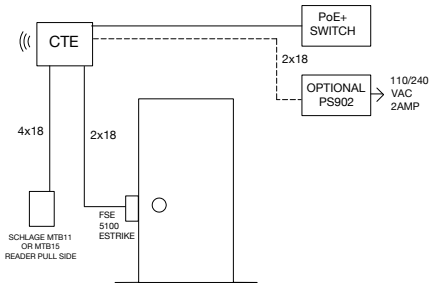
The CTE is an ENGAGE™ enabled single opening controller that allows perimeter and common area openings to be managed in a single system along with Schlage Control™ smart deadbolts, NDEB cylindrical and LEB mortise wireless locks. It is ideal for multi-family, commercial mixed use, and retail store front applications.

The CTE is designed to work with a Schlage® Mobile Enabled Multi-Technology reader and interface with an electrified lock, electromagnetic lock, electric strike, automatic operator or exit device to control an opening.

The CTE single door controller with mobile enabled multi-technology reader kit can be used in a variety of applications; below are a few examples.

Please note; all components are sold separately.

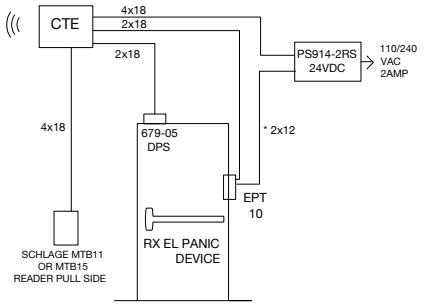
ENGAGE™ cloud via mobile device or Wi-Fi, or Software Alliance Member (SAM) via Wi-Fi or GWE with IP to host



Operation: Presenting a valid credential to Schlage MTB XX reader will cause fail secure 5100 electric strike to release for authorized entrance. Free egress always.

Products: We offer a variety of electric strikes from Locknetics™ and Von Duprin®, as well as Schlage Power Supplies to meet the specific needs of the opening.

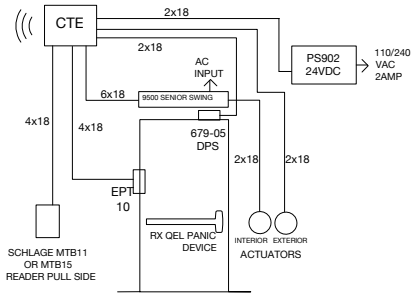
ENGAGE™ cloud via mobile device or Wi-Fi, or Software Alliance Member (SAM) via Wi-Fi or GWE with IP to host



Operation: Presenting a valid credential to Schlage MTB XX will cause EL panic device to retract for authorized entrance. Free non-alarmed egress at all times.

Products: We offer a variety of Falcon® and Von Duprin exit devices, and Von Duprin power supplies to meet the specific needs of the opening.

ENGAGE™ cloud via mobile device or Wi-Fi, or Software Alliance Member (SAM) via Wi-Fi or GWE with IP to host



Operation: Presenting a valid credential to Schlage MTB XX will cause QEL panic device to retract for authorized entrance and enable exterior actuator. Free non-alarmed egress at all times. Interior actuator always active to retract QEL panic and open door.

Products: We offer a variety of hardware and accessories from Von Duprin, LCN®, Schlage and Locknetics to meet the specific needs of the opening.

Certifications: UL 294 Indoor, FCC Part 15, NEMA Enclosure Indoor (Type 1, 4, and 4X), ULC S319 Indoor, RoHS

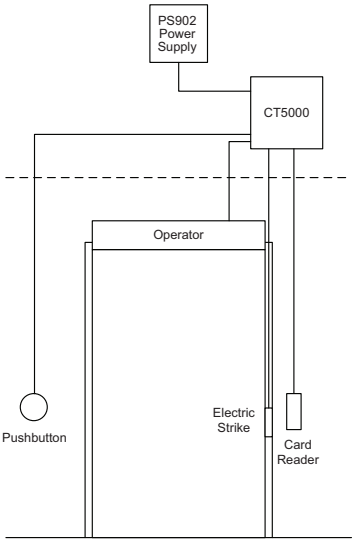
CT5000

The CT5000 is an indoor, offline single opening controller. It is flexible and works with various card reader technologies. With the correct power supply, the CT5000 controller works with various types of locking hardware, including electric strikes, electro-magnetic locks, or EL exit devices.

