Trusted by governments, the defense industry, and industries that manage critical infrastructure.

A growing number of utilities, public institutions, industrial enterprises and companies depend on the ability to deliver their services 24/7. Any break or interruption to this service can cause a severe challenge to security, a costly loss of revenue, a break in health and safety and a ruined reputation. Therefore, the need for high security locking solutions has become an essential requirement in virtually every sector. ABLOY products are chosen worldwide for sensitive applications in the most exposed locations, continually withstanding the harshest of elements in the most extreme of climates both on land and at sea.

Abloy's position as a global leader is based on our long-standing dedication to innovative locking solutions. It is this commitment that makes us one of Finland's most well-respected brands. Today, we stand ready to serve the US market with a wide variety of solutions. Our products range from exceptionally secure disc cylinder padlocks to electromagnetic smart locks, ready to take on the challenges of the digital era.

The security features every ABLOY cylinder has in common:

- Rotating detainer disc cylinder locks are more secure than pin-based locks
- Combinations vary between key systems
- Made to meet and surpass the highest standards around the world
- Tested for durability to levels more severe than required in relevant standards
- Locking systems can be set up several different ways for security and convenience

Enhancements available for even higher security:

- PROTEC² CLIQ Connect services increase security and operational efficiency
- SWP Padlocks are designed to withstand all weather extremes
- A wide range of options are available in each product line

Trusted by governments, the defense industry, and other industries in need of high security.

Risks from organized crime, corporate espionage, and terrorism are growing in sophistication. This means security must also grow in sophistication. You'll find innovative solutions ideal for your industry in our wide selection of products. ABLOY USA employs sales specialists in each industry that are familiar with the risks and regulatory environment you face. We will help you find customized solutions for your needs.

In today's economy, a growing number of utilities, public institutions, industrial enterprises and companies must deliver their services 24/7. Any break or interruption to this service can cause a severe

challenge to security, a costly loss of revenue, a break in health and safety and a ruined reputation. With our products, you'll find peace of mind knowing you're protected by some of the best locking solutions in the world.

ABLOY products are chosen by industries worldwide for sensitive applications in the most exposed locations. They continually withstand the harshest of elements without a decline in performance or reliability. We will help ensure lasting security in the heat and the cold, in wet environments, and anywhere else your facilities and equipment are located.

In 1907, when young precision mechanic Emil Henriksson was repairing a cash register, he noticed that the principle of rotating detainer discs inside a cylinder could also be applied to locks. The invention was patented in 1919 under the name Henriksson's Patent Lock. To produce the locks industrially, Ab Lukko Oy (Abloy) was founded the same year. Henriksson sold the rights to his invention to the company in 1921. He continued his work in the company board long afterwards. After Abloy, Henriksson became a mechanic – first with the Defense Forces, and later in the Department of Chemistry at the University of Helsinki.

In his spare time, Henriksson studied languages and was a passionate arts enthusiast. In 1954, he was awarded the First Class Medal of the White Rose

of Finland, and one year later an honorary Finnish Economic Society silver coin. Emil Henriksson passed away in Helsinki in 1959. In his obituary, his family commemorated him thus: "Your life was full of work, but you never relented." He did not get a chance to enjoy his deserved reputation as one of Finland's greatest inventors during his lifetime, but it is said he was not disappointed about it, either.

The Story of ABLOY

The ABLOY lock is considered one of the most significant Finnish inventions. The lock and its inventor, Emil Henriksson, have a storied history of making the world a more safe and secure place.

1907

Abloy's story started in 1907, when Emil Henriksson, a young precision mechanic from Helsinki, noticed that the principle of rotating detainer discs inside cash register cylinders could also be applied to locks.

1919

The invention was patented in 1919 under the name Henriksson's Patent Lock. To produce the locks industrially, Ab Låsfabriken – Lukkotehdas Oy was founded in Helsinki. The company name was later shortened to Ab Lukko Oy. The trademark ABLOY, derived from the company name, was registered at the same time.

1921

In 1921, Henriksson decided to sell the rights to his invention and immerse himself in his passion for arts. Shortly afterwards, the patent and production rights to ABLOY locks

and the trademark were transferred to Kone- ja Siltarakennus Oy.

1935

Abloy became part of Wärtsilä, which opened up a new marketing and sales channel for the company's locks. The rotating disc cylinder mechanism made picking ABLOY locks extremely difficult. Also, the additional benefits of master keying allowed people to use only one key to open many locks. The lock quickly became a commercial success.

1935–1945

The war years depleted the factories' workforce and Finnish industry produced munitions alongside their other products. Abloy's parent group Wärtsilä also manufactured hand grenades during this period.

1950–1960

The locks' reliable and secure mechanism brought Abloy numerous European awards and won acclaim with locksmiths worldwide. Since then, ABLOY locks have kept many treasures secured, including those at the British Museum.

1968

Worldwide sales of ABLOY locks increased rapidly. To meet the growing demand, a new lock factory was opened in Joensuu.

1978

The first ABLOY electric lock was developed for the Bank of Finland's printing works. Enormous strides were made in the development of electromechanical locks.

