Medeco SPC Key Cabinet

The Medeco XT SPC “Secured Programming and Charging” device is a robust metal key cabinet that secures up to 64 individual Medeco XT Intelligent keys with a special lock-in place feature--only an assigned user is able to retrieve his key(s). While stored, each key recharges so it's always ready to be used. For greater scheduling flexibility, the Medeco XT SPC key cabinet contains an intuitive LCD touch-screen device that conveniently programs the keys upon removal.

The Medeco XT SPC offers a full audit of key removal and return and fully networked software allowing multiple levels of oversight. The Medeco XT SPC key cabinet is a key programming, management, and charging system that adds tremendous value to many markets, including retail, critical infrastructure, and commercial applications.

Features

- Reduces risk of lost or uncharged keys
- Keys are always ready because they charge while being stored
- XT programming device to allow convenient reprogramming
- Full audit of key removal and return
- Fully networked software allows multiple levels of oversight
- Battery back-up to ensure key access during power failure
- Durable 16-gauge powder coated metal enclosure
- User specific rights determine access to:
 - One key
 - Multiple keys
 - Multiple keys, but only one can be removed
- User key port(s) are illuminated to indicate unlocked keys
- Mechanical key override for security door
