The PS1 and the PS1-2 are a heavy-duty low cost solution for powering electrically latch-retracting exit devices. The PS1 offers a single heavy duty 20 amp relay while the PS1-2 includes a pair of these 20 amp relays. These power supplies offer raw, unregulated DC current which is ideal for the extreme inrush requirement of most solenoid-driven electric latch-retracting exit devices. The power supply is housed in a sturdy yet compact metal enclosure.

Wire Size Chart

Specifications:

- 110VAC input voltage
- 2.3A continuous @ 24VAC (56VA transformer) output current
- Onboard surge supply to provide 16A in-rush current for 300ms.
- Heavy duty 20A relay (PS1-2 includes 20A relay x 2)
- Dimensions: 7" x 8" x 3.5"