1994

The company merged with its Swedish main competitor ASSA, the world's leading lock group, forming ASSA ABLOY. In the new company, Abloy became the centre of excellence for electromechanical lock cases and cylinders based on rotating detainer disc cylinder technology.

2017–

During the first new millennial decade and thereafter, ABLOY has consistently been voted a leading Finnish brand. In 2016, for example, it was voted Finland's most valued design brand. Today, Abloy is a pioneer in smart locks, ready to take on the security challenges of the digital era.

PROTEC² CLIQ™ SYSTEM

PROTEC² CLIQ™ is an easy to use access control system based on detainer disc cylinders and electronic identification. Thanks to our double technology, the access is double secured. ABLOY PROTEC² which is based on the patented rotating disc cylinder mechanism, takes care of the mechanical security at your site, while electronic CLIQ™ technology allows flexible control of keys, access rights and audit trails.

PROTEC² CLIQ™ combines both technologies into one effective solution.

PROTEC² CLIQ™ keys are also available as Connect keys that can be wirelessly programmed using CLIQ™ Connect smartphone application in addition to Remote programming devices (RemotePDs) and local programming devices (LocalPDs). This enables the users to update their keys while in the field.

Keys

The PROTEC² CLIQTM key has a metal shaft and a watertight plastic bow which holds the electronics and battery. All PROTEC² CLIQTM keys are equipped with a realtime clock and a memory to allow time-based functions and collection of audit trails.

The PROTEC² CLIQTM keys are also available as CLIQTM Connect keys. CLIQTM Connect keys can be updated via Bluetooth using CLIQTM Connect smartphone application.

PROTEC² CLIQTM user key specifications:

- Battery lifetime up to 10 years of operation and battery easy to change by opening a plastic cover.
- For Bluetooth operated CLIQTM Connect keys, battery lifetime is 1 year.
- Battery type is CR2450N.
- Buzzer indication and bicolor LED on both sides of the key.
- Additional RFID cover available for use with transponders for access control readers.

- Available also with a Mifare 1K Tag installed to the cover.
- Additional color covers available.
- IP57 certified.
- Operating temperature is -20 --+50.
- Time functionalities available in all user keys (Validity settings, schedules, time stamps in audit trails.)

Sequence lock

CLIQ™ cylinders are also available with the Sequence lock feature that can be programmed to the cylinder memory in the factory. This lock type will require two valid keys to be inserted into the cylinder before the lock can be opened.

When the first valid key is inserted, the lock does not indicate or open. If a second valid key is entered within 1 minute, the lock will open. The sequence starts from the beginning after one minute has passed.

CLIQ Check List

Part Number	Required	Optional	Product Description	Product Comments
TQ407	X		User Key	Minimum of one required per system.
TQ406	X		Master User	Operates all Cylinders.
TQ403	X		C Key	One required to access software.
TQ403	X		C Key	One Required to perform audits and other ADMIN task.
PDA500	X		Programming Device	One required per system. This unit is where you insert your C Key.
PDA100	X		Remote Wall Programmer	This is useful for updating keys at other facilities off-site.
TQB407		X	BLE Key	Used for remote areas. Updates by CLIQ connect app on Cell Phone.
PDA120		X	Vandal Resistant Wall Programmer	Same as PDA100 but built to resist vandalism.
CLIQ systems designed to incorporate self-hosting, Interchangeable core, sequence, connect online or cylinder groups will require additional parts and factory programming. Please contact your local sales rep or the ABLOY office for further assistance.				
TQG951			Sales Demo Kit	This kit is used for Demonstration purpose only. This would be ideal for dealers to have for demo to customers.
SP-365-6	X		Onsite Training	Includes 1 day of training for all employees managing the system.
BASIC	X		Basic Web Hosting	This basic service is required to access the CWM.
PLUS	X		Web Hosting with added features	This service is an upgrade to the basic plan.
PLUS	X		Web Hosting with all the available features.	This service is part of the premium plan.

Cylinder Function

The PROTEC² CLIQTM mechanical cylinder contains the unique PROTEC² structure with nine discs. In addition the cylinder contains PROTEC² CLIQTM cylinder electronics, which controls the electronic blocking system. This electronically-controlled cylinder blocking is realized by using a small electric motor to guide the turning of one detainer disc. The cylinder itself has no electric power source. This eliminates the need for wires or battery change to the cylinders.

The PROTEC² CLIQTM key structure allows it to operate not only the PROTEC² CLIQTM electronic cylinders but also mechanical PROTEC² cylinders with eleven discs. PROTEC² CLIQTM key bow contains the key electronics and battery to power the functions of the cylinder

and the key itself in a watertight package. Electronic communication between the key and the cylinder happens via bipolar galvanic contacts. The key shaft itself functions as one pole, the other one being an insulated metal strip on the side of the key shaft. The power to carry out the cylinder's functions is also supplied via these contacts.

When a key is inserted into a cylinder, the electronic communication is activated between the key and the cylinder. If the key is authorized to open the cylinder, the battery in the key powers the opening and closing function of the electronic blocking of the cylinder. Both the cylinder audit trail and key audit trail are stored simultaneously.

