You can **configure and price a full range of products** using the tables and rules shown in this book.

The simplified structure of pricing and product data in this book creates an easier configuration experience and a quicker update process for future price increases. Pricing logic used in this format makes the product and price easier to understand and has enabled Allegion to provide customers with a **digital data set of pricing, available for download at http://360portal.allegion.com**.

As a result, the **How to Order formats have been updated to match the Allegion Catalog Nomenclature (ACN) logic**. ACNs are descriptive, unique identifiers that set standards on how to order products and require default, consistent naming conventions for all product attributes across Allegion brands.

For more information about ACNs, please visit us.allegion.com/acnsupport or email ACNHelp@allegion.com.

ONLINE ORDERING IS AVAILABLE THROUGH ESTIMATE TO ORDER (ETO)

Visit http://360portal.allegion.com to get started or email online.ordering.access@allegion.com to sign up.

ETO offers much more than placing online orders including:

- Net price and list price are both displayed based on your buying program.
- Configure products, build hardware sets and place an order, or you can export to Excel.
- Build a dynamic cross-reference between your part numbers and Allegion part numbers. Any time a description, price or other product data is changed, your cross-reference will automatically be updated.
- Request a quote or quote revision directly from an estimate

Visit http://360portal.allegion.com to get started or email online.ordering.access@allegion.com to sign up.

To learn more about how ETO works and its features, visit: us.allegion.com/ETOdirect.

Traditional ordering methods:
Email: allegion_orders@allegion.com
Fax: 1-800-248-1460

When using traditional ordering methods, list the product attributes in the order outlined in this price book, which follow the ACN format guidelines.

STANDARD PRODUCTS

In each tabbed section of this Price Book you will find a comprehensive listing of our current offering per product series. Products should be ordered via the traditional method by designating the product, design, finish, handing, and options for each line item (refer to "How to Order" in the Forms & Examples section of the price book). All orders will be processed based on normal factory lead times. These lead times vary throughout the year and are affected by production volumes, supplier schedules and quantity demands. An anticipated ship date will be included with each order acknowledgment.

Some of the products listed in these sections require extended lead times. You will find the hourglass symbol (⌛) associated with products that require extended lead times so that you are aware of this condition prior to placing your order. Products included in this classification are those items that represent a unique combination of product attributes (i.e. finish, trim, function, etc.) that typically require additional manufacturing care and attention. Products marked "⌛" will routinely exceed normal factory lead times and anticipated ship dates will be indicated with each order acknowledgment.

How to order:

Common products can be ordered using the standard Allegion Catalog Nomenclature (ACN). The ACN is a unique, descriptive identifier for Allegion products. Each attribute in an ACN must be separated by a period but there is no need to detail out the default product attributes.

- Finish must be specified

Example:

Standard ACN used for ordering = B662.P6.626

In addition to what is listed above, this example would be shipped with:

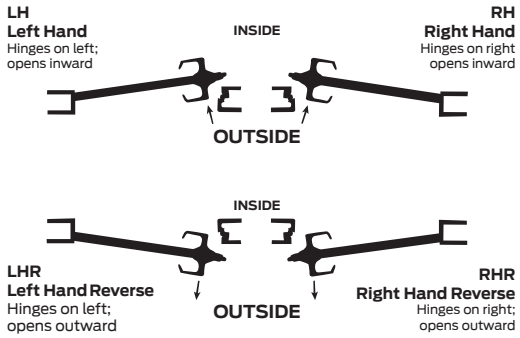

- The same finish for both sides of the door with coordinating deadbolt and strike
- Default deadbolt: 12-631: 2-3/4" backset, square corner, 1-1/8" x 2-1/4"
- Default strike: 10-094: Square Corner 1-1/8" x 2-3/4"
- Default door thickness: 1-3/4"
- Default keying: KD - Keyed different
- Default key: 48-270: EV 29 Standard Key
- Default keys: Two nickel silver cut keys per lock

Note: Default deadbolt, strike, and keying are function specific.

L909x EL/EU electrified locks

All locks feature automatic detection and operation with 12 or 24V DC, and a case-mounted switch that allows customer selection of EL (fail safe - power failure allows either knob/lever to retract latchbolt and/or deadbolt) or EU (fail secure - power failure locks outside knob/lever or both knobs/levers). Please specify lock function as EL or EU for default switch position.

