

TAKE CONTROL IN THE FIGHT AGAINST BACK DOOR BREAK-INS.

ARM-A-DOR® SERIES

Arm-A-Dor® provides a comprehensive measure of integrated safe egress and security.

Protecting the rear entry of your retail, restaurant, or hospitality environments is vital due to possible forced entry attacks and increased internal shrinkage from employees. With so much depending on the security of a building's rear exit, business owners simply cannot afford to install a standard exit device, alarm, and deadbolt to the rear entry of the door. The PRECISION Arm-A-Dor® Series is an enhanced alarmed door exit device that provides superior safety and security for its users. The Arm-A-Dor® series is a durable, pre-assembled, all-in-one exit device solution that not only protects a facility's most important assets, but strengthens your door system.

Installed by many of the nation's largest retailers, the PRECISION Arm-A-Dor® series is a leader in alarmed door exit devices. Take control with an investment in Arm-A-Dor® — the security of your business depends on it.

SOFTWARE

INTRUSION

IDENTITY

TRACKING

Mechanical locks, hardware and patented key systems. The foundation of a complete security strategy.

Thu-Bolt Mounting

Four point thru-bolt mounting allows for more secure construction from forced entry.

Durable

Weather and water resistant.

Frame Latch Engagement

Two point solid steel deadbolt latching feature resists intruders from forced entry.

Frame Latch Engagement

Integrated Alarm

Unauthorized exit triggers an audible signal when push-bar is activated.

Push-bar Operation

Wide push-bar surface facilitating code compliant emergency egress.

Visual Friendly Signage

Easy to read emergency egress signage.

The PRECISION Arm-A-Dor® series provides maximum security from forced entry attacks, alarmed egress to prevent internal shrinkage, and enhanced durability for the most demanding environments.

- **Vandal Resistant** – Unlike a traditional exit device with a latch and strike, the Arm-A-Dor series® has a locking bar that extends onto the door frame upon closing, which resists intruders from forced entry.
- **Reduced Shrinkage** – The all-in-one panic device comes equipped with built-in door alarm to prevent internal shrinkage.
- **Increased Security** – Compatible with delayed egress systems which reduces loss prevention by keeping the door from opening for up to 15 seconds.
- **Simple to Use** – Wide push bar design enhances the user’s experience during egress.
- **Durable** - With constant use and abuse, the Arm-A-Dor® series weather resistant alarm complies to UL305.
- **Easy to Install** – Pre-assembled for standard 3’ and 4’ doors, simply drill four holes in the door and mount the device – it’s that easy.
- **Increased Safety** - Fire and life safety code compliant.

PRECISION Performs.

Since 1946, Precision Hardware has been the leader in providing panic and fire exit devices for commercial buildings. As part of the STANLEY family, PRECISION continues to offer innovative and well-designed door hardware that helps protect buildings, people and property.
