

## BHMA TYPE 3

### Mortise Exit Device

For Wood & Hollow Steel Doors

**3300 Series**   
FIRE-RATED

**8300 Series**  
LIFE-SAFETY

### Features:

- ▼ Heavy duty deadlatching mechanism
- ▼ Pushbar clad or anodized, not plated, in a variety of finishes
- ▼ Easy to install
- ▼ Clean, unobtrusive design
- ▼ Strong, durable construction for a high level of security

#### CERTIFICATIONS:

##### 8300 SERIES:

-  Life-Safety Listing
- ANSI/BHMA A156.3 Grade 1
- California State Fire Marshall
- New York City MEA\*

\*Consult factory for specific number

##### 3300 SERIES:

-  10C 3-Hour Fire Label
- California State Fire Marshall
- New York City MEA\*
- Warnock/Hersey Listing for Fire Doors up to 10 Feet.

# Features & Dimensions

## Mortise Exit Device

### ANSI/BHMA

Grade 1

### Handing

Specify handing and bevel if applicable. Lever Entry Trim is field reversible.

### Pushbar Length

Standard Sizes: Dimensioned for 30", 36", 42" & 48" openings. Standard width bars can be field cut to the next smallest opening width.

### Door Thickness

Suits 1-3/4" standard. Can be modified for thicker doors.

### Stile Width

3300/8300 - Minimum 5"\*

\*Door construction may require additional stile width to meet fire ratings and provide adequate strength.

### Projection

2-5/8" when fully projected, 1-5/8" when dogged.

### Materials

Pushbar made of extruded aluminum, clad or anodized in a variety of finishes.

### Dogging

Standard dogging with hex key or cylinder dogging for 8300 Series only. Electric dogging also available for 3300 and 8300 Series.

### Fasteners

Standard self-tapping screws. Optional Sex Bolt Kits-26-0584 (2 required per device) Specify finish.

### Strikes

Made of stainless steel. Supplied with exit device. See strike options below.

### Cylinders (order separately)

Cylinder x Fixed Pull:  
(Function 03)

Accepts any standard Mortise cylinder. Entry Lever or Thumbturn:  
(Functions 08, 09, 11, 12)

Accepts any standard diameter Mortise cylinder with MS® cam. Accommodates cylinder lengths from 1" to 1-1/4".

### Warranty

Five year limited.

### AVAILABLE FINISHES

- 313** Dark Bronze Anodized
- 335** Black Anodized
- 628** Clear Anodized
- US3** Bright Brass
- US4** Satin Brass
- US9** Bright Bronze
- US10** Satin Bronze
- 10B** Dark Bronze (Trim only)
- US32** Bright Stainless
- US32D** Satin Stainless

*Consult factory for special finishes.*

### 3300 Fire-Rated/8300 Life-Safety

Heavy-duty deadlatch fits ANSI A115.1 standard door and jamb prep. 2-3/4" backset.

### Pushbar Dimensions

### Fire Rating:

MODEL	TYPE	RATING	DOOR CONSTR.	MAX. SIZE SINGLE DOORS	MAX. SIZE PAIRS, DBL. EGRESS
3300	Single Point Mortise	3 Hr.	Hollow Metal or Wood	4'0" x 10'0"	8'0" x 8'0"*

\* May be used with Model 3100 or 3600 with an open back strike.

### Strikes

A variety of strikes are available for different conditions and applications.

Standard Strike  
8360-01

Extended Lip  
8360-xx

Open Back  
4009-01

# Options & Accessories

## Mortise Exit Device

Order by adding suffix to Exit Device in place of hyphen or by separate model number.

### MONITOR/SIGNAL SWITCH

For all Adams Rite Exit Devices

- M1 - Single Switch**
- M2 - Dual Switch**

A switch in the exit device pushbar mounted on the hinge end. Switch can be used to activate signal light, horn, monitor or other devices. Most common application is to release maglock when pushbar is depressed. Switch can be wired for normally open or normally closed depending upon application. Can be retrofit in field to existing exit device. Dual switch version offers redundancy as required by some building codes or the option of operating a second signaling device.

Specify by adding "M1" or "M2" after exit device model number.

Monitor Kits for upgrading any 3000 or 8000 Series device:  
91-0897-01 - Single Switch      91-0897-02 - Dual Switch

### ELECTRIC LATCH RETRACTION

The LR option uses a solenoid mounted in pushbar for instantaneous unlocking and locking of the exit device from a remote location or access control device. Because electrical operation of device is fail-secure, this option can be used on fire-rated as well as life-safety applications. In the event of a power failure device automatically relatches. Requires the use of PS-LR Power Supply, which will power two exit devices. (Using an alternate to the PS-LR Power Supply will void warranty).

Specify by adding "LR" after exit device model number. Order PS-LR Power Supply separately. Order Battery Backup Kit separately (BBK-LR).

#### Solenoid Specifications:

16 Amps Inrush/.5 Amps Hold  
Solenoids are rated for both intermittent and continuous operation.  
Also see 4612 Power Transfer.

### MONITORED DUMMY PUSHBAR

- 8099M1 - Single Switch**
- 8099M2 - Dual Switch**
- 8099-00 - Dummy Only**

Dummy pushbar with no latch mechanism but with either a single or dual monitor/signal switch. Most common application is in conjunction with a maglock where bar is used to turn off magnet and allow exit from building. Dual switch version allows redundancy where required by code or the operation of a signal device along with maglock. Specify door type and width when ordering. Available in all exit device finishes.

The 8099-00 is also available as a non-operating dummy for doors not requiring an exit device, but where matching trim is desired. Specify door type, opening width and finish to be matched.

### ALARMED EXIT DEVICE

For all Adams Rite Exit Devices

This option emits a loud alarm to notify management of unauthorized exit. Will not alter the Life-Safety characteristics of the exit device in any way. Control of the alarm is by use of a key in any standard Mortise cylinder with MS® cam to arm, disarm, delay or reset the alarm. Red letters on the bar give a "hands off" warning to deter accidental actuation.

#### Battery Operated Alarm

Four AA alkaline batteries power a horn to create a piercing 95 decibel noise for two minutes (or until disarmed) when pushbar is depressed. Beeps to signal need for new batteries.

#### Hardwired Alarm

Can be connected to external horn for louder or remote signal. Remote monitor LED light can also be wired in, as can a door position proximity switch. Also accommodates an external delay switch, such as an outside key switch or pad, to allow authorized entry. Uses rechargeable nicad batteries connected to 12-24 Volt AC or DC source. Each bar has its own battery backup system.

Minimum opening width: 36"

### CYLINDER DOGGING

For all non-fire rated Adams Rite Exit Devices

For management control of dogging. Any standard 15/16" to 1-1/8" long Mortise cylinder with MS® cam can be used in a pushbar prepared at factory with Cylinder Dogging kit. Cannot be used with Alarm, EL or LR options.

Specify by adding "C" after exit device model number.

### ELECTRIC DOGGING

For all Adams Rite Exit Devices

The "ED" option uses a holding magnet to keep the pushbar depressed (set manually) and the latch retracted. This gives a lower profile exit device, resulting in less damage and quieter operation. All "ED" devices include an internal microswitch that signals when the bar is held in the depressed position, ideal for automatic door operators. On fire-rated devices, it must be wired through the fire alarm system. All devices operate at 24VDC, drawing .6 amp, allowing them to operate with a simple transformer and rectifier.

Note: Not to be used as access control element. Specify "LR" with access control devices such as card reader or keypads.

Specify by adding "ED" after exit device model number (ex. 8611ED36).
