

RADIO KEY® RKAT

Audit Trail Module with Software

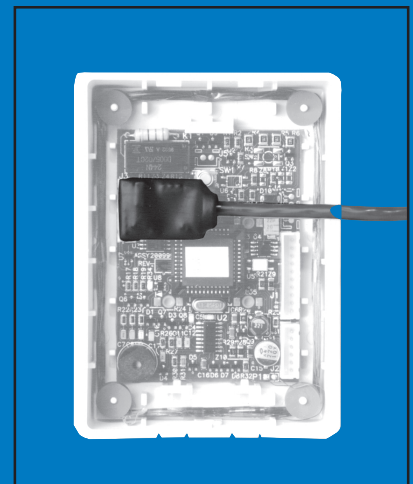

RK-LINK™ SOFTWARE

The RKAT Audit Trail Module for the Radio Key® 600 adds powerful transaction history capability at minimal cost.

By connecting a serial printer, the user can print date and time stamped transactions as they occur, a key tag/PIN status report, or a list of the last 150 transactions. The programming keypad is used to select print functions. With a PC, the user can program the unit, produce reports with user names and information, backup/restore key tag/PIN programming or copy programming from one Radio Key® 600 to another.

The module plugs permanently into the RK600 circuit board, and fits inside the reader housing. A four-wire cable with a DB-9 connector is included for easy connection to a PC or to a Serial Printer with a customer-supplied gender changer. Secura Key's optional CBLSA cable kit and a customer-supplied, six conductor, RJ-11 wall jack allows the temporary connection of a portable printer or laptop PC. RK-LINK™ software for Windows® 95/98/Windows NT® is also included.

- PROGRAM UNIT WITH PC
- UPLOAD HISTORY TO PC FOR DISPLAY/PRINTOUT
- UPLOAD KEY TAG OR PIN STATUS TO PC
- DOWNLOAD KEY TAG OR PIN STATUS TO RK600 FROM PC
- COPY KEY TAG OR PIN STATUS FROM ONE RK600 TO OTHERS USING A PC
- RS-232 INTERFACE
- PRINT THE LATEST 150 DATE AND TIME STAMPED TRANSACTIONS FROM MEMORY
- PRINT DATE AND TIME STAMPED TRANSACTIONS AS THEY OCCUR
- PRINT KEY TAG/PIN STATUS REPORT
