

Medeco® XT 'Connected' Key

Slim Line + Bluetooth Intelligent Key

The Medeco XT Slim Line + with Bluetooth technology is an Intelligent Key that can be 'connected' to most Android or iOS mobile devices using Bluetooth Smart Technology.

The XT Mobile Key Client App provides all the functionality and feedback you need to ensure proper programming of your keys.

Mobile Android & iOS App will be available for download from Medeco XT Web Manager Website.

Phone and key sold separately.

Audit Accountability

Remote audit uploads allow for quick response to events that require attention.

On Demand Scheduling

Activate a key only when and where it is needed. When not needed it is left deactivated, thereby mitigating the cost and liability of lost or stolen keys.

Increased Productivity

Keys are 'connected' to your Mobile device via Bluetooth so there is no need for traveling back and forth to visit an administrator for key access changes.

Wireless Communication

Program keys and pull audits quickly and easily via your Mobile device.

XT Web System compatibility:

- XT Web 2.0 – Medeco hosted or Self-hosted systems

Features:

- Utilizes Bluetooth Smart Technology
- Program keys from any location (within cellular coverage area)
- No need to 'dock' key to program
- LED programming feedback indicates when key is connected to the mobile device
- Works with the latest XT Web Manager software

Smartphone or Tablet required and running Android OS or iOS operating system:

- Requires data service