If networked functionality is required in the future, the CT5000 can be upgraded to a WRI-400 by upgrading the firmware and adding one incremental piece of hardware. This provides greater adaptability in the field.

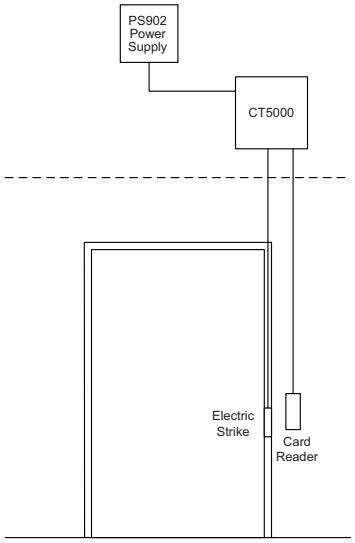
Perimeter Door Application

The CT5000 can be used for perimeter door applications with an automatic operator, electric strike and card reader



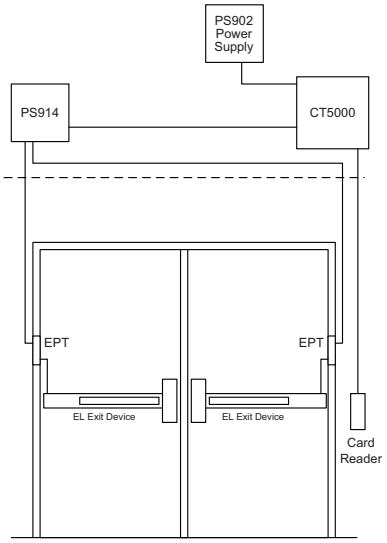
Narrow Stile Application

For narrow stile applications the CT5000 can be used with an electric strike and card reader



Panic Device Application

The CT5000 and a card reader along with the Von Duprin 914 Power Supply can control two EL exit devices for double door applications



Note: *All hardware shown above including exit devices, electric strikes, auto operators, power supplies, push buttons, etc. are sold separately.*

Storeroom/ Classroom	Lockset is normally secure with outside lever disengaged. Valid normal credential or key momentarily unlocks door. Valid toggle credential may be used to change to a passage or secured state. Interior push button on inside housing confirms state of the lock via LED indicator. A mechanical key will retract the latch. Inside lever always allows free egress.
Office	Lockset is normally secure with outside lever disengaged. Valid normal credential or key momentarily unlocks door. Valid toggle credential may be used to change to a passage or secured state. Interior push button on inside housing can be used to select a passage or secured state and confirms state of the lock via LED indicator. A mechanical key will retract the latch. Inside lever always allows free egress. Meets the need for lockdown function for safety and security.
Privacy	Lockset is normally secure with outside lever disengaged. Valid normal credential or key momentarily unlocks door. Valid toggle credential may be used to change to a passage or secured state. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior and confirms state of the lock via LED indicator. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. A mechanical key will always retract the latch. Inside lever always allows free egress. Door position sensor required for function.
Apartment	Lockset is normally secure with outside lever disengaged. Valid normal or toggle credential is used to change to a passage or secured state. Interior pushbutton on inside housing may be used to select a passage or secured state and confirms state of the lock via LED indicator. Opening the door or pressing the interior pushbutton a second time causes the lockset to toggle to passage. While in passage mode, the lockset can only be secured while the door is closed by pressing the interior pushbutton or using a normal credential on the exterior. A mechanical key will retract the latch. Inside lever always allows free egress. Door position sensor required for function.

70: Classroom/ Storeroom	Lockset is normally secure. Inside lever always allows free egress. Valid toggle credentials on the exterior may be used to change to a passage or secured status.		50: Office	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Meets need for lockdown function for safety and security. **NOTE:** *Valid toggle credentials on the exterior may also be used to change status. Has interior pushbutton (IPB).*		40: Privacy	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. Has interior pushbutton (IPB).		
60: Apartment	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Opening the door or pressing the interior pushbutton causes the lockset to toggle unsecured. While toggled unsecured, the lockset can only be secured while the door is closed by pressing the interior pushbutton or using a normal credential on the exterior. Normal electronic access from the exterior is always allowed. Has interior pushbutton.

