

Protect and Improve Performance of Access Control Devices with Securitron AccuPower™

ACCESS HARDWARE SUPPLY

The cleanest power supplies in town

Modern access control devices require power supplies that deliver steady, clean output and Securitron AccuPower™ Switching Power Supplies are just the ticket. Unlike “old school” power supplies that have interference issues that cause disruption and card misreads, AccuPower’s extensive filtering provides clean, accurate, low-noise and low voltage DC power to all access control devices.

AccuPower supports single and multi-door configurations as well as entire building systems, and is ideal for use with:

- Electrified locks
- Door closers
- Electric strikes
- Magnetic locks
- Card readers and more

Protect valuable access control hardware and reduce noise, misreads and customer complaints with Securitron AccuPower.

For more information, visit www.accesshardware.com or call **855.847.5691** to speak to an Access Hardware Supply pro. They have the knowledge and advice you need to complete any access control project, and the inventory to make it happen. Also check out Bill’s Blog at blog.accesshardware.com for cool product videos and more.
