

Pushplate 100 PNZ

Rugged Design with the Reliable Highpower Pneumatic Timer

The **HIGHPOWER PUSHPLATE 100** series of heavy duty controls is designed for rugged applications. This series features a stainless steel back plate and anodized aluminum front plate that actuates a microswitch. Durability and Long Life are built in to this product since the travel of the front plate rather than the switch stop, limits the range of actuation. This insures maximum switch life and reliable service in the most demanding environments.

Contact Ratings: 5 Amps @ 12 VDC / 120 VAC

**Features: Free Custom Engraving, Standard Single Gang Box Mount,
Tamper Resistant Mounting Screws, 1 Year Warranty**
