PRODUCT SPECIFICATIONS: Complete product specifications in the form of datasheets, installation instructions, and 3 part specs are available for download on all product pages in the SDC website: **www.sdcsecurity.com**.

For the most current pricing, always download specific product pricesheets available on all product pages in the SDC website: **www.sdcsecurity.com**

LIMITED WARRANTY

Security Door Controls (SDC) warrants that all new products sold by us are free from defects in material and workmanship, and fit for the purpose intended by SDC when properly installed in accordance with the appropriate factory instructions and template for a period, from the date of shipment as follows:

Lifetime: EMLock® electromagnetic locks and ExitCheck® delayed egress electromagnetic locks – excluding ExitCheck® delayed egress PC board assemblies purchased after December 31, 2005 – are warranted for the life of the product.

1 Year: 1575 / 1576 electromagnetic gate locks

3 Years: Auto EntryControl™ low energy swing door operators

5 Years: All other SDC products, including ExitCheck® electronic PC board assemblies are warranted for 5 years.

The extent of our liability for breach of warranty – when such is shown to our satisfaction – shall be limited to a functionally equivalent replacement, repair of such product, or part thereof, at SDC's sole discretion. Product shall be returned to SDC with freight prepaid. We shall not, except to the extent this limitation may be precluded by law, be liable for inconvenience, labor costs, lost profit, damages to other property, injury or any other consequential or punitive damages resulting directly or indirectly from any product defect or breach of this warranty.

This warranty is limited to the original purchaser, is not transferable and shall not apply to changes of oil rubbed bronze (613/US10B) finish (which is a living finish designed to change appearance through daily use), lamps, LED's, maintenance, wear and tear caused by normal use, altered product, abuse or negligence.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ALL OTHER WARRANTIES OF FITNESS AND MERCHANTABILITY.

CUSTOM SYSTEM DESIGN

Security, life safety and access control consumers demand the best planning, products and operation. Let SDC provide a complete product package. Our engineers will prepare a custom engineered design package, detailed to your needs, whether you have one entrance or a complex multi-entrance system.

Every professional in the field knows all too well the usual problems. When wiring specs and wiring diagrams don't match up, or components are incomplete or missing, projects slow down and costs start escalating.

Let SDC assist you with a complete system design plan which will eliminate problems with component compatibility, system operation or wiring installation. We will provide specifics for your particular job including electrical drafts, instructions and data. This offers a great advantage which

allows you to save time with a faster, easier, better-quality job than the competition.

SDC will provide the job name, supplier, reference and drawing numbers for easy reference when technical support is needed, a detailed system operation outline, a full list of components with individual instructions for each, conduit layout indicating quantity and gauge of wires, as well as point-to-point wire diagrams of all component connections.

All necessary data is a matter of record. Whatever your job requires from equipment to technical understanding and assistance – at the office or in the field – will be detailed in your SDC system design plan.

*SDC fees vary according to requirements.

ENGINEERING POLICY

Engineering services are available for special system design and documentation.

All requests must be submitted in writing, preferably via e-mail, with all requirements detailed before final quotation will be provided. Any alterations or omissions must also be submitted in writing and may be subject to additional costs.

SDC assumes no responsibility for information exchanged via phone conversations regarding estimates or product suitability.

A non-cancellable purchase order for engineering services is required before work will begin.

Security Dealers, Integrators, Installers & Distributors

300+ SDC products are available for shipment within 3 - 5 business days. Keep your copy of the shipQUICK inventory readily available so you know firsthand which products your SDC distributor can expedite for you.

www.sdcsecurity.com/shipquick

SALES POLICY

TERMS: A minimum purchase of \$5,000.00 annually is required to maintain an open account with Security Door Controls.

RETURNED GOODS: Any defects or errors for which SDC is responsible will be rectified. Approval for return of merchandise must be requested and, once approved, the return material authorization number (RMA #) must be displayed on all packages returned to SDC. Material found suitable for resale without reconditioning will be credited to customer's account as a product credit only (no cash refunds), less a handling and restocking fee equal to 35% of the net material value. Further charges may be assessed if material requires reconditioning to return it to a saleable condition. *Obsolete products will not be accepted for return.*

Custom products, such as non-standard finishes, sizes and options or pre-assembly configurations are considered special build items and are not returnable for credit. Customer is responsible for freight charges to return product to SDC. Where applicable, credits for returned material will have 2% deducted to cover the cash discount allowance on the original invoice. *Products that have been installed may not be returned for credit.*

PAYMENT TERMS: 2% - ten (10) days, net thirty (30) days from date of invoice. Interest at 1½% per month will be charged on unpaid balances beyond thirty (30) days.

It is understood that customers may use their own purchase order format when placing orders. However, any such forms shall be used for customer convenience only. Any terms or provisions which may be contained therein, which are inconsistent with, or in addition to, those contained in SDC's current sales order acknowledgment form or any other terms and/or provisions contained therein shall have no force or effect whatsoever.

Custom material or wiring diagrams require a 50% deposit. At SDC's discretion, orders in excess of \$1,500 net will be acknowledged by product category and department. They will ship on a "when ready" basis unless customer purchase order specifically states a "Do not ship before" date, and/or "No partial shipments."

CREDIT HOLDS: Orders received from customers with past due balances of 60+ days will not be entered and will be held until account is current.

PRICES: Prices are subject to change without notice. No prices are guaranteed. All shipments will be made at prices prevailing at time of shipment. Errors or omissions in pricing are subject to correction.

PRICING POLICY: Shipments must be accepted within sixty (60) days after receipt of the order. Contracts extending beyond this period are subject to prices in effect at the time of shipment.

MINIMUM ORDER: SDC has a minimum net order policy of \$250 for domestic orders and \$1,500 for international orders before applicable taxes and shipping fees.

ACCEPTANCE: SDC reserves the right to decline an order, in whole or in part, when the price, quantity or assortment of goods is not satisfactory to SDC.

FREIGHT: All goods are invoiced EXW (EXWorks) SECURITY DOOR CONTROLS. When delivered to the transportation company the shipments become the property of the purchaser, who assumes the risk of loss or damage in transit. All ground shipments will be made by United Parcel Service (UPS), unless otherwise instructed by customer.

BACK CHARGES: SDC is not responsible for, does not authorize, and will not accept any charges for the cost of any labor or material incurred by anyone other than Security Door Controls for any installation, repair, service or replacement unless agreed upon with prior written consent.

PRODUCT CHANGES: SDC reserves the right to modify, change or discontinue any components at its sole discretion.

SHORTAGES/ DISCREPANCIES: Claims must be made within ten (10) days after receipt of material. (The original invoice number will be required)

TEMPLATES: It shall be the customer's responsibility to check all templates requested from SDC for suitability for proper door and frame preparation. Direct requests from the door and frame supplier will not release this customer of this responsibility.

