Schlage Control™
Smart Lock

Connect and control more doors.

A whole lot easier than ever before.

Security has always been at the heart of all our products.

Today we can deliver so much more.

Walter Schlage invented the cylindrical lock in 1920; since then Schlage has consistently delivered innovation and continuous improvement. Now, we continue to add the latest technology to our world-class locks to deliver a new level of efficiency and convenience for your facility.

With built-in intelligence, secure communication technology and the ability to read mobile credentials, Schlage Control,™ LE, and NDE wireless locks and CTE controller used with ENGAGE web and mobile apps can help:

- Increase productivity by managing locks/devices and electronic credentials from virtually anywhere
- Provide the security and convenience of using mobile devices to gain access
- Save time by eliminating the need to visit locks/devices to make changes
- Review and export lock/device usage and history for detection and diagnostics

So if you are looking for an affordable way to improve security while reducing operational costs, open the door to Schlage electronic solutions.

Bring the added benefits of electronic solutions to any door.

Reduce the time
and costs associated
with managing keys due
to frequent turnover

Enhance security
with more visibility
and control

Increase efficiency
by enabling
updates to occur from
virtually anywhere

We offer a variety of options for interior and perimeter openings.

Mitigate risks
associated with lost or
stolen keys, provides
a detailed audit of events

Increase satisfaction
by enabling convenient
card access to shared
spaces

Integrates seamlessly
into 3rd party
PACS systems if
needed¹

Electronic credentials change the game.

- Credentials can be issued to residents, employees, visitors or service providers with restrictions to specific days and times
- Electronic credentials can be quickly added and revoked from anywhere
- Single credential can be used across a campus or facility including resident entry, common areas and amenities
- Enjoy the convenience of using a card, smart fob, PVC disk, smart wristband or smart device to open doors

Schlage mobile access credential

The new Schlage Mobile Access Credential enables users to utilize a mobile device instead of a physical badge or key to gain access to an opening.

- Increased convenience and security for users
- Improved efficiencies for administrators
- Easy to use and manage
- Features advanced asymmetric encryption for added security and peace of mind
- Works even when there's no internet or cellular connection
- Available for iOS and Android phones

The Schlage Mobile Access Credential is available for sites managed by ENGAGE web and mobile apps and use Schlage mobile enabled locks and readers.

ENGAGE™ cloud-based web and mobile apps

Whether you're looking to use electronic access control for the first time, or simply need an easy-to-use solution to manage your site, ENGAGE cloud-based web and mobile apps make it easy to connect and control doors from anywhere. ENGAGE improves efficiencies and provides the data you need to manage your business more effectively.

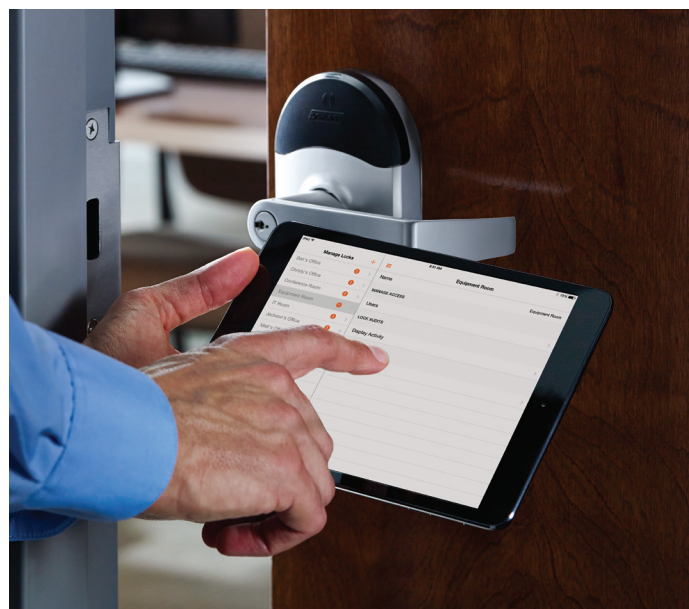

The ENGAGE™ cloud-based web and mobile applications deliver simple and convenient site set-up as well as the ability to manage users, assign access privileges and view audits and alerts from anywhere.

ENGAGE now has the capability to issue and manage the Schlage mobile access credential - giving users the security and convenience of using their mobile device to gain access to ENGAGE managed openings.

Flexible ENGAGE solutions deliver a whole new level of ROI:

- Mitigate risks by providing more visibility and control to each opening
- Improve productivity by setting automatic lock and unlock schedules to common areas
- Improve efficiency by having the ability to remotely add and delete user access rights from anywhere
- Improve satisfaction by issuing one credential that can be used for across an entire property or site

For solutions requiring real time updates please contact Allegion
at 877.671.7011 or visit us.allegion.com/alliances

Manage access

Manage your site from anywhere with ENGAGE cloud-based web and mobile applications.

