ASSA ABLOY

Sustainability

Sustainability is the natural translation of ASSA ABLOY's Corporate Cornerstones: vision, realism, courage, and ethics. These cornerstones have been central to the Group's development since its creation in 1994. The environment, business ethics, and social responsibility are critical issues and are an integral part of our ASSA ABLOY society. Our unconditional aim is to make sustainability a central part of our business philosophy and culture; and even more importantly, to integrate sustainability into our overall business strategy.

Daylighting

There are many attributes to a sustainable built environment such as daylighting. Daylighting is the process of bringing natural light and direct sunlight into the a building through windows, skylights and interior glass. Exposure to natural light helps improve occupant health, happiness, productivity, and well-being, while decreasing total building energy costs by almost a third.

Glass

Glass creates openness in a space. In an office environment, openness promotes happiness, creativity, and communication, which are important aspects of good design. In creating a modern atmosphere, glass never looks old or outdated. Being more durable than most materials, glass has longevity that offers an ideally cost-effective solution. Also, glass applications are easily configured, allowing flexibility in any design. At ASSA ABLOY, we believe good design is more than just tangible; good design is imperceptible.

The global leader in door opening solutions

SECURITRON® M380 Series Magnalock®

The M380BDX provides strong hold, in a stylish way. With unsurpassed intelligence, an integrated optional REX, and incredible ease of installation, it sets a new standard for mag locks. It offers a built in, auto voltage-sensing microprocessor along with Securitron's patented BondSTAT® and door position monitoring, plus advanced options such as REX for the most functional mag lock ever. The M380BDX look is refined enough for the most discriminating designer openings with consolidated features that eliminate the clutter of multiple devices around the door and the fastest, easiest, and most secure installation of any bracket mount mag lock.

Product Features

- Bracket mounting provides the easiest install for outswing doors
- Innovative install template for effortlessly accurate alignment between magnet and armature plate
- Sleek, low profile and refined lines for improved aesthetics
- LED visual locked status with configurable red/green color output
- Autosensing dual voltage with microprocessor technology
- Wire chamber with anti-tamper switch
- Efficient, low-power usage
- Size optimized for use with door closers
- MagnaCare® lifetime replacement no-fault warranty
- Adjustable passive infrared (PIR) request to exit (REX)
 - Automatically cuts power to M380 for egress
 - REX output
 - Easily adjustable beam pattern
 - Adjustable relock timer technology

The REX is designed as a modular component that can be installed on either the left side or the right side of the magnet. The position of the REX module can be easily field configured for better positioning on the door.

SECURITRON® M680 Series Magnalock®

The M680BDX with an integrated request to exit (REX) from Securitron® provides optimum coverage for detecting an approaching person so the door unlocks for egress. The configuration of the passive infrared (PIR) beam allows the detection area to be tailored to your environment for better accuracy. Meet the smart, stylish, and secure mag lock with an integrated, adjustable, passive infrared request to exit.

SECURITRON® SAM Shear Aligning Concealed Magnalock®

This concealed mag lock provides hidden strength at any angle for any application. The SAM Shear Aligning Magnalock® is ideal for traffic control or medium security and with its flexible mounting options, provides a solution for the most challenging door control situations. The SAM Shear Aligning Magnalock has mounting options for a single door or for each leaf on a pair of doors and can be a sliding, in-swing, out-swing, or swing-through door. It mounts fully concealed into Herculite doors in any position: at the header, door edge, or threshold.

Product Features

- Recessed for aesthetically appealing finish
- Fully sealed for weather-proof operations
- 10 ft (3.05 m) of jacketed, stranded conductor cable
- Automatic dual-voltage; no field adjustment required
- Instant release circuit; no residual magnetism
- Noise suppression with included MOV
- Efficient, low power usage
- Rust-resistant; all ferrous metal surfaces plated for durability
- MagnaCare® lifetime replacement no-fault warranty

ADAMS RITE® Digital Glass Door Lock

The RITE Touch® RT1050D digital door lock provides keyless access control for all-glass openings. The RITE Touch offers sophisticated styling, convenience, flexible access control, and safety and security for single or double glass doors. Perfect for indoor applications, the easy to install, surface-mounted RT1050D combines elegant aesthetics with the latest touch screen technology, to harmonize style and security.