Door Thickness

1-3/4"	1-3/4"
1-3/8"	1-3/8" to 2-3/4", Shims included (Specify in 1/8" increments)

Notes: *34. Door Thickness Kits are available on page 226 to install a lock on a door that is thicker or thinner than 1-3/4". See AD-Series Parts guide for details. Locks cannot be installed on doors thicker than 2-3/4" or thinner than 1-3/8".*

35. Thin Door Shims are available on page 226 to install a lock on a door that is thinner than 1-3/4".

36. Decorative Plates are used to cover exposed holes when retrofitting from existing locks to AD-Series locks. The size of plate required will vary based on the size and location of holes being covered. Retrofit information can be found at www.schlage.com/support.

37. If under the lock decorative plates are on both sides of device, then door will become 1/8" thicker. A Door Thickness Kit of an incremental 1/8" must be ordered to accommodate under the lock plates.

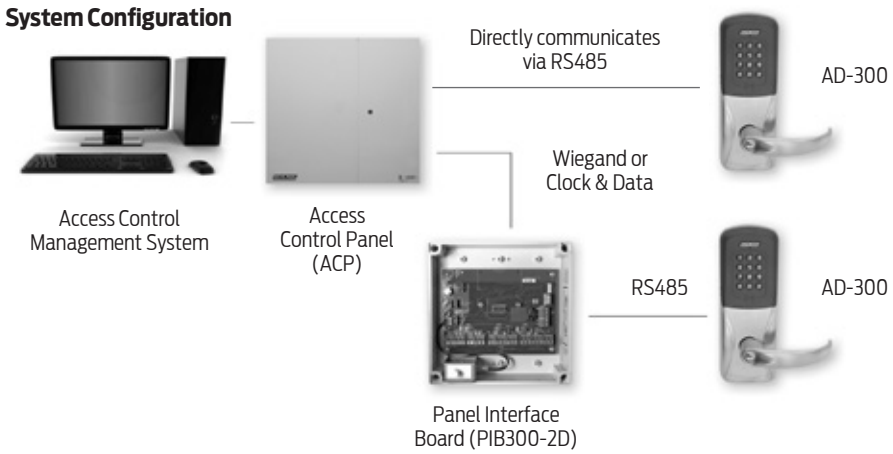
System Architecture for AD-300 & AD-400

The AD-Series combines all the hardware components required at the door for a complete access control system into one integrated design to simplify installation. This includes the electrified lock, credential reader, request-to-exit and -enter sensors, door position switch, tamper guard and more.

The AD-Series is available with flexible hardwired and wireless networked options and can accommodate Wiegand, Clock & Data or RS485 connections to the access control panel or reader interface board.

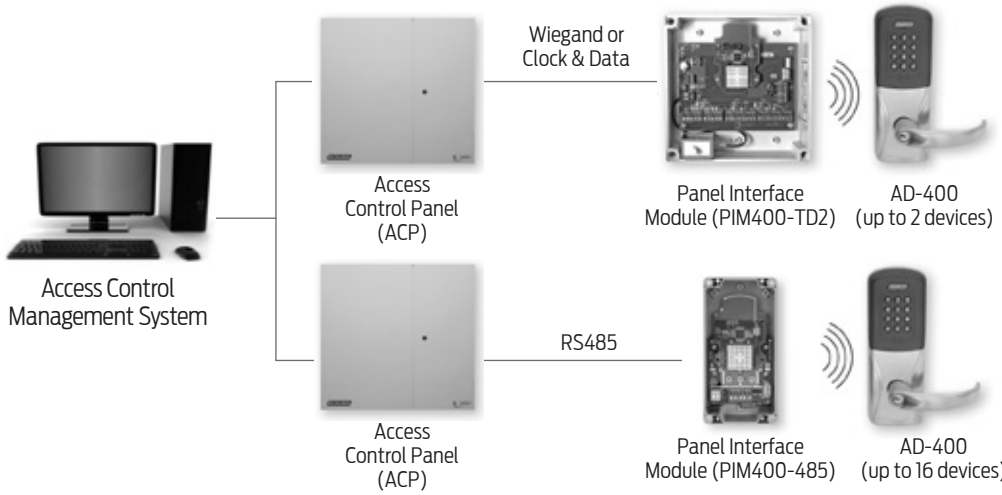
The following system configurations should be utilized as a guideline for specifying the AD-Series. Datasheets with technical specifications are available for download on www.schlage.com/support. We suggest that you consult with your Access Control Provider to verify the specific features, functions and capabilities of the AD-Series.