ARBITRATION AND GOVERNING LAW: In the event of a dispute or controversy, or differences which may arise between parties, shall be settled by arbitration. The arbitration shall take place in California under the rules of the American Arbitration Association. The validity, interpretation, and performance of this agreement shall be controlled by and construed under the laws of the state of California, United States of America.

MINIMUM ADVERTISED PRICE POLICY (MAP): All products listed in this price book are considered "covered products" offered by SDC for resale in the United States of America. The MAP applied to these covered products shall be 50% off the list price identified for each complete product contained within this price book.

NOTE: SDC complete sales policy as stated in our Price Reference Guide prevails at all times.

Some products in this price book are protected by one or more of the following U.S. Patents. Foreign Patents are not shown: 7,540,542; 7,614,669; 7,698,918; 7,246,827; 7,963,574; 8,851,530; 9,797,165; 8,851,532; 10,697,532

DoorSnap

Security Door Controls Retrofits Made Easy!

Use the **Free SDC App** to send a picture with your contact information. SDC will recommend a **cost effective solution with product information links** to retrofit the opening for access control locking hardware.

COMPLETE COMPONENT CONSIDERATIONS

With a robust toolbox of over 35,000 SDC access & egress control components at your fingertips, you can assemble turnkey solutions to address both market-specific and application-specific requirements for almost any door opening imagined – while addressing a variety of factors, including:

- Level of Security
- Budget Restrictions
- Type of Door or Frame
- Life Safety Codes
- Aesthetics
- Retrofit or New Construction

BASIC COMPONENT CONSIDERATIONS FOR CONTROLLED DOOR SYSTEMS

- 1 LOCKING DEVICES

1510 Series

1650lb Holding Force EMLocks

SDC's electromagnetic locks are suited for interior doors, perimeter exit doors and entrances that require failsafe emergency release capability.

The patented EMLock® design represents the pinnacle of magnetic lock evolution with modular assembly that makes them easy to stock, install, upgrade, and maintain.

The housing design provides a superior appearance with a plated or anodized finish on all sides. The interlocking EZ mount assembly leaves hands free for wiring and securing of mounting screws. EMLocks® are UL listed and ANSI grade 1 compliant.

- Uniform design and installation
- Wire access chamber with terminal block
- Interlocking quick mount assembly
- Auto-sensing dual voltage
- Voltage and current spike protection
- Instant release anti-residual magnetism circuitry
- Captive lock mounting screws
- Self-drilling and tapping sheet metal screws
- 1½" machine screws included
- Field upgradeable without removing from the frame*

* See related products for EZ field upgrade kits.

** Order two for double EMLock applications

1580 Series

650lb Holding Force EMLocks

SDC's electromagnetic locks are suited for interior doors, perimeter exit doors and entrances that require failsafe emergency release capability. **The patented EMLock® design represents the pinnacle of magnetic lock evolution with modular assembly that makes them easy to stock, install, upgrade, and maintain.** The housing design provides a superior appearance with a plated or anodized finish on all sides. The interlocking EZ mount assembly leaves hands free for wiring and securing of mounting screws. EMLocks® are UL listed and ANSI grade 1 compliant.

- Uniform design and installation
- Wire access chamber with terminal block
- Interlocking quick mount assembly
- Auto-sensing dual voltage
- Voltage and current spike protection
- Instant release anti-residual magnetism circuitry
- Captive lock mounting screws
- Self-drilling and tapping sheet metal screws
- 1½" machine screws included

1560 Series

Concealed Electromagnetic
Shear Locks

SDC's HiShear® electromagnetic shear locks are designed, engineered and built in America for openings that require an architecturally superior appearance. Long recognized as a cut above alternatives on the market, SDC shear locks provide high security with a failsafe locking mechanism to meet a variety of door opening applications.

The innovative 1560 series concealed electromagnetic shear locks are available with 2000lbs and 2700lbs holding force for standard 1¾" to 2" frames with internal electronics, as well as narrow 1¼" to 1½" frames with external electronics.

- Fully concealed mortise design
- Floating armature assembly
- Special alloy steel shear tabs
- Auto-sensing dual voltage
- Door alignment relock sensor
- Adjustable lateral and vertical alignment
- Noise dampeners

1562SC Series

Semi-Concealed Electromagnetic
Shear Locks

SDC's HiShear® electromagnetic shear locks are designed, engineered and built in America for openings that require an architecturally superior appearance. Long recognized as a cut above alternatives on the market, SDC shear locks provide high security with a failsafe locking mechanism to meet a variety of door opening applications.

SDC's 1562SC series semi-concealed configuration incorporates the innovative HiShear® concealed electromagnetic lock with a surface mounted armature assembly. The semi-concealed design also provides the advantage of mounting the HiShear® on the secure side of the door opening, eliminating potential for tampering.

- Concealed mortise lock and surface mount armature design
- Floating armature assembly
- Special alloy steel shear tabs
- Auto-sensing dual voltage
- Door alignment relock sensor
- Adjustable lateral and vertical alignment
- Noise dampeners

1561TJ Series

Surface Top Jamb
Electromagnetic Shear Locks

SDC's HiShear® electromagnetic shear locks are designed, engineered and built in America for openings that require an architecturally superior appearance. Long recognized as a cut above alternatives on the market, SDC shear locks provide high security with a failsafe locking mechanism to meet a variety of door opening applications.

1561TJ models are surface mounted to the pull side of an in-swing door. For metal door and frame, glass door with top rail and metal frame, or wood door and frame. This mounting configuration eliminates the need for cumbersome and unsightly top jamb Z brackets normally associated with pull side mounted of magnetic locks.

- Surface mount design
- Floating armature assembly
- Special alloy steel shear tabs
- Auto-sensing dual voltage
- Door alignment relock sensor
- Adjustable lateral and vertical alignment
- Noise dampeners

1511S Series

Single Integrated
Delayed Egress Locks

SDC's ExitCheck® delayed egress locks continue to be the premier delayed egress offering on the market. The patented design revolutionized delayed egress by incorporating an alternating verbal message, verbal countdown and alarm tone, plus a large digital countdown display and door release indicator to provide a clear warning for the safety of persons without prior knowledge of door operation, including the blind and hearing impaired. Designed to delay egress through perimeter exit doors for 15 or 30 seconds, alert security and personnel to unauthorized egress, and are compatible with access controls and patient wandering systems.

The 1511S series incorporates all ExitCheck® features for single door applications with an integrated three position key switch for reset; manual power-up and bypass settings for convenience.

