ABLOY

Welcome to the keyvolution

Digitalisation has created new possibilities for secure wireless and digital security technology. At Abloy we are always aspiring to meet our customers' latest challenges in modern global security. In doing so, we constantly innovate and develop our digital portfolio. The latest is a transformation of our world leading locking technology into a new, highly secure, digital key. Our customers are provided with an entirely new solution of high-end digital security and efficiency.

ABLOY BEAT — a new dimension in high-end digital security solutions

Introducing ABLOY BEAT – our new digital solution, featuring a newly designed Super Weather Proof Bluetooth padlock, operated with a mobile app and digital key with the Seos® credential technology. ABLOY BEAT offers best-in-class security and privacy protection, heralding a new era of effortless connectivity via our mobile application. BEAT is always in sync with your security situation within all critical infrastructure, industry and businesses. It's the latest addition to our digital portfolio for generations to come.

A specially designed Super Weather Proof Bluetooth padlock

ABLOY BEAT features a newly designed, keyless padlock. It is Super Weather Proof and IP68 approved, with a Bluetooth BLE 4.2 connection range of 50m. Made to perform in the most demanding environments at all times. Online and offline connection available.

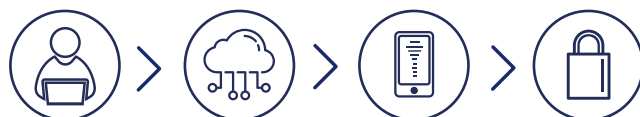

The convenience of mobile app access

The ABLOY BEAT mobile app allows activation of users' own access rights and flexible access to specified locations, syncing all rights and movements with ABLOY OS. Especially useful in remote areas, busy schedules and emergency cases from wherever you are. Travel and key logistics are drastically simplified, saving on emissions, costs and time.

Best-in-class privacy and security

Seos® credential technology from HID global provides best-in-class security and privacy protection for our new digital key that operates our Super Weather Proof Bluetooth padlock via the ABLOY BEAT mobile application.

The benefits of ABLOY BEAT

Secured with best-in-class Seos® credential technology

Easy to use mobile application

Convenience of a keyless solution

High-end digital security for all environments

Super Weather Proof (SWP) IP68 approved

Full audit trail

Online/Offline access

Bluetooth padlock

Managed with ABLOY OS or integrated with 3rd party systems

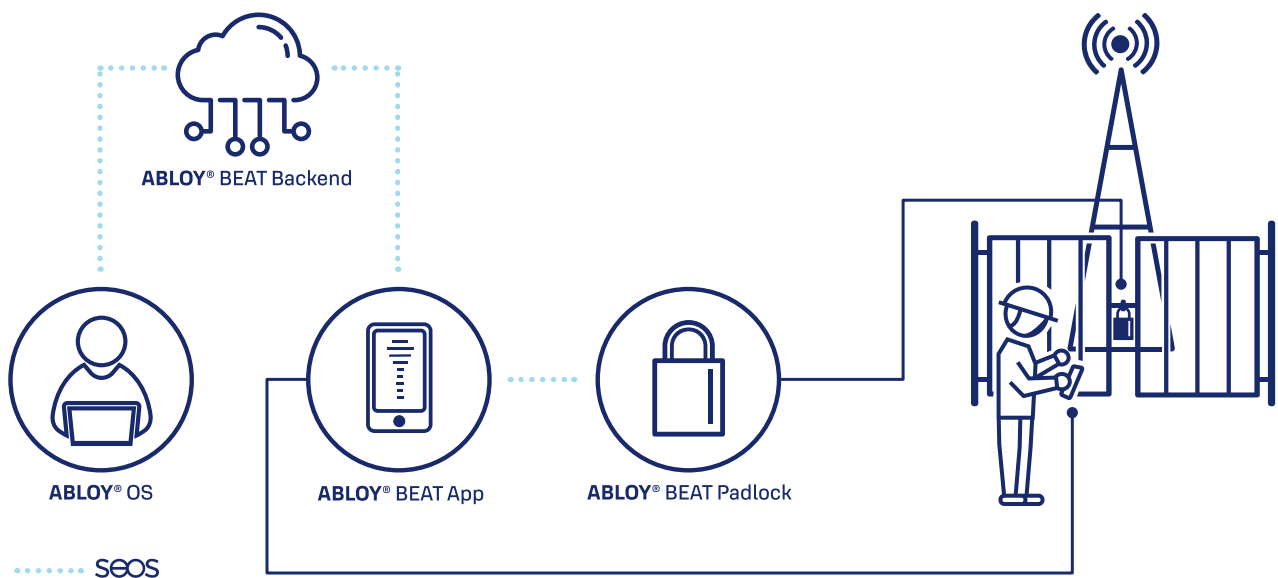

Latest addition to our future-proof digital portfolio

Managed with ABLOY® OS or added into your existing workflow

Integration with ABLOY OS enables managing keys, locks, and access rights on-the-go, remotely from a single, highly visual and easy to use interface. BEAT can be integrated with 3rd party systems, or added to your existing workflow.

How it works

- ABLOY BEAT solution is managed with ABLOY OS visual user interface.
- ABLOY BEAT padlocks are operated with users' mobile phones.
- Users are invited into ABLOY OS and BEAT backend systems with their mobile phone numbers.
- Each mobile device will be registered with advanced credential technology.
- Similarly, each BEAT lock will also have a unique ID so that all access tokens are granted for specified locks and users for a certain time frame.
- BEAT locks can be operated without cellular connection when access rights are updated on the mobile devices before entering the offline area.
- ABLOY OS provides full control to track, audit and administer all access rights remotely, from wherever you are.
- Users enjoy the benefits of secure and convenient mobile connectivity and access, on the go.

ABLOY BEAT adds operational excellence to critical infrastructure, business and industry

Always in sync with your security situation, keeping a smooth flow of all your contractors and employees, while tracking every movement. For high-end security and comprehensive critical infrastructure, business and industry protection including:

Utilities

Mining

Telecom

Transportation and Logistics
