Calculating Mop/Kick/Armor plate prices:

1. Calculate price per 100/sq. in. (Length x Width / 100)
Round up odd and fractional sizes to next even dimension.
2. Multiply by Finish price above

Example: 10 x 34 Satin Stainless Steel (630)
 10 x 34 = 340 sq. in. / 100 = 3.4 x \$8.00 = \$27.20 ea.

Special Note: **Crating charge required for all Armor Plates over 12" tall.**
 UPS handling charge also applies. *Email for quote.*