AD-300 Networked Hardwired Solution:



- Connections other than Wiegand or Clock & Data may incur an additional fee. Consult access control software provides for details.
- PIB300-2D required for Wiegand or Clock & Data connection; supports up to 2 AD-300 devices

AD-400 Networked Wireless Solution:



- Connections other than Wiegand or Clock & Data may incur an additional fee. Consult access control software provides for details.
- PIM400-TD2 required for Wiegand or Clock & Data connection; supports up to 2 AD-400 devices
- If RS485 connection to other ACP is required , contact software provider

System Architecture for AD-302 & AD-402

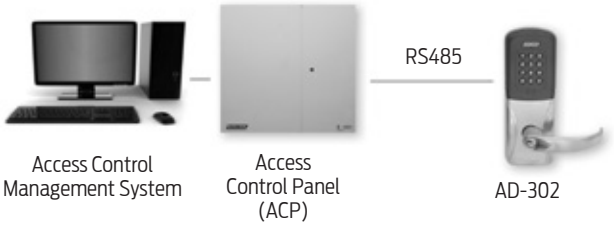
FIPS 201 Overview

- Federal Government Standard for secure and reliable form of identification
- Mandated by Homeland Security Presidential Directive 12 (HSPD 12)
- Required for all Federal Government employees and contractors
- Mandates the type of Smart Card and Card Reader per application
- The WPR401 (wireless portable reader) is available for remote credential verification

In order to meet requirements, the AD-Series can either be:
1.) Sold as a complete unit with the FMK Multi-Technology + Keypad Reader
2.) Field upgraded to a FIPS 201-2 compliant solution by adding the FMK reader (sold separately) and by utilizing the most current firmware available.

AD-302 Hardwired FIPS 201-2 compliant solution

– RS-485 or Wiegand communication to access control panel (ACP must be FIPS 201-2 compliant)
– FIPS 201-2 Multi-Technology Reader (FMK)



AD-402 Wireless FIPS 201-2 compliant solution

– 900 MHz communication between lock and PIM400-TD2
– FIPS Multi-Technology Reader (FMK)
– Connections other than Wiegand or Clock & Data may incur an additional fee. Consult access control software provider for details.
– f RS485 connection to ACP is required, contact software provider

Function

Function		AD-200/201	AD-250
70: Classroom/ Storeroom	Lockset is normally secure. Inside lever always allows free egress. Valid toggle credentials on the exterior may be used to change to a passage or secured status.		
50: Office	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Meets need for lockdown function for safety and security. **NOTE:** *Valid toggle credentials on the exterior may also be used to change status. Has interior pushbutton (IPB).*		
40: Privacy	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. Has interior pushbutton (IPB).		
60: Apartment	Lockset is normally secure. Inside lever always allows free egress. Interior-pushbutton on inside housing may be used to select a passage or secured status. Opening the door or pressing the interior pushbutton causes the lockset to toggle unsecured. While toggled unsecured, the lockset can only be secured while the door is closed by pressing the interior pushbutton or using a normal credential on the exterior. Normal electronic access from the exterior is always allowed. Has interior pushbutton.

Series

CO-Series standalone locks are the ideal solution for facilities that ant the convenience and efficiency of electronic access control without the complexity or cost of a networked system.

Class

CO-100	Standalone, keypad only, manually programmable only	
CO-200	Standalone, user access rights stored on the lock, manually or computer programmable	
CO-220	Standalone, classroom security, remote local lockdown	
CO-250	Standalone, user rights stored on magnetic stripe card, computer programmable only	

Chassis

CY: Cylindrical	Bored lock installed into a round hole in the door	
MS: Mortise	Lock case installed into a mortise rectangular "pocket" in the door	
MD: Mortise Deadbolt	Mortise lock with built-in interconnected auxiliary deadbolt	
993R: Exit Trim	Rim/Concealed Vertical Rod* (CVR) & Concealed Vertical Cable* (CVC) **Metal door only*	
993M: Exit Trim	Mortise	
993S: Exit Trim	Surface Vertical Rod (SVR)	
993DT: Exit Trim	Non-Functioning "Dummy" Exit Trim	

Note: *1. Exit trim is only available in 70 function on CO-200, CO-220, and CO-250 models.*
2. Exit trim utilizes universal hardware to simplify installation to a variety of exit device.

