U.S. Green Building Council LEED Rating Statement

Based on review of current LEED rating systems for applicability to architectural door hardware, HES, Inc. states the following:

Applicable LEED Programs and Credits:

- MATERIALS AND RESOURCES: RECYCLED CONTENT

Post-consumer material is defined as waste material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose.

Pre-consumer material is defined as material diverted from the waste stream during the manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

*Recycled content defined in accordance with industry standards

**Pre-consumer recycled content refers to the waste material that is diverted from the waste stream and immediately placed back into the production cycle

† Waste materials generated by the production of HES, Inc. products are collected and shipped off site where it then reenters the recycle stream.
