

SCHLAGE MORTISE LOCK - ELECTRIFIED BY COMMAND ACCESS

Common Applications Include:

- Stairwell Doors
- Lobby Entrance Doors
- Classrooms
- Computer Rooms
- Exterior Doors
- Any room requiring access control and life safety

Application:

This Schlage Mortise lock electrified by Command Access allows access and egress control for heavy use applications where security and access control are critical. The lock maintains the appearance of the non-electrified Schlage "L" series mortise locks but can be remotely electrically unlocked (EU) or locked (EL).

The lock receives its power from wiring that passes through a 3/8" hole (wire chase) that runs from the mortise pocket to one of the hinge cut-outs. The power is then passed from the hinge cutout to the wall with one of our ETH series hinges.

MODELS:

- ML70EU/EL – Electrified Classroom function
- ML80EU/EL – Electrified Storeroom function
- ML82EU/EL – Electrified Institution function
- ML53EU/EL – Electrified Entrance function

FEATURES:

- UL Listing – 58LK – Electrically Controlled Single Point Lock
- Field changeable Fail Safe/Fail Secure and maintains Schlage's "field handing" feature.
- Continuous duty solenoid design for fail safe or unlock cycle applications
- Voltage limiting circuitry for cooler solenoid operation and longer life
- 12V and 24V models available
- Current Draw: 12V-250mA
24V-150mA
- Plug-ivan rectifier for AC or DC operation
- Request-to-exit and door position monitoring available
- Zinc plated parts to match factory original parts
- 03, 06, 17 lever trim w/ A, B & L rose/escutcheon in stock
- 3 year warranty
