

3094 Series

Stop Mounted Coordinator

The **3094 Stop Mounted Door Coordinators** are designed to give extremely high-end reliability, low friction and low-noise performance at a moderate price. Fully automatic, the 3094 Stop-Mounted Coordinators are used to sequence pairs of doors where one leaf must close before the other. Featuring black nylon-coated triggers and rollers stops, two “quiet” rollers, and internal rubber shock absorbers, the 3094 Series requires less closing force and greatly reduces noises to the lowest levels possible. Engineered for use with equal or unequal pairs of doors and with an adjustable override feature to prevent damage to the doors, coordinator, frame and hinges in the event the active leaf is forced to close, Trimco’s 3094 Series is the most flexible and durable coordinator on the market.

APPLICATIONS

- Hospitality
- Multifamily & Mixed-Use
- Office Buildings
- Commercial & Industrial Buildings
- Schools

DOOR, WALL & FRAME PROTECTION

PRODUCT FEATURES

- Requires low closing force.
- Engineered to greatly reduce operating noise levels.
- Adjustable over-ride prevents “racking hinges” or damage to door, coordinator or frame.
- Cannot crush housing tube and prevent from operating.
- Paintable matte black color.
- Furnished complete with oversized filler bar.
- For equal pairs of doors. Special applications and unequal pairs of doors use 3094D.