Notes

Prior to deployment of your new system, we highly recommend ABLOY technical training for your business security team. We offer a variety of customized hands-on training courses to teach your team how to properly operate, customize and support your new Intelligent Key System.

Our experts will work side-by-side with your team to give them a running start, enabling your new system to operate at peak performance on Day One. If there's ever an issue, we'll provide fast, professional and cost-effective assistance by phone, email or online.

The ABLOY Professional Services team can also help ensure your system's optimum performance by providing on-site support for long-term engagements on a day-to-day basis.

By providing ongoing expert consultancy, ABLOY consultants can expedite troubleshooting and help you define risk mitigation strategies during upgrades of ABLOY solutions, allowing you to reduce training costs for your staff.

Enterprise System Support Silver SW-504 Silver

Enterprise System Support – Silver Software System Support; Extended phone support; 6am – 8am and 5pm – 7pm Eastern, Monday – Friday; 2 hour response time to email requests; Real time phone support; Up to 35 tickets annually

Enterprise System Support Gold SW-504 Gold

Enterprise System Support – Gold Software System Support; Extended phone support; 6am – 8am and 5pm – 10pm EST, 7 Days per week; 1 hour response time to email requests; Real time phone support; Up to 50 tickets annually

Remote Training SW-503 Remote

Web Based Training Online training setup to meet your planning schedule.

Additional Training Based on New Staff/Turnover Online training to help you keep up with new staff requirements.

Onsite Training SW-503 Site

Hands-on Training In depth face to face training for our hardware and software applications.

Detailed Product Installation Classes On site classes to train your employees on site-specific hardware installation.

All prices are U.S. NET, and not subject to dealer discounting. T&E charges will be quoted upon request.

The ABLOY Professional Services team will work closely with your company's in-house team to assist with your new system's planning and design, deployment & integration, and on-going support and training. Together, we will ensure that your new ABLOY Intelligent Key System is up and running on Day One and operating at peak efficiency.

Ask your ABLOY sales representative to customize a ABLOY Professional Services program for your company's specific needs. Let's make the most of your investment!

Training Certification Classes SW-505Site

Personalized on-site factory technical certification class(es).

ABLOY will conduct field training, demonstrate sample equipment, and certify students on service, maintenance, and support. These are the same certification classes given at factory and trade shows.

Master Key Consultation SW-506Site

Master key system design consultation with an ABLOY key system design expert.

In-person key system design consultation with a system design expert. We will assist you in the development of a master key system to meet your design specifications. The system will be uniquely tailored to your facility, resulting in custom Key System Schematics, bitting lists and pinning charts.

Key Management Consultation SW-507Site

Assistance in the design, implementation, customization, and best practices for sound key control.

Assistance in the design, implementation, customization, and best practices for sound key control products and key management policies and procedures that will minimize liabilities and extend key system lifespan. A key system investment will be maximized by deploying these sound key management practices.

Installation Inspection SW-508Site

Project product installation and operation inspection and certification.

Security is the key to success

Everyone needs to be secure. Governments, companies, organizations and private individuals.

Criminal acts, violence and breakdowns in information transfer, production and distribution occur increasingly often in everyday life – good reason to ensure that there are no gaps in your security. Everyone can then concentrate on what is most important to them. Without having to worry.

Proven Durability

ABLOY® padlocks have been designed and manufactured to not only meet the requirements of the EN12320 padlock standard, but also exceed the requirements, as our own tests are significantly higher.

ABLOY® padlocks continued to operate smoothly throughout exhaustive durability tests such as the acetic acid salt-spray test – they are therefore the best possible alternative for use in unprotected locations where the environmental conditions are severe.

PL321 PL330 SWP330 PL341 PL340 SWP340 PL342 PL350 SWP350 PL362 SWP362

Abloy Oy has paid particular attention in design of environmentally friendly production methods.

As a result we use the most modern and environmentally friendly surface plating facility in Finland.

All the operations are qualified with the ISO9001 and ISO14001 certifications.

SECURITY GRADES ACCORDING TO THE EN12320 PADLOCK STANDARD

Requirements	Unit	1	2	3	4	5	6
Minimum number of differs		300	1000	2500	5000	10 000	20 000
Pulling of shackle/staple	kN	3	5	15	30	70	100
Twisting of shackle/staple	Nm	40	100	200	450	1200	6000
Cutting of shackle/staple	kN	6	15	25	35	70	100

Sawing	min				2	4	8
Torque resistance of cylinder plug	min		2.5	5	15	20	30

The best electromechanical lock system in the world.

Challenging weather and environmental conditions put stress on high security installations in railway networks.

ABLOY® SUPER WEATHER PROOF (SWP) padlocks are a locking solution in which the components are extremely well-protected to ensure operation in all conditions. Security is guaranteed, even with regular exposure to extreme heat or cold, storm-driven salt water, or desert dust.

TWO LEVELS OF PROTECTION

Mechanical SWP padlocks offer two levels of protection. The lower level can be upgraded to the higher one if required.

**SWP**

Shackle openings protected against the ingress of dust and water by sealed shackle.

