

## KM Series 3800 Handi-Access® Low Energy Automatic Operators for Barrier Free Accessibility

**AHS**  
ACCESS HARDWARE SUPPLY

Built on KM Systems electromechanical Series 3000 operator, the Series 3800 features a basic solid state control and modifications that provide control for interior and exterior doors at a cost comparable to lightweight operators intended for interior applications only. Easy manual opening makes this unit ideal for ALL traffic, providing safer and more accessible entrances for everyone. The device provides easy access for the handicapped and able bodied, and is rugged enough for any application. The Series 3800 meets requirements of ANSI A156.19 for Barrier Free Entry and The Americans With Disabilities Act of 1990.

### Features:

- Low energy automatic swing door operation
- Easy manual opening
- Adjustable time-delay closing to 130 seconds
- Accessory power supply 24vac
- Adjustable closing speed
- Available in out-swing or in-swing models
- Clear and dark bronze finishes/standard-optional finishes available
- Optional Push-to-Start module
- UL 325 and UL 228 Listed

Simplified installation with no structural changes to an existing opening makes the 3800 Handi-Access® the operator of choice.
