| Brand/product | Schlage L-Series Mortise Lock |
| Date | October 2014 |
| Subject | New mortise indicators / changes to existing indicator functions |
| Contact | Kenny Abell (Kenny.Abell@Allegion.Com) |

Schlage is pleased to announce an all-new series of indicators for the L-Series mortise lock. The new indicators provide unparalleled features and flexibility for any application where indicators are required, from classroom security to restrooms and all doors in between.

Specifically, the new indicators offer the following features:

- 2" x ½" message window
- 180° visibility
- Messaging window above the cylinder for visibility during emergency lockdown
- High-contrast red/white and white/black messaging for improved visibility by the color-vision impaired

Application flexibility is enhanced with the indicators now being available on 28 different functions. Furthermore, the indicator is available for both the inside or outside trim (provided that side of the trim has a cylinder, thumb turn, coin turn, or emergency turn). The new indicator design is available for sectional and N escutcheon only

Sectional trim

N escutcheon trim

Ordering on new locks is extremely easy – simply specify the option number listed below that corresponds to the desired message and desired placement on the door (inside or outside).

| | | | | |
|-------------------|--|--|----------------|---|
| |  LOCKED |  OCCUPIED | DO NOT DISTURB |  |
| |  UNLOCKED |  VACANT | |  |
| Inside Indicator | L283-711 | L283-712 | L283-713 | L283-714 |
| Outside Indicator | L283-721 | L283-722 | L283-723 | L283-724 |

List price. The indicator is a \$90 adder to the list price of the lock (same for escutcheon or sectional trim)

Availability. N escutcheon indicators are currently available for cylinder, thumbturn, coin turn, and privacy pin trim types. Sectional indicators are currently available for cylinder trim only; remaining trim types (thumbturn, cointurn, privacy) will be available early 2015.

Changes to existing offering. Locks utilizing the current indicator (L496, L9486, L9496) will be discontinued at the end of the 2014. Identical functionality with the new indicator design can be ordered as follows:

| | |
|-------------------|--------------------|
| L496P | -> L460P L283-722 |
| L9486P | -> L9485P L283-723 |
| L9486P x L583-375 | -> L9485P L283-722 |
| L9496P | -> L9456P L283-722 |

Effective immediately, L escutcheon indicators are no longer available and are replaced by the new N escutcheon indicators.