STRONGER THAN EVER

Designed and manufactured in Finland, the excellent physical strength of ABLOY® padlocks provides extremely effective protection against forcing, picking, and vandalism. Case hardened boron steel shackles offer exceptional durability and have successfully passed demanding corrosion tests.

**SWP WITH CAP**

In addition to sealed shackle, a weather seal cap protects the keyway and cylinder.

Think ABLOY® PROTEC² CLIQ[®] for superior access control.

Securing rail infrastructure means more than protecting from trespassing, vandalism, and thievery.

Tracksides barriers, buildings and equipment need to be protected from trespassers, vandals and thieves. Extensive periods of construction and maintenance means staff and contractors need to be granted access to high risk areas at all times. And it's vital to ensure access is only granted to the right people at the right time.

ABLOY® cam locks have been developed to meet the highest levels of security in the field of equipment locking. Our extensive range consists of both standard products and a wide selection of customized products. The superior benefits offered by ABLOY® cam locks make them ideally suited to the most demanding, high security applications where valuables are located

either behind small doors or in enclosers, e.g. vending machines, cash dispensers, gaming machines, parking meters, pay phones, coin-operated laundry machines etc. Our long experience in high security products and our high levels of expertise guarantee you the best possible choice for your particular application.

ABLOY® EXPERTISE AT YOUR SERVICE

High-Security Perfection

The unique ABLOY® cylinder construction, patented cylinders, strict key control and extensive master keying capabilities make ABLOY® cam locks ideally suited for the most demanding applications.

Unique construction

Based on a unique operating principle which employs rotating detainer discs, ABLOY® cam locks offer advantages that other locking systems cannot achieve.

Virtually pickproof

Only the correct key can align the gates on all the discs and permit the locking bar to disengage the cylinder from the housing.

The ABLOY® PROTEC cylinder employs a new, patented disc blocking system (DBS) which makes it impossible to manipulate the cylinder so that it opens without the correct key.

Physical strength

ABLOY® cam locks combine excellence in design with the very latest engineering and production technology. Additional resistance to physical attacks is ensured by the use of case-hardened steel components.

Master keying Capabilities

Based on a unique operating principle which employs rotating detainer discs, ABLOY® cam locks offer advantages that other locking systems cannot achieve.

Resistance to harsh conditions

The ABLOY® cylinder contains no springs or pins which could cause it to malfunction in a wide range of environmental conditions. All the components are highly resistant to wear, dirt, moisture, corrosion or freezing conditions.

User-friendly

The disc control system and symmetrical key make ABLOY® cam locks easy to operate.

Cams

For cam locks in the universal range, three different cam models available: straight, hooked and offset. Cams are made of nickel-plated steel. Cams for the U.S. range of cam locks are available in the U.S. sales office.

Retail and banking

ABLOY time delay locks offer time protection in businesses that deal with money and valuables.

Time delay locks are used in variety of applications such as cash boxes, safes, connection boxes and gaming machines. EP310 is designed for applications

that requires high security locking with time protection. EP312 offers mechanical key security combined with electrical control to prevent unauthorised use of the key. Locks are available with CLASSIC and SENTRY key systems and can be keyed with other ABLOY cam and cabinet locks.

DOOR CLOSERS

Door Closers protect the door construction by controlling the opening and closing actions of the door. Energy is saved and security increased.

EXIT DEVICES

Exit Device keeps the door closed and locked from the outside but allows for hands-free, convenient exit from the inside. An alternative to lockcase and lever handle pair.

CYLINDERS

Prevents the lock from opening without the correct key.

ACCESSORIES

Correct Accessories guarantee well-functioning door with a long lifetime.

EL570

Handle controlled electric mortise lock for wooden and metal doors

The high security lock with electric lever handle control EL570 is used especially in situations where the advantages of handle-controlled unlocking have to be combined with the mechanical security requirements.

Tested according to ANSI 156.13 Grade 1

UL listed, 3 hour fire rating

FEATURES

- Backset 70 mm (2-3/4")
- Mechanical automatic deadlocking
- Non handed, left / right
- Exit side can be changed over
- Can be changed between fail-unlocked & fail-locked
- Dead bolt with 25.4 mm (1") throw
- Exit function by inside handle
- Suitable for fire doors
- Controllable external handle
- Mechanical override with cylinder from outside
- Monitoring functions
 - Door closed
 - Dead bolt and latch dead locked
 - Handle indication, inside and outside handle
- Forend: satin chrome
- Compatible with Abloy cylinder CY402

Available also as EL571 where both lever handle sides are electrically controlled.

Lever handles DH004 are ordered separately. Available in stainless steel (fire doors), chrome and satin chrome finishes.

EL410

Push & Pull – type electric mortise lock for narrow stile doors

ABLOY EL410 is fail locked type lock. The door can be opened by pushing or pulling when electric control is switched on. When electric control is switched off, the lock can be operated by key from outside and by handle from inside.

FEATURES

- Backsets 24.6 mm (31/32") and 28.6 mm (1-1/8")
- Mechanical automatic deadlocking
- Bolt throw 16 mm (5/8")
- Monitoring functions
 - Unlocked/locked
- Forend: satin chrome
- Compatible with Abloy cylinder CY402 and e.g. Adams Rite handle/paddle
- UL listed

Available also as EL411 which is fail unlocked type.

