Glynn Johnson 510/550 Series Heavy Duty, Adjustable Overhead Launch

Glynn Johnson is very proud to announce the arrival of the new 510 Concealed and 550 Surface Heavy Duty Adjustable Overheads. Available to start ordering **May 10th, 2017**, the new 510/550 Adjustable Overheads provide a high degree of field adjustability and flexibility compared to other overheads available on the market today. This results in less complexity when ordering and fewer models to stock to meet the requirements for the majority of applications.

510/550 Series Heavy Duty, Adjustable Overhead Features and Benefits

- **Adjustable, Telescoping Arm** enables one overhead to work for all door openings from 24” to 48” wide and 85 – 110 degrees of opening
 - No longer need to figure out which overhead size you will need for the opening
 - Always have the right overhead available, reduce stocking inventory
- **Simple Field Adjustment** is achieved in just two steps.
 - Determine opening width and desired degree of opening. Adjustment chart tells the installer where to mount the overhead channel and jamb bracket, and the position for the telescoping arm.
 - Telescoping arm position is adjusted by loosening the two set screws, sliding the arm to the desired setting and tightening the screws.
- **Field Adjustable Functions: Stop-Only vs Hold-Open** All overheads are shipped as Stop-Only for fire door applications. The selection of Stop-Only is viewable for fire stop applications for easy fire inspector validation. If Hold-Open function is desired, a knob is installed into the hold-open latch which can activate the Hold-Open function.

Marketing bulletin

- **Heavy Duty** construction similar to the popular 90 Series Surface and 100 Series Concealed Glynn Johnson Overheads

Certifications
