

Safe Egress You Can See, Hear & Trust

80 Series Exit Device with Beacon®:
An Industry First Life-Safety Solution

Cuts Through Smoke and Noise

In a crisis situation, occupants may have difficulty finding the path of egress. Beacon connects to the building's fire alarm system and when activated, guides occupants to the location of the exit with distinct signals. Two high intensity pulsing LEDs, verbal messages indicating the exit location and a visible green laser light cone are designed to draw people directly to the exit. This industry-first product helps people find egress, offering a unique and effective supplement to existing fire alarm systems.

Features

- Audible and visible signals to draw occupants to the exit
- Language selection (English, French, and/or Spanish) and visual indicators are user configurable
- ElectroLynx® connectors provide easy, worry-free installation
- Available on 80 Series exit devices including rim, mortise, CVR and SVR by ordering with BT- option
- MicroShield™ antimicrobial finish option
- Push bar with "Exit" text available as either electroluminescent or photoluminescent technologies

Benefits

- Easy to install: Beacon integrates with existing fire-alarm systems and is easily added to SARGENT 80 Series Exit Devices as either a retrofit kit or a factory installed option
- Flexible: notification settings can be configured based on customer preference; retrofits to most 80 Series exit devices
- Durable: provides the long life and reliability of the proven 80 Series exit devices, making it ideal for high traffic environments

Applications

Beacon Exit Devices are ideal for applications where there are large crowds or environments where occupants need additional assistance locating exits.

- Entertainment venues
- Sports venues
- Conference and convention centers
- Auditoriums
- Healthcare facilities