Compared to other solutions like magnet locks or electric strikes, electric locks give long-lasting security that will not wear out. Still electric locking provides ultimate mechanical strength but uses power only while opening.

With ABLOY Electric Locks you get

1. Complete solution
2. Energy saving
3. Safety with standards approvals
4. Aesthetic appearance
5. User friendliness
6. More functions

LC500

Series mechanical mortise locks

High quality and performance lockcases with long lifetime.

Technical features

- Backset: 2-3/4"
- Forend: Adjustable stainless steel backplate (32D)
- Deadbolt: Stainless steel with hardened roll pins, 1" throw
- Latch: Solid stainless steel with antifriction latch lever, 3/4" throw (reversible)
- Auxiliary Deadlatch: 1/2" throw (reversible)
- Easy change of handing
- Compatible with Abloy cylinder CY402
- ANSI 156.13 Grade 1
- UL listed, 3 hour fire rating

Comes with stainless steel (32D) lever handle set.

Two lever handle and trim options.

SER30031	CLIQ Web Manager dedicated SaaS max. 1000 components	\$2,850.00
SER30033	CLIQ Web Manager dedicated SaaS max. 5000 components	\$3,800.00
SER30034	CLIQ Web Manager dedicated SaaS max. 10 000 components	\$4,740.00
SER30036	CLIQ Web Manager dedicated SaaS max. 20 000 components	\$5,700.00
SER30038	CLIQ Web Manager dedicated SaaS more than 20 000 components	Quote

Please ask for a quote CLIQ Web Manager Dedicated SaaS is a premium high availability software service for customers with high level security needs.
It brings the customer peace of mind with a full solution SaaS service. The service includes the following (differences to standard are bolded):

- Latest version of CLIQ Web Manager including updates twice a year
- CLIQ Web Manager installation into a dedicated High Availability environment
- Dedicated application servers with resources optimized to ensure the best possible performance for the "Planned System Size"
 - * Dedicated components
 - Dedicated application servers offering possibility to agree maintenance windows based on customers' business requirements
 - Dedicated load balancer
- Shared components
 - Database is on a shared database server but data logically separated and encrypted
 - Active Directory
 - Monitoring for the environments
 - 24/7 monitoring and capability to respond to incidents related to the service provider
 - 24/7 monitoring for security incidents
 - Support for incidents reported by the customer to software services during business hours
 - Up-to-date underlying infrastructure with latest security patches applied
- Antivirus solution with latest patches applied
- Physical security of the infrastructure
- Regular backups of the database and virtual machines
- 99,5 % availability
- Automatic process to update MKS database with latest components ordered by the customer
- Maintenance schedule agreed with the customer for the dedicated components.

For shared components maintenance schedule is defined by Abloy and customer is informed minimum 2 weeks before.

- Integration interface from CLIQ Web Manager Dedicated SaaS to customer's system
- Monthly performance report provided by ASSA ABLOY

Professional services

3.1. Integration

Part Number	Name	PRICE
SER40020	Customer specific integration (hourly fee)	\$320.00

The integration services ensures that integration between the client's system and the CLIQ Web Manager software is stable and is in accordance with ABLOY Oy's instructions. The service does not include the actual programming of the integration unless it has been agreed upon in the offer.

3.2. Migration

Part Number	Name	PRICE
SP370	Migration KEYCONTROL to CLIQ Web Manager (Software as a Service or In-house installation)	\$2,760.00

When the migration concerns a system transfer from ABLOY KEYCONTROL to CLIQ Web Manager, the Migration Analysis is always required.

The analysis is free of charge and it is requested by a form which can be downloaded from ABLOY CORE.

The actual migration is charged according to the valid price list.

Terms &
Conditions

Notes

1. General; Definitions

1.1 Entire Agreement

Unless otherwise agreed to in writing by ABLOY, Inc. ("ABLOY"), the terms and conditions contained herein constitute the entire agreement between the parties with respect to the subject matter hereof and supercede all prior communications and agreements. Acceptance by ABLOY of Buyer's Order, or Buyer's acceptance of ABLOY's proposal, is expressly limited to and conditioned upon Buyer's acceptance of these terms and conditions which may not be changed or waived except in writing signed by the parties. Any additional, inconsistent or different terms and conditions contained in Buyer's purchase order or other documentation are hereby expressly rejected.

1.2 Definitions

In these terms and conditions of sale: (i) "Buyer" means the person or entity who accepts a quotation of ABLOY for the sale of the Products or whose Order for the Products is accepted by ABLOY; (ii) "Conditions" means the standard terms and conditions of sale set out in this document and includes any special terms and conditions agreed to in writing between Buyer and ABLOY; (iii) "Order" means an order for Products placed by Buyer with ABLOY and accepted by ABLOY; (iv) "Products" means the products ordered by Buyer and shall include all products, parts and accessories furnished to Buyer by ABLOY.

2. Shipping; Delivery

2.1 Terms of Shipment

Unless otherwise agreed to in writing, all Products are shipped F.O.B. ABLOY's location. ABLOY reserves the right to deliver in installments.