- Integrated delayed egress magnetic lock
- Interlocking quick mount assembly
- Visual countdown display indicator
- Alternating verbal message
- Verbal countdown and alarm tone
- Built-in activation trigger
- Adjustable door movement sensor
- Integrated three position keyswitch

1511T Series

Tandem Integrated
Delayed Egress Locks

SDC's ExitCheck® delayed egress locks continue to be the premier delayed egress offering on the market. The patented design revolutionized delayed egress by incorporating an alternating verbal message, verbal countdown and alarm tone, plus a large digital countdown display and door release indicator to provide a clear warning for the safety of persons without prior knowledge of door operation, including the blind and hearing impaired. Designed to delay egress through perimeter exit doors for 15 or 30 seconds, alert security and personnel to unauthorized egress, and are compatible with access controls and patient wandering systems.

The 1511T series incorporates all ExitCheck® features for double door applications through a slave lock output to enable the use of two units for pairs of doors to ensure pushing either door leaf will cause both doors to release.

- Integrated delayed egress magnetic lock
- Interlocking quick mount assembly
- Visual countdown display indicator
- Alternating verbal message
- Verbal countdown and alarm tone
- Built-in activation trigger
- Adjustable door movement sensor
- Integrated three position keyswitch

1581S Series

Mini Integrated
Delayed Egress Locks

SDC's 1581S series mini delayed egress locks are designed to meet the needs of long term care and commercial facilities that require a smaller, less obtrusive, and less expensive delayed egress lock that is better suited for minimum security needs. Size matters.

Designed to delay egress through perimeter exit doors for 15 or 30 seconds, alert security and personnel to unauthorized egress, and are compatible with access controls and patient wandering systems.

- Integrated delayed egress magnetic lock
- Interlocking quick mount assembly
- Subdued alternating alarm
- Built-in activation trigger
- Adjustable door movement sensor
- Low power consumption

101-DE Series

Delayed Egress Controllers

SDC's 101-DE series delayed egress controllers incorporate all ExitCheck® features into a two piece delayed egress system where the door is closed and secured by delayed egress locking hardware. The 101-DE series delayed egress controller send power to the slave operating magnetic locks or exit devices to the lock the door in a secured position. The integrated digital display on the 101-DE controllers provide an alternating verbal message, verbal countdown and alarm tone, plus a large digital countdown display and door release indicator to provide a clear warning for the safety of persons without prior knowledge of door operation, including the blind and hearing impaired. A built-in three function digital keypad provides alarm and lock reset, and timed or sustained bypass.

101-DE series delayed egress controllers must be ordered with a magnetic lock or exit device with ExitCheck® slave operation feature to secure the door. Designed to control up to two doors, order two magnetic locks or two exit devices for double door applications.*

** See related products for available magnetic locks and exit devices Consult factory for system design for applications requiring control of a bank of doors.*

S6000-101 Series

All-In-One Delayed Egress
Rim & Vertical Rod Exit Devices

SDC's S6000-101 series all-in-one devices integrates the S6000 series exit device with SDC's innovative delayed egress electronics.

When unauthorized egress is initiated by depressing the push pad of the S6000-101, an audible alarm will sound and an irreversible delay period of 15 seconds will begin. After the delay period has expired, the device unlocks, permitting egress until the device is reset. In a life safety emergency, the device will immediately unlock upon loss of power or when powered by a fire control supervised power supply.

Trim is ordered separately, see related products.

- Panic and fire rated devices
- Subdued alternating alarm
- Push pad activation trigger
- Key switch reset and bypass*
- Low power consumption, energy saver

* Key cylinders not included, order separately. See related products.

S6000-DES Series

Slave Delayed Egress
Rim & Vertical Rod Exit Devices

SDC's S6000-DES series slave operating exit devices secure the door in a delayed egress system.

Depressing the push pad activates the trigger input of either a 101-DE series delayed egress controller or a S6000-101 series all-in-one delayed egress exit device, initiating the 15 or 30 second unlock cycle.

Slave operating exit devices do not function on their own. S6000-DES series devices must be ordered with a 101-DE series delayed egress controller or a S6000-101 series all-in-one delayed egress device.

Trim is ordered separately, see related products.

- Panic and fire rated devices
- ExitCheck® slave operation
- Push pad activation trigger
- Low power consumption, energy saver

S6300-DES Series

Slave Delayed Egress Mortise Exit Devices

SDC's S6300-DES series slave operating exit devices secure the door in a delayed egress system.

Depressing the push pad activates the trigger input of a 101-DE series delayed egress controller, initiating the 15 or 30 second unlock cycle.

Slave operating delayed egress exit device models are available for both panic and fire-rated applications.

Slave operating exit devices do not function on their own. S6300-DES series devices must be ordered with a 101-DE series delayed egress controller.

- Panic and fire rated devices
- ExitCheck® slave operation
- Push pad activation trigger
- Low power consumption, energy saver
- Voltage and current spike protection

**Key cylinders not included, order separately. See related products.*

55 Series

3/4" Latchbolt Electric Strikes

SDC's 55 series 3/4" latchbolt electric strikes are heavy duty, designed for installation in hollow metal frames for access control of cylindrical locksets, mortise locksets with or without deadbolts and mortise exit devices. 55 series strikes accept 3/4" throw latchbolts and up to 1" throw deadbolts.

The choice of six application faceplates eliminates the need for centerline relocation, making them ideal for new or retrofit, high security access control applications.

55 series strikes retrofit existing ANSI 4 7/8" strike prep – no centerline relocation required.

- Heavy duty
- Stainless steel components
- Stainless steel square corner faceplate
- Heavy cast housing body and keeper
- Corrosion and tamper resistant
- Horizontal alignment adjustment
- Non-handed
- Interchangeable faceplate design
- Internally mounted solenoid
- Field selectable operation
- Field selectable dual voltage
- Voltage and current spike protection
- Pigtail connectors

45 Series

5/8" Latchbolt Electric Strikes

SDC's 45 series 5/8" latchbolt electric strikes are centerline latch entry strikes designed for use with cylindrical locksets and mortise locksets without deadbolt for both metal and wood frames. 45 series strikes accept 5/8" throw latchbolts or up to 3/4" throw latchbolts with 1/8" door gap.

45F models are fire-rated and accept 5/8" throw latchbolts or up to 5/8" throw latchbolts with 1/8" door gap.

Centerline latch entry strikes require the latch to enter at the strike "centerline" located exactly between the top and bottom of the strike faceplate.

- Low profile
- Fewer moving parts
- Stainless steel components
- Durable die cast housing body
- Corrosion resistant
- Horizontal alignment adjustment
- Mounting tabs included
- Non-handed
- Interchangeable faceplate design
- Internally mounted solenoid
- Field selectable operation
- Field selectable dual voltage
- Voltage and current spike protection
- Pigtail connectors
- Latch status (LS)
- Keeper deadlocked status

7200 Series

Solenoid Controlled Cylindrical Locks

SDC' Electra™ 7200 series solenoid controlled cylindrical locks are designed for the access control of openings in commercial, industrial and institutional facilities where code compliance, dependable operation and resistance to physical abuse are required. These code compliant electric cylindrical locksets stay latched even when unlocked, maintaining fire door integrity and eliminate the need for exposed and vulnerable electric strikes and magnetic locks or request-to-exit devices.