Function

		CO-100	CO-200/CO-250
70: Classroom/ Storeroom	Lockset is normally secure. Inside lever always allows free egress. Valid toggle credentials on the exterior may be used to change to a passage or secured status.		
50: Office	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a passage or secured status. Meets need for lockdown function for safety and security. **Note:** *Valid toggle credentials on the exterior may also be used to change status. Has interior pushbutton (IPB).*		40: Privacy	Lockset is normally secure. Inside lever always allows free egress. Interior pushbutton on inside housing may be used to select a privacy status. The interior pushbutton will disable normal electronic access from the exterior. Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status. Has interior pushbutton (IPB).		

		CO-220
75: Classroom Security	Operates like a standard classroom/storeroom (70) function. When remote fob is pressed to initiate immediate local lockdown, all normal credentials are rejected and only an authorized pass through credential will allow access. Inside lever always allows free egress.

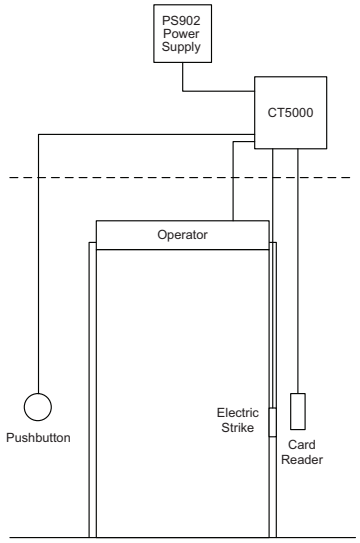
CT5000

The CT5000 is an indoor, offline single opening controller. It is flexible and works with various card reader technologies. With the correct power supply, the CT5000 controller works with various types of locking hardware, including electric strikes, electro-magnetic locks, or EL exit devices.

If networked functionality is required in the future, the CT5000 can be upgraded to a WRI-400 by upgrading the firmware and adding one incremental piece of hardware. This provides greater adaptability in the field.

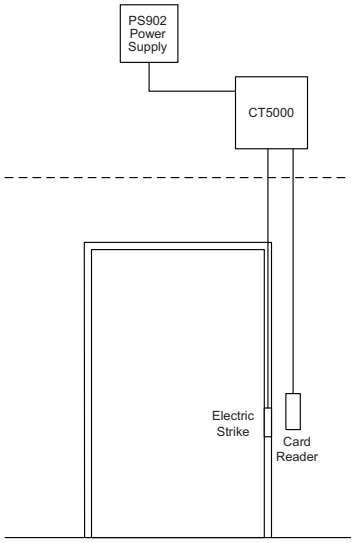
Perimeter Door Application

The CT5000 can be used for perimeter door applications with an automatic operator, electric strike and card reader



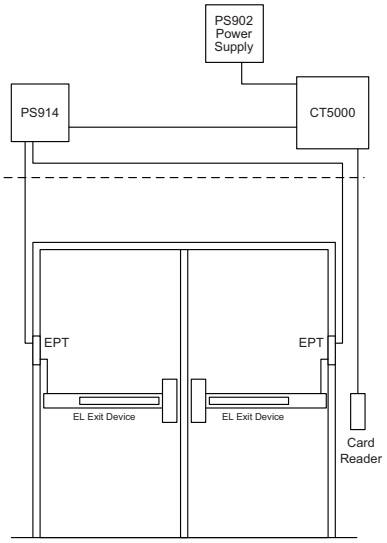
Narrow Stile Application

For narrow stile applications the CT5000 can be used with an electric strike and card reader



Panic Device Application

The CT5000 and a card reader along with the Von Duprin 914 Power Supply can control two EL exit devices for double door applications



Note: *All hardware shown above including exit devices, electric strikes, auto operators, power supplies, push buttons, etc. are sold separately.*