2.2 Shipping Charges

Subject to Section 2.3, ABLOY will pay all shipping charges in advance of shipment only for shipments of \$1,500.00 net Continental U.S. or more with delivery to Buyer at a single location. Buyer will pay all shipping charges in advance of shipment for all shipments that are less than \$1,500.00 net Continental U.S. or that require delivery to Buyer at more than a single location. Such charges will be added to Buyer's invoice. A shipping & handling charge of \$1.05 per shipping carton will apply to shipments.

2.3 Choice of Carrier; Route

Unless otherwise requested on Buyer's Order, ABLOY will ship by carrier and route of its choice to any freight

service point within the continental United States. If Buyer requests a carrier or route on its Order, ABLOY will deliver in accordance with such request and Buyer will pay the entire amount of all shipping charges in advance of shipment.

3. Title and Risk of Loss

Subject to Section 5.3, title to and risk of loss of each Product purchased by Buyer shall pass to Buyer and delivery shall be deemed to be complete upon transfer of the Products to a carrier for shipment at ABLOY's location or the Products otherwise leave the possession or control of ABLOY. This Section 3 shall survive any expiration or termination hereof.

4. Orders

4.1 Acceptance

Orders can be sent to ABLOY via the following 3 methods:

Mail: ABLOY SECURITY, INC. 6005 Commerce Drive #330, Irving, TX 75063 USA

Fax: 972.753.0792

E-mail: Orders.Abloy@assaabloy.com

ABLOY reserves the right to refuse Orders and is not bound to honor any Order unless and until such Order has been accepted by ABLOY. ABLOY may refuse an Order by delivering notice, orally or in writing, of such refusal to Buyer within ten (10) days of ABLOY's receipt of such Order. Orders will ship Partial unless Master Keyed or otherwise noted on Purchase Order).

4.2 End User Security Authorization Procedures.

To insure proper control of End User restricted products, ABLOY requires that the End User complete a Delivery of Controlled ABLOY Components for End Users Form. The form will indicate where and to whom their restricted product will ship upon leaving the ABLOY factory. All orders involving an End User restricted product must be signed by the proper **authorized personnel on file at ABLOY**. This is critical in order to maintain the integrity of the End User's key system. ABLOY will honor the specific, written instructions of the **authorized personnel** for the shipping and handling of each purchase order. Such instructions must be included with each order. A copy of the End User Controlled Product Delivery Form is available by contacting ABLOY customer service or the local ABLOY sales representative. Please note the option of blanket authorization on the form. If the end user chooses this option, it is the end user's responsibility to keep the authorization current and on file. ABLOY does not

maintain any files of blanket authorizations. **A copy of a CURRENT authorization form signed by an authorized signatory must accompany every Distributor purchase order containing End User restricted product sent to ABLOY whether the product is shipping to the End User location or not.** All orders not having this form will be suspended indefinitely or until such form is produced. In the event that any change occurs in the authorization of any End User personnel, ABLOY will require that official written notification be made to ABLOY by the End User on their letterhead before additional orders will be released. A copy of the authorization form **“Controlled Product Delivery Form”** can be found on our website at www.ABLOYlock.com. From the home page select **“Resources”**, select **“Forms and Applications”**, then click on **“Download the Controlled Product Delivery Form Now”**.

4.3 Order Identification

All packages are identified as to contents and assigned an Order number. The Order number also appears on Order acknowledgements, packing slips, freight bills and invoices.

4.4 Packing

Unless otherwise specified, all locks and cylinders are packed individually.

4.5 Changes and Cancellations

No Order that has been accepted by ABLOY may be changed or cancelled by Buyer unless ABLOY agrees to such change or cancellation in writing. Buyer will indemnify ABLOY in full against all loss (including loss of revenue), costs (including the cost of all labor and materials used), damages, charges, and expenses incurred by ABLOY. Changes will result in a delay in the scheduled ship date. Additions to Orders will be entered as a separate Order. Special Orders for non-cataloged items and any Orders that are within sixty (60) days of the original shipment date are not subject to cancellation.

4.6 Return Products Authorization

Return Products will not be accepted unless authorized in advance in writing by ABLOY. Used or damaged items will not be accepted. Products returned to ABLOY for credit must be received by ABLOY within sixty (60) days of initial shipment and must be in saleable condition. The value of goods returned is subject to appraisal as to physical condition. Returns will only be accepted for credit invoicing and a minimum handling charge of 40% will be debited. All returned Products must be shipped F.O.B.

ABLOY's location, freight prepaid. Credit will not be issued for missing parts. Requirement for returns are: the ordering distributor must request a Return Goods Authorization (RGA) in writing through the same process that purchase orders are done. Each item being returned must have full item description with the original purchase order number that the item was ordered under or the ABLOY order number that the item was shipped under which can be found on the item box label marked “Order No” or REF#.

Return Goods Authorization is then approved or denied through ABLOY's established internal process. In either case the requesting distributor is notified by ABLOY in writing. If approved, distributor will receive in writing a Return Goods Authorization Number and instructions for marking containers for authorized items being returned.