7200 series models incorporate a SDC manufactured grade 1 heavy duty mortise lockset and vandal resistant clutch – proprietary to all SDC locksets.

- Heavy duty cylindrical design
- New or retrofit construction
- Vandal resistant clutch
- Solenoid control
- Key latch retraction
- Field selectable dual voltage
- Power regulator included
- Latch status (LS)

7500 Series

Solenoid Frame Actuator
Controlled Mortise Locks

SDC's HiTower® 7500 series solenoid frame actuator controlled mortise locks

are an evolution of SDC's original, patented design for using an electric frame actuator to control a modified mechanical door lock or exit device and is the groundbreaking product technology upon which SDC was founded over 50 years ago. Elegant in its simplicity, HiTower® locks provides hardwire control with no electric hinge and no wires in the door to eliminate costly parts and labor.

HiTower® locks provide building and fire life safety code compliance for fire rated office doors, corridor doors, lobby doors, exit doors and stairwell doors because all wires are contained in the door frame – eliminating the need for manufacturers to prep the door for wires to maintain fire ratings.

Z75 models are SDC brand mortise locks built to HiTower® specifications.

ZY75 models are mortise locks SDC built to retrofit discontinued manufacturer models previously modified to HiTower® specifications by SDC, including Falcon LM581, Sargent 7704/7705, Corbin 955L/2257, Russwin 7059L, Arrow 1600EW, Yale 8705, Almet 5007 and Best 35HEW.

ZR75 models are mortise locks SDC built to retrofit discontinued Falcon 5000/6000 series models to HiTower® specifications.

* Incorporate SDC's patented HiTower® frame actuator to control the locking and unlocking of the door. Features include failsafe operation and unlocks by access control, power loss or signal from fire command center. Door stays latched even when unlocked. Uninhibited egress. All wiring is maintained in the strike jamb. Complies with national building and fire codes. Eclipse escutcheon style trim standard. Consult factory for alternate trim, special finishes, monitoring options or narrow frame applications.

** SDC can modify Yale 7130F-L5 Exit Devices to HiTower® specifications. Send your Yale 7130F-L5 exit device to SDC for modifications. Consult factory for special finishes, monitoring options or narrow frame applications.

7600 Series

Motorized Latch Retraction
Controlled Mortise Locks

Motorized electric latch retraction (MLR) mortise locksets replace existing mechanical or electrified mortise locksets for the access control of openings in commercial, industrial and institutional facilities where code compliance, dependable operation and resistance to physical abuse are required. These code compliant electric mortise locksets stay latched even when unlocked, maintaining fire door integrity.

SDC's 7600 series motorized latch retraction controlled mortise locksets incorporate a SDC manufactured grade 1 heavy duty mortise lockset and vandal resistant clutch – proprietary to all SDC locksets. The motorized latch retraction feature is designed for use on fire rated doors to provide access control and building and fire life safety compliance. Door stays latched even when de-energized.

Ideal for automatic door operator applications. All SDC mortise locks feature a mortise cylinder to manually retract the latch.*

*Key cylinders sold separately, see related products.

7800 Pro Series

Solenoid Controlled Mortise Locks

SDC's Selectric® 7800 Pro series solenoid controlled mortise locksets replace existing mechanical or electrified mortise locksets for the access control of openings in commercial, industrial and institutional facilities where code compliance, dependable operation and resistance to physical abuse are required. These code compliant electric mortise locksets stay latched even when unlocked, maintaining fire door integrity and eliminate the need for exposed and vulnerable electric strikes and magnetic locks or request-to-exit devices.

7800 Pro series models incorporate a SDC manufactured grade 1 heavy duty mortise lockset and vandal resistant clutch – proprietary to all SDC locksets.

- Heavy duty mortise design
- New or retrofit construction
- Vandal resistant clutch
- Solenoid control
- Key latch retraction
- Field reversible operation
- Field selectable function
- Field selectable dual voltage
- Field reversible handing
- Schlage trim compatible

SK Series

Schlage L9000 Mortise Lock Field Electrification Kits

**Convert mechanical locks into
electric access controlled locks.**

SDC's SK series field electrification kits for Schlage L9000 mortise locks allow for fast electrification of existing locks in the field. Failsafe and failsecure options are easily selected and can be changed in the field to suit any need.

Field request-to-exit (REX) monitoring kits provide indication of inside lever operation for alarm shunt, remote annunciation or CCTV activation.

- Field selectable operation
- Field selectable dual voltage

S4000 Series

Electrified Industrial
Rim & Vertical Rod Exit Devices

SDC's S4000 series features low-profile, high value electrified grade 1 exit devices with stainless steel construction.

Not all perimeter doors have adequate overhang protection, exposing them to weather and corrosion. The S4000 is corrosion resistant and comes with motorized electric latch retraction and request-to-exit (REX) monitoring factory installed, making its application as easy as install - power - done.

Trim is ordered separately, see related products.

- Electrified compact industrial design
- Motorized electric latch retraction and dogging
- Panic and fire rated devices
- Durable stainless steel construction
- Corrosion resistant
- Scratch, fingerprint and impact resistant touch pad
- High traffic use
- Low-energy automatic door operator compatible
- Request-to-exit (REX)

S5000 Series

Electrified Storefront
Rim & Vertical Rod Exit Devices

SDC's S5000 is a heavy duty, code compliant alternative to magnetic locks for storefront applications that require durability, superior aesthetics and smooth operation.

This UL305 panic-rated exit device is American Made, featuring all metal construction that is particularly suited to aluminum glass entrances for both manual and automated door openings and new or retrofit applications.

Not only does the SDC S5000 meet the market need for a storefront exit device with electric latch retraction standard, it also comes with optional request-to-exit monitoring for access control compatibility.

The S5000 with factory installed motorized electric latch retraction makes application as easy as install – power – done.

- Electrified storefront design
- Motorized electric latch retraction and dogging
- High traffic use
- Low-energy automatic door operator compatible

S6000 Series

Electrified Architectural Rim & Vertical Rod Exit Devices

SDC's Spectra™ S6000 series electrified architectural rim and vertical rod exit devices offer several electrified options to complement your access control system and meet virtually any application. UL listed and ANSI/BHMA A156.3 Grade 1 compliant, S6000 series devices comply with all national and state building and fire life safety codes.

Designed for a modern look and quiet push pad operation, S6000 series devices are panic or fire rated exit and are available in rim mount or surface vertical rod configurations.