Locks also come standard with Allegion Connect Molex connector with 3" lead and CON-6W. Allegion Connect is a Molex connector system that allows rapid installation of locks when used with Allegion Connect Harnesses (see page 278) and Allegion Connect Hinges (see Ives price book). Indicators are not allowed on electrified locks. For more information speak with your sales representative. The Molex connector can also be cut off so that the lock can be installed with traditional splicing.

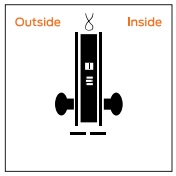

Available options for electrified functions:

- Request-to-Exit (RX)
- Latchbolt monitor (LX)
- Door position sensor (DPS) (non-deadbolt models only)
- Deadbolt monitor (DM) (standard on electrified deadbolt models)
- Vandlgard versions only available with RX option

Published in this section are **commonly ordered product configurations**. This section was created as a quick reference when creating basic orders.

Additional product configurations are available. If you do not see the product you need published in this section, you can configure and price products using the tables and rules shown in the configure a product section.

How to order:

Common products can be ordered using the standard Allegion Catalog Nomenclature (ACN). The ACN is a unique, descriptive identifier for Allegion products. Each attribute in an ACN must be separated by a period but there is no need to detail out the default product attributes.

- Finish must be specified
- If handing is not specified, it will be shipped RH

Example:

Standard ACN used for ordering = L9050.P6.03.N.626.RH.L283-722

In addition to what is listed above, this example would be shipped with:

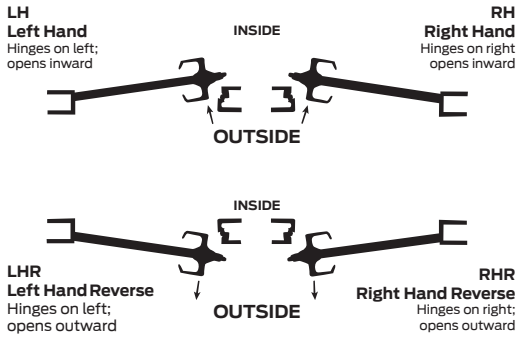

- The same lever, trim and finish for both sides of the door with coordinating strike and armor front finishes
- Default armor front: 09-663 - 1-1/4" Wide Square Corner, Latch x Aux Latch
- Default strike: 10-072 - 1-1/4" x 4-7/8" Square Corner + Box
- Default door thickness: 1-3/4"
- Default thumbturn: 09-544 - Standard ADA Thumbturn
- Default keying: KD - Keyed different
- Default keys: Two nickel silver cut keys per lock

Note: Default door thickness, strike, thumbturn and keying are function specific.

L Series Distributor Pack program

Features

The Schlage Distributor Pack stocking program provides "flexible inventory" for the L-Series mortise lock. The Distributor Pack combines the versatile Schlage mortise lock with a variety of knob or lever options and finishes all for the same list price as a complete lockset. This allows you to maximize your mortise lock inventory dollars and meet your changing customer requirements.

The Distributor Pack is also easy to use. By combining a few different component parts, you can build a complete Schlage mortise lock.

How to build a mortise lock with the Schlage Distributor Pack

STEP 1: Choose lock case required. Schlage mortise cases must be ordered in multiples of 10 units each (quantity of 1 = 1 lock case).

STEP 2: Choose the knob/lever and rose/escutcheon trim designs and finishes. Order one design and finish in multiples of 4 or 10 units each (quantity of 1 = 1 set of outside and inside trim).

STEP 3: Choose the armor front (quantity of 1 = 10 armor fronts, packed 10 to a box).

STEP 4: Choose the strike (quantity of 1 = 10 strikes, packed 10 to a box).

STEP 5: Choose the cylinder, if required (quantity of 1 = 10 cylinders, packed 10 to a box).

These are the only component parts required to build a Schlage mortise lock. With five easy steps you can build your mortise inventory to be flexible and to respond quickly to your customers.

Miscellaneous parts in bulk quantities are also available for Schlage mortise locks with the Distributor Pack Program.