Once received, items are physically inspected and checked against the RGA. Information will then be forwarded to the credit department where credit invoicing will be applied. Any items sent by distributor that are not listed as part of the authorized return will not be credited and ABLOY will not be responsible for return of these items to the shipper. ABLOY will not accept Keyed Cylinder returns.

ABLOY RGA Center

6005 Commerce Drive #330, Irving, TX 75063 USA

5. Price; Taxes; Payment

5.1 Price

Unless otherwise agreed to in writing, the price for the Products shall be ABLOY's prevailing price at the time the Order is accepted by ABLOY or any other price quoted in writing to Buyer. ABLOY's price lists are for general

information only and do not constitute a binding, open offer by ABLOY for the sale of Products. ABLOY reserves the right to modify its standard prices at any time without notice; prices for some Products may change frequently due to market fluctuations.

5.2 Taxes

Buyer shall pay the full amount of any tax or other charge now or hereafter imposed by law upon, with respect to, or measured by the sale, shipment or price of any Product sold hereunder, including without limitation any handling charges; federal, state, or local sales, use, excise, value added, gross receipts or other like taxes; customs duties; and any insurance desired by Buyer. If Buyer is exempt from an applicable tax or duty, then Buyer must provide ABLOY with a valid

exemption certificate before shipment of Products. Foreign shipments placed with ABLOY may require additional charges for documentation and overseas packaging. Such charges will be identified on ABLOY's invoices. This Section 5.2 shall survive any expiration or termination hereof.

5.3 Payment

Unless otherwise agreed to in writing, payment is due thirty (30) days from the date of the invoice. If payments are not made when due, Buyer will pay, in addition to the overdue payment, a late charge equal to the lesser of 1.5% per month or the highest applicable rate allowed by law on such overdue amounts. Overdue accounts will be assigned to the credit department for all transactions.

Once an account has been assigned to the credit department, no Order may be taken, entered or shipped without approval from the credit manager. Buyer hereby grants ABLOY a purchase money security interest in each Product and agrees to cooperate with ABLOY in protecting such interest.

6. Insurance

6.1 Insurance Coverage

Buyer shall procure and maintain, at its expense, the following types of insurance from an insurer acceptable to ABLOY, in the amounts at least equal to those specified below, with deductibles not in excess of \$100.00. ABLOY shall not be required to supply Products to Buyer at any time that the insurance coverage provided for herein is not in full force and effect.

6.2 Certificates

Buyer shall, within fifteen (15) days from the date hereof, furnish ABLOY with a certificate of insurance issued by the insurance company or companies issuing the insurance policies required hereby. Such certificates shall provide that written notices shall be given to ABLOY at its address specified herein at least forty-five (45) days prior to any cancellation or change in any such policy.

7. Warranties and Limitation of Liability

7.1 Warranty

ABLOY represents and warrants the Products against defective material and faulty workmanship for a period of one year after the date of delivery [and warrants the finish to meet quality standards at the time of delivery]. This warranty expressly does not apply to faulty product operation due to: (a) improper installation; (b)

the use of any keys, cylinder pins or other accessories not expressly approved by ABLOY; or (c) failure to provide reasonable maintenance. ABLOY will not warranty cross-keyed cylinders.

7.2 Limitation of Liability

ABLOY's liability under this warranty shall be limited solely to the repair or replacement of the Products, or parts thereof, or refund to the Buyer of the purchase price thereof. ABLOY shall not be responsible for any defect or non-conformity in the Products that: (a) is created after the time of delivery; (b) results from Products for which materials, specifications or designs were provided by Buyer; or (c) results from modifications to the Products by Buyer or others. IN NO EVENT SHALL ABLOY BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN CONTRACT, WARRANTY, NEGLIGENCE, TORT, STRICT LIABILITY, OR OTHERWISE including but not limited to loss of profits or revenue, loss of use of the Products, delays, or claims of customers of the Buyer or other third parties for such other damages. ABLOY's liability on all claims, whether in contract, warranty, negligence, tort, strict liability or otherwise for any loss or damage arising out of, or connected with an Order or the performance or breach thereof, or from the design, manufacture, sale, or delivery shall in no case exceed the purchase price of the Product.

7.3 No Other Warranties

EXCEPT AS EXPRESSLY SET FORTH IN SECTION 7.1, ABLOY MAKES NO OTHER REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, AT LAW OR IN EQUITY, WITH RESPECT TO THE PRODUCTS OR THEIR CHARACTERISTICS, QUALITY OR PERFORMANCE, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT OF ANY INTELLECTUAL PROPERTY RIGHTS OF THIRD PARTIES AND ANY SUCH REPRESENTATIONS AND WARRANTIES ARE HEREBY EXPRESSLY DISCLAIMED.

8. Claims

Buyer must notify ABLOY of any claim [for adjustment] in writing at ABLOY's address specified herein within thirty (30) days after the date of the invoice in question. Buyer must notify ABLOY of any claim for shortages or incorrectly filled Orders in writing within ten (10) days after receipt of shipment. Under no circumstances will ABLOY be responsible for any charges for labor or material incurred by others without the prior written consent of ABLOY.

