PRODUCT RELEASE

Access Hardware is Proud to Offer Allegion ENGAGE™ The technology that takes the cost and complexity out of access control

San Leandro, CA – Connecting people, openings, and access management has never been easier or more cost effective than with Allegion ENGAGE™ technology. This connectivity platform works in unison with new Schlage Wireless locks, which are designed to fit into a standard mechanical ND door prep, taking the complexity out of installation. Locks can be installed in minutes with a Phillips screwdriver, with no additional holes to drill or wires to run to the opening. Lever handing is even field-reversible in seconds.

In addition to quick and easy installation, ENGAGE technology is easy to manage and provides flexible solutions that fit any size business or budget, and can be scaled as one's needs change. Switching from mechanical to electronic access can be costly. However, because Schlage wireless and mechanical locks have identical door preps, they can easily be interchanged without having to replace the door or frame, allowing one to make the transition at a fraction of the cost of traditional wired solutions.

With ENGAGE technology, electronic credentials are easily issued on cards or smart phones and access privileges can be quickly assigned and revoked electronically by the office administrator. This reduces the need for service calls related to lockouts and rekeying.

ENGAGE web-based and mobile apps allow one to configure lock settings, add users and view audits and alerts from anywhere. Schlage wireless locks can also be managed via Schlage Express Cloud or software from Allegion's access control alliance partners. When connected to

an ENGAGE gateway, Schlage wireless locks can be updated manually, daily* over Wi-Fi or in real-time.

Be sure to be on the lookout for Allegion ENGAGE™ technology, which will be available in the first quarter of the new year.

*Daily updates will occur within 24 hours as scheduled by the host

About Access Hardware Supply

For over 25 years, Access Hardware Supply has been the premier distributor of locking hardware and security control products from leading manufacturers. It proudly provides its customers with outstanding service and support at all times. The staff is highly trained, courteous and has the technical knowledge needed to solve any application challenge that could potentially arise. Access Hardware is an authorized distributor known for an extensive inventory of quality products from top manufacturers that are kept in stock to ensure fast and accurate delivery. Service, Knowledge, Inventory...these are the “search terms” that bring up Access Hardware Supply.