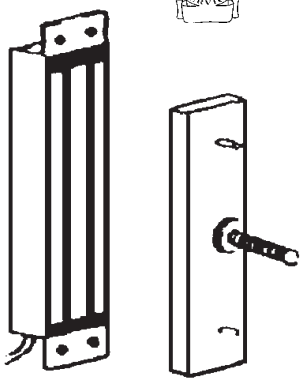
320M MiniLine Magnet Lock

with Limited Lifetime Warranty on Magnetic Coil Assembly

Standard Features

- Mortise mount for sliding doors
- Includes mounting tabs and armature mounting block
- Door status monitor and Magnetic Bond Sensor
- Adjustable relocking delay
- UL 10C listed; cUL
- CSFM California State Fire Marshal listed

Specifications	320M
Holding Force	400 lbs. @ 12 VDC; 550 lbs. @ 24 VDC
Input Voltage	12/24 VDC
Current Draw	.23A @ 12 VDC
(Dual Voltage Field Selectable)	.45A @ 24 VDC
Height	1-3/8"
Length	7"
Width	1-7/8"
Weight (Approximate)	6 lbs



Note: *For Wood Frames: Due to higher ambient operating temperatures, it is REQUIRED that the 12 VDC configuration be used.*

GF3000 Shear Lock Mortise Series

with Limited Lifetime Warranty on Magnetic Coil Assembly

Patent # 6,611,414

Standard Features

- Microprocessor controlled
- Built-in auto relocking switch (ARS)
- Jump 1/4" gap - no in-rush current (noticeable noise level when connecting)
- Automatic voltage selection 12 VDC or 24 VDC
- Cool temperature regulator
- Adjustable time delay: 2-30 sec. from face of magnet
- ANSI/BHMA 156.23
- UL 10C listed; cUL
- CSFM California State Fire Marshal listed

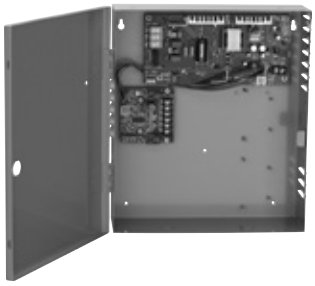
PS902 Power Supplies

2A @ 12/24 VDC – field selectable

Standard Features

- UL 294 Listed for Access Control
- Class2 rated power limited output
- Universal 120-240 VAC input
- Regulated and filtered DC outputs
- AC input and DC output LED indications
- Fire alarm relay and battery backup board attach to main board
- 1 Plug and play connector for optional distribution boards
- AC input status indication on outside cover
- AC status monitor
- 14" H x 12" W x 4" D enclosure



1. Select Power Supply

PS902	Base Power Supply (2A @ 12/24 VDC- field selectable) (approx. weight: 9 lbs) -PS902 is able to accept a total of one optional distribution board, plus one fire alarm relay along with one battery backup board and up to two 7A/hr batteries	**$297.00**

2. Select Optional Distribution Board with or without FA (Fire Alarm Relay)

1.	900-4R - 4 independently controlled relays	**$200.00**
1.	900-4R FA - 4 independently controlled relays with FA	**$274.00**
2.	900-2RS - 2 relay EL panic device control board	**$204.00**
2.	900-2RS FA - 2 relay output with FA	**$278.00**
3.	900-4RL - 4 relay board with integrated logic for controlling security interlocks, auto operators, and time delays	**$551.00**
3.	900-4RL FA - 4 relay board with integrated logic for controlling security interlocks, auto operators, and time delays with FA	**$625.00**
4.	900-8F - 8 fuse protected outputs	**$74.00**
4.	900-8F FA - 8 fuse protected outputs with FA	**$148.00**
5.	900-8P - 8 PTC protected outputs	**$74.00**
5.	900-8P FA - 8 PTC protected outputs with FA	**$148.00**

* Fire alarm relay requires option board installation. If PS906 with fire alarm input only is desired, order 900-8P FA

3. Select Other Power Supply Options

1.	900-BBK - Battery Backup Kit (includes two 7A/hr batteries)	**$288.00**
1.	900-BB - Battery Backup Board only (sold separately)	**$144.00**
1.	900-BAT - Backup Battery Pack Two (2) 7A/hr batteries (sold separately)	**$144.00**
2.	900-FA - Fire Alarm Relay (EIR) module is a plug-in relay to provide an interface with fire or other emergency overide systems *may be installed directly on main board, or may be used with optional distribution board	**$74.00**
3.	900-KL - Key Lock	**$46.00**
4.	BAA-BAA Compliant Product	**$46.00**

BAA compliant products must have the cover letter on page 303 included with the order. Failure to use this cover letter will result in the customer receiving non-BAA compliant product with no recourse for an RMA or refund. BAA compliant product requires a longer lead time, please contact customer service for details.