9. Indemnity

9.1 Personal Injury and Property Damage Buyer shall indemnify ABLOY and hold ABLOY harmless against all claims, liability, loss or other damages (including ABLOY's legal expenses) to all persons for injury of any nature, including, without limitation, sickness, and/or death, and for property damage caused by any Product or part thereof after the time of delivery of such Product or after such Product otherwise leaves the possession or control of ABLOY.

9.2 Compliance with Law

Buyer agrees: (a) to fully comply with all applicable federal, state and local laws, rules, regulations and guidelines, including without limitation, all applicable regulations and guidelines promulgated, from time to time, by Federal and state environmental and transportation officials, and (b) to indemnify and hold harmless ABLOY from and against all claims, liability, loss or other damages (including ABLOY's legal expenses) resulting in any way from non-compliance therewith.

9.3 Survival

This Section 9 shall survive any expiration or other termination hereof.

10. Trademarks and Other Markings

Buyer shall remove any and all of ABLOY's trademarks, labels, distinctive markings, and designs which may appear on any Product or on the packaging material therefore at the time of delivery of such Product and to refrain from making any use of such trademarks, labels, distinctive markings and designs.

11. Miscellaneous

11.1 Governing Law

The validity and interpretation of these terms and conditions of sale shall be governed by the laws of the State of Connecticut without regard to its principles of conflicts of law.

11.2 Force Majeure

ABLOY shall not be liable for its failure to perform hereunder due to any contingency beyond its reasonable control, including without limitation acts of God, fires, floods, wars, sabotage, accidents, labor disputes or shortages, governmental laws, ordinances,

rules and regulations, whether valid or invalid (including, but not limited to, priorities, requisitions, allocations, and price adjustment restrictions), inability to obtain material, equipment or transportation, and any other similar contingency. In the event of delay due to any such cause, the date of delivery will be postponed by such length of time as may be reasonably necessary to compensate for the delay.

11.3. No Assignment

These terms and conditions of sale are not assignable or transferable by Buyer, in whole or in part, without the prior written consent of ABLOY.

11.4 Modification

No modification or waiver of these terms and conditions of sale shall be effective unless made in a writing signed by ABLOY. No course of action shall be deemed to modify these terms and conditions of sale.

11.5 Severability.

Whenever possible each provision and term of these terms and conditions of sale will be interpreted in a manner to be effective and valid but if any provision or term hereof is held to be prohibited by law or invalid, then such provision or term will be ineffective only to the extent of such prohibition or invalidity, without invalidating or affecting in any manner whatsoever the remainder of such provision or term or the remaining provisions or terms hereof.

Proposition 65

Proposition 65, also known as the Safe Drinking Water and Toxic Enforcement Act of 1986, is a California law that was approved by voters in November 1986. Its primary purpose is to protect California citizens from exposure to toxic chemicals by safeguarding the state's drinking water sources. The statute prohibits businesses from knowingly discharging listed chemicals into drinking water sources.

Proposition 65 also requires that a business selling products that contain certain identified chemicals in excess of defined levels, provide a clear and reasonable warning of the potential hazard. For many listed Proposition 65 chemicals, no warning is required on products determined not to exceed "Safe Harbor" levels of exposure. Proposition 65 is administered by the California Office of Environmental Health Hazard Assessment (OEHHA), which publishes a list of chemicals known to cause cancer or birth defects. This list is periodically updated and currently contains over 800 chemicals. **The list is accessible at www.oehha.ca.gov/chemicals.**

We at ABLOY Security, Inc. and ASSA ABLOY and our directly or indirectly wholly-owned subsidiaries or affiliated group companies are committed to providing safe and compliant products for our customers. Our goal is to continually work with our vendors, supply chain partners, and resellers to source responsibly and to comply with regulatory and reporting requirements, including providing product warnings to our customers as required by laws like Proposition 65.

Approved Warnings – New OEHHA warning regulations that took effect on August 30, 2018, require more detailed product labelling. ASSA ABLOY ensures that its products that require Proposition 65 warnings are labelled in accordance with these new regulations, including identification of specific chemicals and exposure types. Specific product labels reflect the chemical composition of the labeled product. Below is an example of a label which may appear on ASSA ABLOY products in order to comply with this regulation:

WARNING: This product can expose you to chemicals including lead, which is known to the state of California to cause cancer and birth defects or other reproductive harm.

Conflict Minerals

Armed groups engaged in mining operations in the Democratic Republic of the Congo and adjoining countries are believed to be subjecting workers to serious human rights abuses and are using proceeds from the sale of conflict minerals (tantalum, tin, tungsten, and gold, or “3TG”) to finance regional conflicts. In response to these concerns, the US Congress enacted Section 1502 of the Dodd–Frank Wall Street Reform and Consumer Protection Act aimed at preventing the use of conflict minerals that finance or benefit these armed groups. The legislation requires US publicly traded companies using conflict minerals in their products to disclose the source of such minerals.

For more information on Conflict Minerals and Section 1502 of the Dodd–Frank Wall Street Reform and Consumer Protection Act, please access the final rule on the SEC website:

www.sec.gov/rules/final/2012/34-67716.pdf

Updates to ASSA ABLOY Opening Solutions Americas Division conflict minerals status and policy will be posted on our sustainability website:
