

Patient room doors

Healthcare solutions

Patient room doors provide privacy and safety for a patient during a hospital stay. They must also be easily accessible for hospital staff as they carry medical supplies, push gurneys or carts, or quickly move across the room.

Traditional knobs and levers can make it difficult to open the door. Even more, many aren't designed for the healthcare environment, which is more susceptible to the spread of bacteria and germs that can cause infections.

Operational requirements:

- Easy passage of wheelchairs, gurneys or other equipment
- Easy to open when staff member's hands are not free
- Bacteria-resistant to prevent spread of germs that contribute to hospital-acquired infections
- Free access and egress at all times

Standard features

Building and safety codes may vary, but most hospital patient room doors include these standard features:

- 1 Glynn-Johnson push/pull hospital lock with antimicrobial finish
- 2 Glynn-Johnson overhead stop
- 3 Ives 5-knuckle swing clear heavyweight hinges
- 4 Hollow metal frame
- 5 Ives door silencers

Innovative solutions for patient room doors

Glynn-Johnson® push/pull locks

- Easy to use and can be operated by a hip or elbow when hands are not available
- Mortise and cylindrical options available in a variety of finishes, configurations and functions
- ADA-compliant

Ives® swing clear hinges

- Provides extra clearance, making it easier for staff to maneuver bulky and heavy equipment
- Available in five knuckle and continuous hinge styles for standard and heavy weight doors

Antimicrobial coating

- Silver-ion based finish available on a wide variety of hardware, including levers, locks, exit devices, pull handles and more
- Effective against bacteria, mold, fungus, mildew and algae
- Offers an extra level of protection to current infection control practices

Note: These security solutions are designed only as a guide and do not take into consideration local codes and regulations that may be in place. Please contact your local Allegion representative to design a specification to meet your unique needs.