Trim is ordered separately, see related products.

* Not applicable for use with S6000A or S6000B alarmed exit models.

** Not applicable for use with S6000E or S6000EM motorized electric latch retraction models.

*** For EK03U, GK03U and SP03U trim only.

**** Key cylinder not included, order separately.

S6300 Series

Electrified Architectural
Mortise Exit Devices

SDC's Spectra™ S6300 series electrified architectural mortise exit devices offer several electrified options to complement your access control system and meet virtually any application. UL listed and ANSI/BHMA A156.3 Grade 1 compliant, S6300 series devices comply with all national and state building and fire life safety codes.

Designed for a modern look and quiet push pad operation, S6300 series devices are panic or fire rated exit devices in mortise configurations.

- Electrified architectural design
- Panic and fire rated devices
- Durable stainless steel construction
- Corrosion resistant
- High traffic use

LR100 Series

Retrofit Electric
Latch Retraction Kits

SDC's QuietDuo™ LR100 series retrofit electric latch retraction kits enable electric access control and dogging of panic and fire rated mechanical exit devices. When energized the motor retracts the exit device latch and pulls the pushpad into the dogged (depressed) position enabling momentary or sustained push and pull operation of the door. The latch retraction mechanism may be activated by an access control, remote control device or building automation system. No door sequencer required for a pair of manual doors. The exit device always provides uninhibited egress.

The patented design was the first retrofit motorized electric latch retraction kit brought to market and has been recognized as the market leader ever since. **The use of a motorized electric latch retraction devices provide several advantages over solenoids including lower current draw, quieter operation and greater durability over time.**

LR100 models are one unit completely housed within the rail of the device behind the access cover, whereas LR100-EM models are two piece space saver units, intended to gain up to one inch in spacing within the device, placing the controller board externally to accommodate smaller field cut devices for smaller openings or where space is limited within the rail.

IMPORTANT NOTE
Before ordering, visit applications chart on product datasheet for complete details on exit device compatibility.

IP100 Series

Retrofit Electric
Latch Retraction PoE Kits

SDC's QuietDuo™ IP100 series retrofit electric latch retraction PoE kits enable electric access control and dogging of panic and fire rated mechanical exit devices. When energized the motor retracts the exit device latch and pulls the pushpad into the dogged (depressed) position enabling momentary or sustained push and pull operation of the door. The latch retraction mechanism may be activated by an access control, remote control device or building automation system. No door sequencer required for a pair of manual doors. The exit device always provides uninhibited egress.

IP100 series kits bring all of SDC's electric latch retraction features to power over ethernet (PoE). The use of a motorized electric latch retraction devices provide several advantages over solenoids including lower current draw, quieter operation and greater durability over time.

IP100 models are one unit completely housed within the rail of the device behind the access cover, whereas IP100-EM models are two piece space saver units, intended to gain up to one inch in spacing within the device, placing the controller board externally to accommodate smaller field cut devices for smaller openings or where space is limited within the rail.

1091 / 1291 Series

Right Angle
Electric Bolt Locks

Designed and patented by SDC, Spacesaver® right angle bolt locks represent a fundamental innovation in electric locking technology for access control applications.

Spacesaver® bolts project at right angles to the lock mechanism, allowing installation of Spacesaver® locks, by means of a simple mortise cutout, in virtually any standard frame, or in most door lock stiles. With the entire lock concealed, aesthetic acceptability is complete, security is greater and installation in old or new construction is fast, easy and economical.

- Concealed mortise right angle design
- Stainless steel bolt
- Specification grade solenoid
- Automatic relock
- Field adjustable and bidirectional automatic relock ball switch
- Mounting tabs included
- Field selectable dual voltage
- Voltage and current spike protection
- Power regulator included

1190 / 2090 Series

Heavy Duty Right Angle
Electric Bolt Locks

Designed and patented by SDC, Spacesaver® right angle bolt locks represent a fundamental innovation in electric locking technology for access control applications. Spacesaver® bolts project at right angles to the lock mechanism, allowing installation of Spacesaver® locks, by means of a simple mortise cutout, in virtually any standard frame, or in most door lock styles. With the entire lock concealed, aesthetic acceptability is complete, security is greater and installation in old or new construction is fast, easy and economical.

1190A and 2090A models utilize a 3/4" diameter solid stainless steel bolt, an extra heavy duty housing design and solenoid. Designed to provide years of trouble free operation, 1190A and 2090A bolt locks are the most powerful commercial grade units available on the market. There are only three moving parts within the hefty solid metal body of the 1190A and only five moving parts in the 2090A. The power and strength of the solenoids far surpass any competitive models.

- Concealed mortise right angle design
- Stainless steel bolt
- Specification grade solenoid
- Automatic relock
- Field adjustable and bidirectional automatic relock ball switch
- Mounting tabs included
- Voltage and current spike protection
- Power regulator included

Narrow Right Angle
Electric Bolt Locks

Designed and patented by SDC, Spacesaver® right angle bolt locks represent a fundamental innovation in electric locking technology for access control applications.

Spacesaver® bolts project at right angles to the lock mechanism, allowing installation of Spacesaver® locks, by means of a simple mortise cutout, in virtually any standard frame, or in most door lock stiles. With the entire lock concealed, aesthetic acceptability is complete, security is greater and installation in old or new construction is fast, easy and economical.

1490A and 2490A models are designed to fit in narrow 1½" frame or door stile.

- Concealed mortise right angle design
- Stainless steel bolt
- Specification grade solenoid
- Automatic relock
- Field adjustable and bidirectional automatic relock ball switch
- Mounting tabs included
- Field selectable dual voltage
- Voltage and current spike protection
- Power regulator included

FS23M Series

Dual Failsafe Right Angle
Electric Bolt Locks

Designed and patented by SDC, Spacesaver® right angle bolt locks represent a fundamental innovation in electric locking technology for access control applications.

Spacesaver® bolts project at right angles to the lock mechanism, allowing installation of Spacesaver® locks, by means of a simple mortise cutout, in virtually any standard frame, or in most door lock stiles. With the entire lock concealed, aesthetic acceptability is complete, security is greater and installation in old or new construction is fast, easy and economical.

Dual failsafe bolt lock are available only from SDC. Conventional failsafe locking bolts rely solely on a spring to retract the bolt while the FS23M bolt will unlock with or without the assistance of the spring. **This is the only electric bolt lock listed by the California State Fire Marshal for locking of perimeter entrance and emergency exit doors after hours.**

Large repelling magnets are located within the bolt and strike. Should the spring fail, repelling magnets eject the bolt from the strike, unlocking the door.

