

Everest 29™

Patented key systems

Overview

Introducing a whole new look for high-security key systems. With a new undercut design and patent protection until 2029, the all-new Everest 29 key system delivers unparalleled security that can't be duplicated. Available in full size and SFIC cylinder formats, Everest 29 is backward compatible with current Everest B, C and D keyways, making migration of an existing key system less complex.

Schlage has reinvented high security key systems

In settings like schools, hospitals and universities, key systems are the foundation of a comprehensive, multi-level security management system. Everest 29™ delivers a higher level of security because it cannot be duplicated without authorization. Its distinctive design is based on creating a key like no other.

Proven strength

shear-strength tested to perform with the same toughness and reliability the Everest family is known for.

Distinctive bow

a larger, rounded key bow creates quick visual differentiation between Everest and Everest 29.

Everest 29 through-cut technology

utilizes a unique process to create the patented Everest 29 undercut design.

Patent protection until 2029

thanks to a new undercut design that provides patent protection for Everest 29 keys until 2029.

Backward compatibility makes it simple to migrate your key system to Everest 29

EVEREST

EVEREST 29

- SFIC
- Restricted distribution by required authorization letters

- Full size; open keyway
- Restricted by channel only to commercial sales
- Primus and Primus XP

- Full size
- Restricted distribution by required authorization letters
- Primus and Primus XP