Operation

The surface-mounted lock features two options for credential actuation on the secure side of the door: either by entering a user code using a touch-screen or by using the provided Mifare credential card. The lock features dual unlock from the inside of the door, either by thumbturn or by using an override button.

Product Features

- Thin, low profile, surface mounted design
- Easy installation requires no modification to glass
- Sleek touch screen interface
- Compatible with interior single or pairs of doors
- Access control via card reader or keypad
- Card reader supports up to 40 credential cards
- Battery powered with emergency access power capability
- Visible operation status
- Optional automatic locking
- Break-in and damage alarm
- Electronic shock resistant

SECURITRON® AccuPower® AQD3 Series

The Securitron® AccuPower® AQD3 Series of switching power supplies are dual-voltage, supervised units with battery charger. These units are field selectable, with a fast battery charge reserve. They provide 3 A at 12 VDC or 1.5 A at 24 VDC continuous, with up to eight (8) independently controlled, power-limited outputs.

Product Features

- Up to 3 Amp/12 VDC or 1.5 Amp/24 VDC total output. Rated up to 2.8 Amp/1.4 Amp continuous output
- Dual voltage 12 VDC/24 VDC field selectable
- Internal transformer
- Tolerates brownout or overvoltage input from 60-260 VAC
- Thermal shutdown protection with auto restart
- Circuit breaker protects against overcurrent and reverse battery faults
- Battery charger and power supervision
- Low battery disconnect prevents deep discharge
- Dedicated voltage enables faster battery charging even under full load
- MagnaCare® lifetime replacement, no fault warranty

SECURITRON® BPS Series

12/24-1 Dual Voltage Boxed Power Supply

The BPS Series of power supplies delivers linear technology and is recommended for use with the most voltage sensitive electronic safety and security components, including card readers, electric strikes, motion sensors, DC voltage cameras, and as an interface for a fire alarm system or battery backup. The BPS-12/24-1 is UL Class 2 listed, allowing for wire runs without the use of conduit from power supply to door.

Product Features

- Dual-output, field-selectable 12/24 VDC via clearly marked toggle switch
- Supplies 1 full Amp continuous current output, even while charging back-up batteries
- Linear regulated power supply provides the cleanest power available
- UL Class 2 power-limited output
- SPDT AC monitoring output allows for remote monitoring of the power supply's 110 VAC input
- External LED indicator (AC and DC) easily determines power status
- UL Listed, low-current fire alarm disconnect requires only a minimum size fire alarm relay and wire gauge
- Polyswitch 2 A breaker allows for large short duration inrush current if batteries are installed (approximately 20 A for 1 second)
- Line voltage and DC fuses
- Sealed lead acid or gel battery charging capability (battery sold separately)

Aperio®

Aperio offers the same real-time communication as traditional access control without the inconvenience of wiring the door. Aperio technology is a global wireless platform that reduces the cost and inconvenience of traditional access control without the hassle of complex site surveys. It utilizes local wireless communication between the lock and a communications hub to connect to an online electronic access control system. This offers facilities an easy, affordable way to expand the reach of existing access control systems and secure additional openings.

SECURITRON® R100-1H Wireless Reader and Aperio® Hub

The R100-1H surface mounted wireless iCLASS reader and pre-paired Aperio® hub offer an elegant way to extend access control to glass entryways. Installation is easy, requires no drilling or pulling of wires and can adhere in minutes. A complement to an electronic locking solution, glass entryways can now integrate robust access control while maintaining a clean, wireless appearance.

Product Features

- Adheres to glass surface without any connecting wires
- Shortened wire pull from panel to hub provides cost benefit in installation
- Fully-encrypted AES 128 wireless communication
- Online transaction audit trail capability
- Low-battery signaling and reporting
- Green status LED indicator
- Protected by SecuriCare® three-year, no-fault warranty
