

FREE VINCI - SURFACE MOUNTED MECHANICAL CODE LOCK WITH SECURED ENTRANCE AND FREE EXIT

Item No. LFKQX1

One sided code mechanical code lock (Free Exit) for swing gates with aluminum housing and stainless steel mechanism. The Free Vinci offers you the ability to secure one side with a code for entrance while leaving the other side free for exit. This lock is 100% mechanical, so no batteries nor electricity are required, which makes it very easy to equip any gate with access control. The latch bolt has 3/4" continuous adjustment to allow perfect alignment of the locking mechanism. Ships standard with the Club handle for the secure "code" side and a round knob for the exit side. The PUSH handle is available for the exit side. The latch gap required is keep dependent, but the standard and security keeps require a 1-1/4" latch gap.