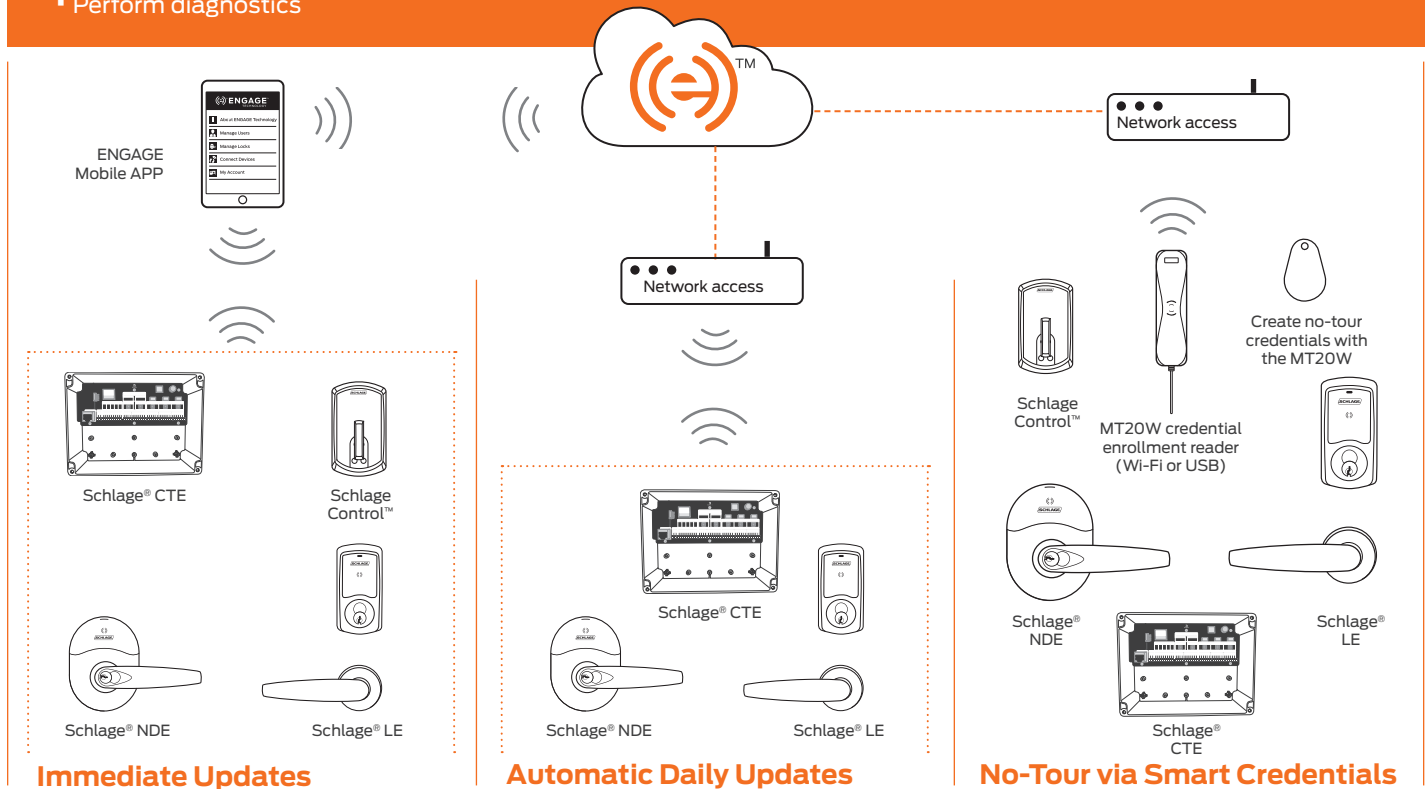

- Configure lock/device settings
- Add new users and enroll credentials
- Manage users and assign access privileges
- New! Set lock schedules, holidays, user schedules
- View and export audits and alerts
- Invite others to assist with administration

For more information and for recommended technology requirements, download the ENGAGE™ web and mobile app data sheet from us.allegion.com

Update locks and devices

Send updates wirelessly at the lock with the ENGAGE mobile application on a Bluetooth® enabled smartphone or tablet. Or leverage the existing Wi-Fi network or built-in No-Tour capability to send periodic updates without visiting the lock.

- Update access rights
- Update lock/device settings
- Update firmware
- Perform diagnostics

Immediate Updates

Send updates at the lock, anytime, with the ENGAGE mobile app. Available on Schlage Control™ LE, NDE and CTE.

Automatic Daily Updates

Connect locks to the Wi-Fi network for automatic daily updates. Available on Schlage NDE, LE and CTE.

No-Tour via Smart Credentials

Eliminate the need to visit the locks by using smart credentials to deliver updates to access rights. Available on Schlage Control™, LE, NDE and CTE.

About Allegion

Allegion (NYSE: ALLE) is a global pioneer in seamless access, with leading brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Focusing on security around the door and adjacent areas, Allegion secures people and assets with a range of solutions for homes, businesses, schools and institutions. Allegion had \$2.9 billion in revenue in 2019 and sells products in almost 130 countries.
