

High Performance Pneumatic Push Buttons for Access Control Applications.

Pushplate Series

The **HIGHPOWER 100/110/120/200** series of heavy duty controls is designed for rugged applications. The series features a stainless steel back plate and anodized aluminum front plate that actuates a precision pneumatic time delay switch. Durability and Long Life are built in to this product since the travel of the front plate rather than the switch stop, limits the range of actuation.

- Single-Gang Electrical Box Mounting or Narrow Style Mounting for Aluminum Frames.
- Ultra-rugged construction for long life. Made In U.S.A.
- Tamper Resistant Mounting Screws.
- Form Z and C Switch configurations.
- 5 Amps @ 125 VAC.
- Quick free custom laser or milled engraving available. Consult factory.
- Pneumatic timer models are Listed UL508/CSA C22.2 No 14-10 Met labs file # E113051