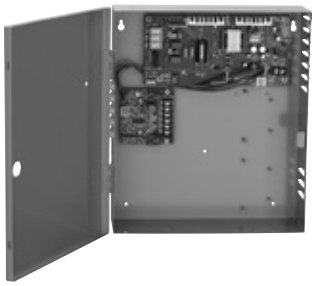
Note: *PS902 power supplies require connection to AC line voltage. Installation and all electrical connections (high and low voltage) should be performed by a qualified electrical contractor.*

PS904 Power Supplies

4A @ 12/24 VDC – field selectable

Standard Features

- UL 294 Listed for Access Control
- Class2 rated power limited output
- Universal 120-240 VAC input
- Regulated and filtered DC outputs
- AC input and DC output LED indications
- Battery backup board attaches to main board
- 2 Plug and play connectors for optional distribution boards
- AC input status indication on outside cover
- AC status monitor
- 14" H x 12" W x 4" D enclosure



1. Select Power Supply

PS904	Base Power Supply (4A @ 12/24 VDC- field selectable) (approx. weight: 11 lbs) PS904 is able to accept a total of two optional distribution boards, plus one battery backup board and up to two 7A/hr batteries	**$563.00**

2. Select Optional Distribution Board with or without FA (Fire Alarm Relay)

Patent Issued

672 TouchBar

The 672 TouchBar is a request-to-exit device used to release electromagnetic locks. Designed for easy installation, smooth operation and maximum durability.

Standard Features

- Pushpad with "PUSH TO EXIT" signage
- 1/4" Movement to activate switch
- Heavy-duty aluminum extrusion and powder coated zinc end caps
- Double pole, double throw switch
- UL 294 listed for access control system
- Universal mounting system for aluminum, hollow metal and wood doors (Includes self-drilling, self-tapping screws for aluminum or wood door application: RIV nuts for hollow metal door applications)
- Field reversible

Wiring Diagrams

A library of common wiring diagrams are available at no-charge for use in single and double door applications utilizing various configurations of Allegion door hardware products. These diagrams can be accessed through our Knowledge Center tool at http://kc.allegion.com/ . Click on *Common wiring diagrams* located under the column Top Solutions.

Custom Wiring Diagram Request

When common wiring diagrams do not meet the needs of the job requirements Allegion offers a service to purchase custom wiring diagrams. All custom wiring diagrams include a point-to-point with theory of operation and a riser diagram. Custom wiring diagrams fall into two categories; Standard and Complex:

- **Standard drawings**: All Allegion products with a single opening and a basic theory of operation. These drawings are quoted on a per drawing basis.
- **Complex drawings**: Generic contacts, 3rd party components, complex relay logic, timer circuit logic, any other additional advanced logic. These drawings must be processed through a quote process to determine the total NET cost of the request.

How does the Custom Wiring Diagram Request Process work?

- Custom wiring diagrams can only be ordered by and shipped to current Allegion Channel Partners
- Obtain a Wiring Diagram Request Form on page 317 or email a request to Wiring.Diagram.Request@allegion.com
- Email the completed request form to Wiring.Diagram.Request@allegion.com
- Be sure and include the following information to prevent delays to the request:
  - All supporting documentation for non-Allegion products
  - Hardware list with complete part numbers
  - Detailed Theory of operation for all openings
- Upon receipt the custom wiring coordinator will review and clarify the request as needed
- Once all clarifications are resolved a QUOTE#, NET pricing, and lead time will be assigned and communicated to the requestor within 1 business day
- Drawings that fall under a Standard type will be quoted a NET $250 for each drawing
- Drawings that fall under a Complex type will receive a NET quote depending on the time required to complete the drawings at an hourly rate of $250/hour
- A purchase order with the QUOTE# must be received for the wiring diagrams to be produced
  - Send the completed PO to Wiring.Diagram.Request@allegion.com
- Lead time is generally 2-3 weeks from time PO is received, more complex requests will have longer lead times
- Changes to the original request after a quote approval may incur additional charges and affect lead time
- QUOTE# is valid for 90 days
- Custom wiring diagrams, once completed, will be emailed to the requestor