- Concealed mortise right angle design
- Nylon bolt with hardened magnet core
- Repelling bolt and strike magnet
- Specification grade solenoid
- Automatic relock
- Field adjustable and bidirectional automatic relock ball switch
- Mounting tabs included
- Field selectable dual voltage
- Power regulator included

IPD Series

IP-Based Access Controllers

SDC IPPro® IPD series IP-based single door access controllers come with two ethernet ports for interfacing with an additional IP device. They allow expansion from one standalone door up to a 100-door "grid." The additional ethernet port allows IT departments to save a port when connecting an extra door at the server. Installers can eliminate a long cable run when connecting an additional IP device.

Every IPPro® controller comes with secure, built-in software to manage up to 32 doors from any standard web browser to allow for real-time monitoring, user management and audit trail up to 5,000 events. Or, download our FREE PLUS PC-Client software to control up to 100 doors from a single PC. IPPro® PLUS is a role-based access control software suite with different interface modules.

- Controls one door directly, with unlimited expansion capabilities
- TCP/IP communications (100/10Mbps)
- DHCP or Static IP addresses
- Password protected built-in web server or FREE downloadable 'Grid' software
- Two ethernet ports
- Live transaction monitoring
- Entry/exit wiegand reader capability
- Reader short circuit protection
- Compliant with PoE+ standard
- 60,000 users
- Multiple credential modes & batch card enrollment

E75 Series

Standalone Electronic Cylindrical Locksets

SDC battery powered electronic door locks and keyless entry system provide controlled access for basic and multi-level high security requirements. Additionally, E70 series keypads comes standard with all of SDC's EntryCheck® features such as door sense/inhibit inputs industry professionals have become accustomed to from SDC keypads.

E75K, E75P and E75PS models standalone locksets are keypad or PC software programmable, and combine multiple access technology with efficient motorized locksets. An optional passage mode feature comes standard.

E75KL and E75PL models feature a privacy function that locks the keypad by engaging the privacy button on the inside, and the red LED on the outside flashes to indicate room occupation. Turning the inside lever upon exiting deactivates the privacy function. In case of emergency, the privacy function can be overridden via key or master code.

- Keypad programmable
- 3,000 users, 32 temporary users
- 4 to 6 digit PIN codes
- 32 access groups, schedules and holidays
- 4 authority levels
- Keypad tamper lockout
- Mechanical key override
- Battery powered (4 AA)
- Blue backlit cast metal keys
- Weather & vandal resistant
- Request-to-exit (REX)
- Door position status (DPS)
- Visual status indicators (LED)

E77 Series

Standalone Rim Exit Device Locksets

SDC battery powered electronic door locks and keyless entry system provide controlled access for basic and multi-level high security requirements. Additionally, E70 series keypads comes standard with all of SDC's EntryCheck® features such as door sense/inhibit inputs industry professionals have become accustomed to from SDC keypads.

The E77 Series include an SDC rim exit device and trim. The E77 locksets are an indoor/outdoor standalone electronic battery powered solution, providing controlled access for basic and multi-level high security requirements. The E77 locksets are keypad or PC software programmable, and combine multiple access technology with efficient motorized exit devices.

- Keypad programmable
- 3,000 users, 32 temporary users
- 4 to 6 digit PIN codes
- Passage mode option
- 32 access groups, schedules and holidays
- 4 authority levels
- Keypad tamper lockout
- Mechanical key override
- Battery powered (4 AA)
- Blue backlit cast metal keys
- Weather & vandal resistant
- Retrofits existing lock door prep
- Motorized SDC trim
- Heavy duty ANSI grade 1
- Vandal resistant lever clutch mechanism
- Request-to-exit (REX)
- Door position status (DPS)
- Visual status indicators (LED)

295

Standalone Programmable Cabinet Locks

SDC's 295 battery powered keyless cabinet locks provide an easy, economical solution for security and keyless access control for a wide variety of cabinet doors, drawers, storage lockers and more. Quickly and easily add/delete up to 30 individual user PIN codes with programmable keypad. Powered by two AAA batteries, the need for low voltage wiring is eliminated.

295 battery powered keyless entry cabinet lock provides security and access control for indoor commercial and residential, metal and wood cabinetry, files, desks, lockers, electrical enclosures, display cases and portable carts. The 295 is designed for new or retrofit cam lock compatible doors and drawers.

- Multiple locking cam positions
- Multiple or one-time use modes
- One master and submaster code
- 30 users
- 4-6 digit PIN codes
- Field optional user changeable PIN
- Adjustable unlock time
- Keypad tamper lockout
- Concealed mechanical key override
- Battery powered (2 AAA)
- Battery failure override
- Visual status indicators (LED)
- Key override

700 Series

Key Switches

SDC key switch assemblies provide an economical method of providing authorized control for a variety of applications. A choice of several contact configurations ensure compatibility with virtually any system. Key switch assemblies are compatible with U.S. standard, 1" to 1 $\frac{3}{8}$ " mortise key cylinders and interchangeable core cylinders*. Compatibility with a new or existing facility mechanical key system is maintained.

SDC's 700 series switch assemblies come standard with stainless steel faceplates and a heavy duty rated switches. Available in a narrow faceplate size to mount directly to the door frame or single gang and double gang sizes to be box mounted.

**Key cylinders not included, order separately. See related products.*

- 20 gauge stainless steel faceplates
- Alternate action or momentary
- SPDT or DPDT
- 22 gauge wire leads, 7"
- Tamper resistant, recessed cylinder*
- Tamper resistant spanner screws
- 1" - 1 $\frac{3}{8}$ " mortise cylinder compatible
- Large actuator for positive and consistent activation

**Not available with narrow faceplate 700N models.*

PSB560 Series

Pressure Sense Bars

Stable and reliable pressure sense technology. Building codes essentially state that egress through access controlled doors must not require prior knowledge of operational requirements. Meeting this criteria, **SDC's patented SureExit® PSB560 series pressure sense bars** are designed to release electromagnetic door locks for uninhibited egress. When slight pressure is applied to the non-latching bar, either of the two redundant solid state pressure sensors are actuated causing the electronics to immediately release the electromagnetic door locks.

A third redundant micro switch is automatically activated to release the door if both sensors or the electronics fail. This automatic emergency release switch does not require prior knowledge to find or use. Door operation will continue without the inconvenience of emergency service.

The SDC SureExit® is the only tri-failsafe exit bar providing unequalled safety and reliability.

- Reliable pressure sense technology
- Sensor calibration not required
- Quick and quiet operation
- Tri-failsafe
- Heavy duty aluminum extrusion
- Metal end caps
- High traffic use
- Temperature tolerant
- Narrow, low-profile
- Two outputs
- Auto-sensing dual voltage

MSB550 Series

Mechanical Switch Bars

Building codes essentially state that egress through access controlled doors must not require prior knowledge of operational requirements. Meeting this criteria, SDC's MSB550 is designed to release electromagnetic door locks for uninhibited egress. When slight pressure is applied a microswitch is actuated, immediately releasing the electromagnetic door lock.

The MSB550 series bars are an economical alternative to sensor activated bars.

The MSB550 series uses heavy duty aluminum extrusion and metal caps. The mounting assembly is all metal, and no plastic. The rigid construction prevents any malfunction due to sagging or warped doors or tweaked glass door stiles. With a maximum total bar movement of only $\frac{1}{8}$ ", trigger activation to release the electromagnetic lock is quick and quiet.

- $\frac{1}{8}$ " total bar movement
- Quick and quiet operation
- Heavy duty aluminum extrusion
- Metal end caps
- High traffic use
- Narrow, low-profile
- One output
- Power transfer loop included
- Easy installation and troubleshooting

410 Series

Narrow Push Button Switches

The illuminated switch button is two inches square for easy activation and is visually conspicuous. The high impact resistant material stands up to abuse. The "PUSH TO EXIT" sign complies with NFPA requirements.

The 410 series narrow frame mount exit switch assemblies include a large push button on a narrow frame mount plate with push switch signage "PUSH TO EXIT".

Code compliant manual releasing devices and sensors, 413MN exit switches used together with MD-31D motion sensors comply with manual releasing device and sensor device requirements for access-controlled egress doors.

- Green or red illuminated switch buttons
- Stainless steel faceplate
- Push-to-exit sign
- Green and red lens included*
- Auto-sensing dual voltage

*413M models include green lens only.

Small Mushroom Button Switches

SDC's 430 heavy duty industrial series incorporates a 1½" round mushroom button with heavy duty contacts. The assembly is capable of withstanding high impact and is ideal for heavy duty high frequency use.

432K models latch when depressed and must be reset with the built-in-key. Applications include alarm, panic alarm and emergency door release where systems are restored by authorized personnel only.

- 1½" mushroom exit switches
- Heavy duty to withstand impact
- Water resistant contacts
- High frequency use
- Screw terminal wire connections
- Green button standard*

**Red button is standard for 432K models.*

440 Series

Large Mushroom Button Switches

The conspicuous **440 heavy duty industrial series switch assemblies** incorporate a 2 $\frac{5}{8}$ " inch diameter mushroom button and heavy duty weather resistant contacts. The large double gang mushroom assembly includes a heavy duty steel bezel around the button to guard against abuse. When utilized as an exit or REX switch, the assembly is easy to activate and stands out for persons without prior knowledge of egress operation.

In addition to egress applications, the large assembly is ideal as an easy to activate emergency/panic alarm switch.

- 2 $\frac{5}{8}$ " mushroom exit switches
- Heavy duty to withstand impact
- Water resistant contacts
- Easy emergency/panic activation
- High frequency use
- Screw terminal wire connections
- Red button standard

460 Series

Capacitive Touch Sensors

SDC's 460 series capacitive touch sensors are heavy duty vandal resistant exit switches designed for indoor, commercial and industrial egress applications. Constructed of stainless steel and utilizing capacitive sensor technology, the switch is ideal for high traffic conditions. The vandal resistant design ensures superior performance in virtually any environment.

The switch features an integrated output timer that is adjustable for 1 - 40 seconds or toggle on/off and switch selectable illumination status. Brilliant red and vibrant green can be selected to show relay ON or OFF status.

460 series switches can be used to control an automatic door, electromechanical lock, strike or magnetic lock. It may also be tied into the remote bypass (REX) input of an access control system, or used to shunt an alarm system to allow egress from a secure area.

- Vandal resistant stainless steel
- Capacitive touch sensor
- Selectable bi-color illumination status
- Field selectable adjustable timer or alternate action (on/off)
- Auto-sensing dual voltage

470 Series

No Touch Sensors

SDC's 470 series touchless switches use active IR sensor technology.

A simple wave of the hand in front of the 470 touchless switch activates the switch to control electric locks/strikes, magnetic locks or automatic door operators for entry or egress. 470 series touchless switches come standard with an adjustable 2"-7" activation read range.

The dual LED, illuminated sensor, clearly indicates status. The red LED indicates inactive status, which changes to a temporary green LED state to indicate activation. Ideal for, but not limited to, facilities that require contamination control. Touchless switches help **reduce the spread of infection and disease** in any application.

- Wave-to-open activation
- Active IR sensor technology
- Adjustable sensing range 2"-7"
- Illuminated dual LED sensor
- Durable stainless steel faceplate
- 8" wire harness
- Field selectable dual voltage

MD-31D Series

Request-to-Exit PIR Motion Sensors

SDC's MD-31D series motion

sensors are passive infrared detector specifically designed for request-to-exit applications. The coverage field is internally pointable. When angled 14 degrees down, coverage may be 5' x 6' at 7' feet high for 10' x 12' at 15' high. The MD-31D projects a wrap around "U" pattern down and away from the door to inhibit tampering.

The MD-31D complies with national fire and building code requirements for access controlled egress doors.

- Passive infrared detection
- Adjustable relock time delay (RTD)
- Frame header, wall or ceiling mount
- Complies with NFPA applications
- Code compliant failsafe mode*
- Auto-sensing dual voltage

**For MD-31DOW only, lock releases when power to PIR sensor is interrupted.*

AUTO Series

Low Energy Swing Door Operators

SDC's operator is built with a state-of-the-art microprocessor-based unit that is self-tuning and self-learning while offering non-handed operation, full-mechanical stops and a variety of interface options for sensors, push-plates, fire alarms and electrified locks.

SDC's operator is belt driven with a combination of gears and pulleys which requires less torque, less power, absorbs more abuse, and is quieter than other automatic door openers while complying with all US and Canadian ADA requirements. Onboard diagnostics simplifies troubleshooting for ease of installation and all SDC operators can be easily configured for surface mounted push/pull applications. ANSI certified not required for initial installation.

- Single button, self-tuning setup
- Extremely quiet operation
- Momentary back pressure relief
- Obstruction detection
- Power close option
- Hold-open timer
- External function switches
- Built-in 1 Amp power supply
- Onboard lock sequencing
- Preset dip switches for alternative functions
- Non-handed
- Push or pull compatible
- Spindles included
- High traffic use

1 Amp Power Controllers

Access control system power requirements are uniquely different from other systems.

SDC power supplies have been developed specifically to help reduce power system issues and to support electric locks and access control requirements. Our hybrid design combines the efficiency of switching power supplies with the inductive load handling capability of linear power supplies in various 12/24 VDC current output capabilities and enclosure sizes. Filtering and output voltage regulation provide protection and ensure the longevity of all system components.

- Regulated & filtered linear DC power
- Class 2 output
- Field selectable dual voltage
- Fire/emergency release input
- Isolated battery charging circuit
- Low battery disconnect
- Input & output surge protection
- Visual status indicator (LED)
- Cabinet enclosures with pre-configured control module mounting holes*

*Applies to RF and RFA models only.

