Integrated Movement Exit Delay with Advanced Technology (iMXDa)

NEW SIZE... *only 12.5" long and loaded with new features*

Application - *iMXDa helps prevent peril to persons/patients and property loss/theft for businesses. Applications include dementia wards, hospitals, dormitories, airports, child care facilities and retail or warehouse environments. Installation requires no alteration or replacement of existing fire-rated or non-fire-rated latching hardware. False triggering is eliminated by up to 1" of authorized door movement.*

Features and Benefits

- 1,200 lbs. holding force Magnalock®
