DESCRIPTION

CAMDEN DOOR CONTROLS 4000/5000 Series of push switches are heavy duty pushbuttons, specially designed and manufactured to meet the stringent demands of exit controls. Buttons are available in either green, red, or blue, 1⁵/₈ " or 2³/₈ " diameter. They are supplied with a 1/4 " thick brushed aluminum plate in 1³/₄ " or 2³/₄ " widths. Optional duranodic finish (US 40) is also available.

No set screws are required, due to the bayonet interlocking of the modular assembly. Buttons are free spinning, for additional protection against vandalism.

The switches are UL/CSA approved, rated at 10 amps @ 125V AC. The design of the CAMDEN Push Button is modular, so that the contact block switches can be stacked to control up to six distinct functions simultaneously. They can be configured for either spring return (momentary), push / pull (maintained), or push/turn to release (maintained) operation. Optional 1-60 second pneumatic timer. Pneumatic timer features 10 amps @ 125 - 250 VAC DPST (N/O and N/C) contacts.

APPLICATION

CAMDEN Push Switches are ideal for high traffic areas, such as store and building front entrances, and exits. They can be surface, flush, or mullion (narrow stile) mounted.

CAMDEN Push Switches are designed to control overhead doors, electric locks, electro-magnetic locks, electric strikes, automatic doors, and handicap operators. They may also be used for shunting, bypassing alarms, request to exit, timed functions, and other applications. The switches are made for high frequency usage, in an indoor or outdoor environment. CAMDEN Push Switches are versatile, and are supplied in various configurations to suit commercial, industrial and residential applications.

MUSHROOM PUSH SWITCHES

ARCHITECTS / ENGINEERS SPECIFICATIONS

The push switch(es) to be used throughout the site/complex shall be CAMDEN DOOR CONTROLS CM-4000/5000 SERIES Push Switches.

The button shall be designed to be easy to activate, 1⁵/₈ " or 2³/₈ " in diameter. The faceplate shall be constructed of 1/4 " thick aluminum, and shall be supplied with stainless steel Torx or snake eye security screws. The push button shall be free spinning for additional protection against vandalism.

Rating for all electrical contacts, shall be a minimum of 10 amps @ 125V ac. The switch used shall be a UL/CSA approved type, supplied with color coded spade leads. The switch assembly shall be modular, allowing for up to six distinct functions upon activation of the push button. The mounting shall employ a bayonet assembly, so that no set screws are required to secure the free spinning button.