EH Series

Electromagnetic Door Holder & Releasing Devices

SDC's EH series magnetic door

holders are designed to hold doors open and release the door by remote switch or fire life safety command center activation. Primary application includes holding and releasing of fire rated doors that are required to provide a barrier for fire and smoke in an emergency or the convenience of door closure by remote control.

- Door release and close upon power loss or fire life safety system activation
- Low power consumption
- Field selectable high holding force
- Dual AC/DC voltage configurations
- Screw terminal block input connections
- Self-aligning catch plate
- Adjustable magnet centerline

CC	Socket Connectors	Electrified Locksets		62, 64, 67, 69
CR4	Four Station Control Relays	Door Controls & Backup Batteries		145
CYL-6K	Mortise Key Cylinders	Accessories & Misc		28, 31, 33, 36, 39, 42, 45, 57, 60, 62, 64, 67, 69, 73, 78, 81, 87, 94, 102, 104, 108, 110, 153
D15-	Concealed Desk Switches	Remote Controls		152
DC-	Door Coordinator Brackets	Electromagnetic Locks		10, 13
DEC-J	Delayed Egress Controller Surface Boxes	Delayed Egress Locks		36
DPS-11	DPS Monitoring Ball Switches	Accessories & Misc		156
DT	Mini Desktop Control Consoles	Remote Controls		146
E1200	1200lb Value Magnetic Locks	Electromagnetic Locks	Excel®	17
E1200-DF	Heavy Duty Drill Fixtures	Electromagnetic Locks		17
E12F	Filler Plates	Electromagnetic Locks		17
E12L	Angle Brackets	Electromagnetic Locks		17
E12U	Glass Door Mounting Kits	Electromagnetic Locks		17
E12Z	Top Jamb Mounting Kits	Electromagnetic Locks		17
E300	Magnetic Cabinet Locks	Electromagnetic Locks		17
E600	600lb Magnetic Locks	Electromagnetic Locks	Excel®	17
E6200	Value Industrial Magnetic Locks	Electromagnetic Locks		17
E6U	Glass Door Mounting Kits	Electromagnetic Locks		17
E6Z	Top Jamb Mounting Kits	Electromagnetic Locks		17
E75	Standalone Electronic Cylindrical Locksets	Standalone Locksets	EntryCheck™	97, 98, 99, 100
E76	Standalone Electronic Mortise Locksets	Standalone Locksets	EntryCheck™	101, 102
E77	Standalone Electronic Rim Exit Device Locksets	Standalone Locksets	EntryCheck™	103, 104
EA-	Door Prop Alarms	Door Prop Alarms & Annunciators		153
EA100	Multi-Mode Visual Annunciators	Door Prop Alarms & Annunciators	ExitAnnunciator®	153
EH	Electromagnetic Door Holder & Releasing Devices	Accessories & Misc		154, 155

INDEX

STARTS WITH	DESCRIPTION	SUBSECTION	TRADEMARK	PAGE
EK	Eclipse Escutecheon Trim	Exit Devices & Retrofit ELR Kits		78, 39, 45
EK4	Eclipse Escutecheon Trim	Exit Devices & Retrofit ELR Kits		73
EKE	Electrified Eclipse Escutecheon Trim	Exit Devices & Retrofit ELR Kits		78, 39, 45
EMC	Dual Channel Exit Device Sequencer	Door Controls & Backup Batteries		145
EP17624	Explosion Proof Magnetic Locks	Hazardous & Explosion Proof		157
EP493	Explosion Proof Emergency Pull Stations	Hazardous & Explosion Proof		157
EP499	Explosion Proof Exit Switches	Hazardous & Explosion Proof		157
EZ-	Field Upgrade Kits	Electromagnetic Locks		10, 13
FB-4	Four Output Power Distribution Modules	Door Controls & Backup Batteries		145
FP	Filler Plates	Electromagnetic Locks		9, 12, 15, 28, 31, 33
FS23M	Dual Failsafe Right Angle Bolt Locks	Electric Bolt Locks	Spacesaver®	92, 93
GK	Galaxy Escutecheon Trim	Exit Devices & Retrofit ELR Kits		78, 39, 45
GK4	Galaxy Escutecheon Trim	Exit Devices & Retrofit ELR Kits		73
GKE	Electrified Galaxy Escutecheon Trim	Exit Devices & Retrofit ELR Kits		78, 39, 45
GL	Gate Bolt Locks	Electric Bolt Locks	GateLok™	94
HDB	Glass Door Mounting Kits	Electromagnetic Locks		10, 13, 16, 17
HID1326	Proximity Card Packs	Keypads & Readers		96, 98, 100
HID1346	Proximity Fob Packs	Keypads & Readers		96, 98, 100
IP100	Retrofit Electric Latch Retraction PoE Kits	Exit Devices & Retrofit ELR Kits	QuietDuo™	85
IPD	IPPro Controller Boards	IP-Based Access Controllers	IPPro®	95
IPI-30	IPPro Injector	IP-Based Access Controllers	IPPro®	95
IPPRO-SKE	IPPro Starter Kits	IP-Based Access Controllers	IPPro®	95
IPRW	Weigand Readers	Keypads & Readers		96
IPS-12	IPPro Splitter	IP-Based Access Controllers	IPPro®	95
KR90F	Removable Mullions	Exit Devices & Retrofit ELR Kits		73, 78, 39, 45
LAB	Angle Brackets	Electromagnetic Locks		17
LR	Retrofit Monitoring Kits	Exit Devices & Retrofit ELR Kits		84, 85
LR100	Retrofit Electric Latch Retraction Kits	Exit Devices & Retrofit ELR Kits	QuietDuo™	82, 83
MC-	DPS Monitoring Magnetic Contacts	Accessories & Misc		156
MD-31D	PIR Motion Sensors	Exit Switches & Sensors		127
MS-	Monitoring Strikes	Accessories & Misc		156
MSB550	Mechanical Switch Bars	Egress Devices		113, 114
PAK-TR	Laser Engraved Rocker Switch Cap Packs	Remote Controls		148, 151
PD2090	Panic Device Bolt Locks	Electric Bolt Locks	PanicLok™	94
PSB560	Pressure Sense Bars	Egress Devices	SureExit®	111, 112
PT-	Power Transfer Loops	Power Transfer Devices		134
PTAG-	Proximity Disc Tag Packs	Keypads & Readers		96, 98, 100
PTH-	Electrified Power Transfer Hinges	Power Transfer Devices		134
PTM-	Power Transfer Mortise Devices	Power Transfer Devices		134
RB12V	Backup Batteries	Door Controls & Backup Batteries		136, 138, 140, 142, 144, 145
