

SL71 SAFETY HINGE

NEW!

No more pinched fingers

Help child care centers, schools, long-term-care facilities and other institutions increase safety and meet legal requirements with the NEW SELECT SL71 safety hinge. The hinge prevents people from trapping their fingers between the hinge leaves when the door closes. The SL71 provides a large, 19/32-inch clearance between the door and frame on the hinge side.

- Safety hinge (when used without a frame stop)
- Provides clearance sufficient to avoid pinching fingers
- Flush mounted (no door inset)
- For 1-3/4" doors

"Pinch-free" SL71 safety hinge won't trap fingers.

Eliminate hinge repairs forever.

More than 25,000,000 cycles in independent testing — equivalent to 60+ years of high-traffic use — and our never-ending Continuous Warranty™ prove their longevity. SL71 HD geared continuous hinges are BHMA Grade 1 certified. Their long product life cycle and recycled content help them meet LEED requirements.

Find more safety hinge information and specs at select-hinges.com/safetyhinge.

SELECT geared continuous hinges are performance-proven through 25,000,000 cycles in independent testing and backed by the industry's only Continuous Warranty™. It covers any failure of our geared hinges under normal use with no expiration date.

NEW!
Patent pending

Prevent injuries with ligature-resistant hinges

Hospitals, schools, correctional facilities and other institutions can make rooms safer and meet legal requirements. SELECT's ligature-resistant hospital tips deter patients or inmates from harming themselves by hanging objects from the hinge.

The SELECT Tipit™ ligature-resistant hospital tip can add safety to doorways in both new and retrofit applications.

The new SELECT Tipit™ hospital tip (patent pending) is made of durable polymer and securely fastens to the door frame header.

- The SELECT Tipit hospital tip works with SELECT's geared continuous hinges (excluding SL40, SL60 and SL62) and most other brands of full surface, half surface, concealed or swing clear geared continuous hinges.

Tipit available in two sizes, in black or gray.

The SELECT ligature-resistant hospital tip prep for concealed hinges can build in safety right from the start.

The new and improved SELECT angle-cut hospital tip provides safety with slanted tips and durable polymer end caps that leave no exposed edges.

- New SELECT concealed hinges (excluding SL71) can be prepared with slanted tips and end caps. Handing required, except on SL11, SL27 and SL38.

Hospital tip end caps available in black or gray.

Find more hospital tip information and specs at select-hinges.com/select-hospital-tips.

SELECT geared continuous hinges are performance-proven through 25,000,000 cycles in independent testing and backed by the industry's only Continuous Warranty™. It covers any failure of our geared hinges under normal use with no expiration date.