LM929x EL/EU electrified locks

All locks feature automatic detection and operation with 12 or 24V DC, and a case-mounted switch that allows customer selection of EL (fail safe - power failure allows either knob/lever to retract latchbolt and/or deadbolt) or EU (fail secure - power failure locks outside knob/lever or both knobs/levers). Please specify lock function as EL or EU for default switch position. Locks also come standard with Allegion Connect Molex connector with 3" lead and CON-6W. Allegion Connect is a Molex connector system that allows rapid installation of lock when used with Allegion Connect Harnesses (see page 337) and Allegion Connect Hinges (see Ives price book). For more information speak to your sales representative. The Molex connector can also be cut off so that the lock can be installed with traditional splicing. Request-to-Exit (RX) is not an available option for the LM9200 Series.

Published in this section are **commonly ordered product configurations**. This section was created as a quick reference when creating basic orders.

Additional product configurations are available. If you do not see the product you need published in this section, you can configure and price products using the tables and rules shown in the configure a product section.

How to order:

Common products can be ordered using the standard Allegion Catalog Nomenclature (ACN). The ACN is a unique, descriptive identifier for Allegion products. Each attribute in an ACN must be separated by a period but there is no need to detail out the default product attributes.

- Finish must be specified
- Handing must be specified
- Door height must be specified

Example:

Standard ACN used for ordering = LM9550.P6.03.A.626.RH.8ft

In addition to what is listed above, this example would be shipped with:

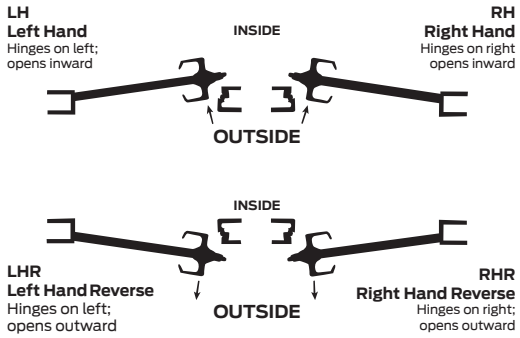

- The same lever, trim and finish for both sides of the door with coordinating strike and armor front finishes
- Default latch: Standard top and bottom latches
- Default strike: Standard top and bottom strikes
- Default door thickness: 1-3/4"
- Default keying: KD - Keyed different
- Default keys: Two nickel silver cut keys per lock

Note: Default door thickness, strike, thumbturn and keying are function specific.

The CS200 product line transitioned from crimp-on roses (not removable to snap on roses (removable) in August 2015. The rose/lever combination needs to be considered for changing levers for locks with crimp-on roses. Snap-on roses can be identified by retention dimples at the base of the rose. If not compatible, an outside chassis with a crimp-on rose can be updated with the following items:
- 06-242 Kit, levers
- 08-029 Rose SAT PLY (snap on)
- A501-945 Ring reinforcing rose
- F206-496 Outside chassis assembly, interconnect

BULK PACK

Key Large Jobs Faster!

Bulk Packs are kits that contain all of the components needed to build 10 cylinders. For added convenience the shells are pre-loaded with pins and springs and slid onto a follower. Cams and tailpieces are sold separately in economical 10-packs to maximize flexibility. **Keys and Primus components are also sold separately.**

The unit price of the unassembled cylinder is up to 15% less than buying it completely assembled. In addition to this savings, labor time is reduced since cylinders don't have to be taken apart before being pinned in the field. Not available in Faculty Restroom (hotel) functions. Must specify finish color, length and keyway.

OR

- Orders submitted on the Key System Summary form (MS-I200) and your purchase order with information specified in the following sequence:

Qty	Product	Design	Finish	Hand	Latch	Strike	Add'l Details
Door Detail Information				DHI Key Symbol			

Lead times for Master Keyed orders in any other format will be extended at least 5 additional working days. Residential Keying

Residential Master Key (RMK): RMK is a single key that will grant access to all opening with in the facility (i.e. master key). Additionally, each tenant would need to be provided with a key that will grant them access to their apartment only. The same keying situation would exist in any form of a multi family housing complex.

Residential Construction Keying (RCK): RCK (also referred to as loss ball) by design allows the use of a temporary master key during the construction phase of a project. At the end of the construction phase, the use of the homeowner key will trigger the lost ball construction device, thus eliminating the temporary master key used during construction.
