

CORBIN RUSSWIN MORTISE LOCK - ELECTRIFIED BY COMMAND ACCESS

Common Applications Include:

- Stairwell Doors
- Lobby Entrance Doors
- Classrooms
- Computer Rooms
- Exterior Doors
- Any room requiring access control and life safety

Application:

This Corbin Russwin Mortise lock electrified by Command Access allows access and egress control for heavy use applications where security is critical. The lock maintains the appearance of the non-electrified Corbin Russwin ML series locks but can be remotely electrically unlocked (EU) or locked (EL).

The lock receives its power from wiring that passes through a 3/8" hole (wire chase) that runs from the mortise pocket to one of the hinge cut-outs. The power is then passed from the hinge cutout to the wall with one of our ETH series hinges.

MODELS:

- ML03/05EU - Electrified Storeroom Function
(Fail Safe/Secure)
- ML01/04EU - Electrified Institution Function
(Fail Safe/Secure)

FEATURES:
