PROTECT YOUR WATER OR WASTEWATER FACILITY WITH A MEDECO INTELLIGENT KEY SYSTEM

Safe drinking water is a prerequisite for protecting public health and all human activity. Properly treated wastewater is vital for preventing disease and protecting the environment.

That is why it is imperative that these critical infrastructure sectors are protected with a sophisticated physical security and access control system that will thwart or prevent physical attacks and cyberterrorism on your facility.

Medeco Security Locks, an American company revered for its 50+ years of providing high security locks and locking systems, stands ready to assist America's water and wastewater facilities. You can mitigate risk related to access control and physical security threats by simply implementing a Medeco intelligent key solution. The Medeco solution retrofits existing hardware. No hard wiring is required, so installation is fast, efficient and cost-effective!

To assess your security needs, follow the G430-14 standard guidelines.
To identify potential threats, use J100-10 standard guidelines.
