

Deadlatch Paddle

4591

Hex Key
for Dogging

4580
Cam Plug

▼ Monitor Switch Options

4591M

Paddle without latch drive mechanism but with switch that can be wired to make or break a low voltage circuit.

4591MA

91-0914 Monitor Switch Kit

Adds monitor switch function to any 4591.

▼ Paddle

Extruded aluminum, 628 Clear Anodized finish (US28). 313 Dark Bronze Anodized and 335 Black Anodized also available. US3 Bright Brass, US26 Bright Chrome or US26D Satin Chrome plating also available.

▼ Function

An alternative to knob or lever handles. Makes opening a latched door as natural as opening an unlatched one - just push or pull in the direction the door swings. Available for any Adams Rite Series 4500/4900 deadlatch or MS+1890 lock/latch.

▼ Paddle Dogging ("Push" versions only)

Turning hex key in escutcheon holds the paddle down, leaving door free-swinging. Dogging key provided.

▼ Cam Plug

Furnished for use with Series 4500/4900 latches. (Not used with MS+1890 lock/latch.) Secured in latch body by cylinder setscrew, plug is also rigidly tied to escutcheon by hardened steel pins.

▼ Escutcheon

Zinc alloy with Black Ritecoat finish. Houses steel operating mechanism. Secured to door stile with special binder posts that extend into the escutcheon to rigidly resist torque loads in any direction.

▼ Operation

Available in four modes: Push to left, Push to right, Pull to left and Pull to right. Can be reconfigured to any mode in the field. Dogging not to be installed in pull configuration.
