

## Strikes

### 4800 Series, MS4804

4801-01  
with Shim

MS4804

#### 4800 Series

##### ▼ Function

With vertical adjustment to accommodate door/jamb misalignment and a shim system for horizontal positioning to match various jamb bumper designs, 4800 Series strikes can be fit to nearly any sliding door using a mortised MS1847 Series lock or latch. 4801 strikes are furnished with sheet metal screws for metal jamb installation. 4802 strikes are furnished with machine screws and tee nuts which are installed on the back side of jamb to provide the strongest possible anchorage in wood.

##### ▼ Material

Steel, heat treated. Shims are ABS plastic. Zinc (603) finish. For other finishes contact factory.

#### MS 4804

##### ▼ Function

Provides a strike equal to the strength of the stainless steel bolt of the MS1847 Deadlock: tested to 1,000 lbs. of force. This strength exceeds by far the standards of the Architectural Aluminum Manufacturers Association as well as the strictest current municipal security ordinance.

##### ▼ Faceplate

1/16" x 3/4" x 3-3/8". Steel, plated for corrosion resistance. MS4804-10 available in Stainless Steel.

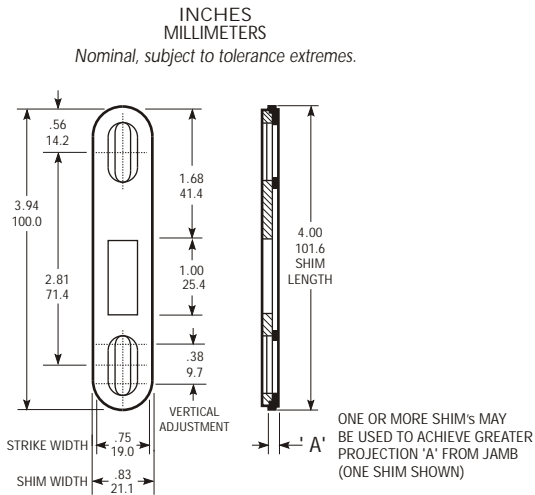

##### ▼ Reinforcing Plate

1/16" x 1/2" x 3-3/8". Steel, plated for corrosion resistance. Tapped for furnished #10-32 flathead screws.
